## PREFACE

---

Since before World War 2, nations have experimented with biological agents as weapons of mass destruction. With the advent of nuclear weapons, some thought germs, although still pertinent, to be less vital than weapons that can reach across the globe in a matter of minutes to deliver a payload that can kill millions in seconds. But the real danger still lies with microorganisms. To quote actress Sinéad Cusack, who played Dr. Delia Surridge in *V for Vendetta*:

*“Nuclear power is meaningless in a world where a virus can kill an entire population and leave its wealth intact.”*

That quote, despite downplaying nuclear power, captures with prominence the gravity of the situation which unfolded across the globe, revealing the true power of an organism on a cellular level.

These lessons learned discuss the origin of SARS-CoV-2, why it was released, and provide an educational guide from events that have occurred during the pandemic. The compendium of work is not a scientific study. Rather, it is an unsolicited analytical intelligence product that incorporates an unclassified all-source approach utilizing public information from events, scientific studies, news articles, quotes, anonymous user posts, blogs, social media, memos, reports, and books, along with subliminal messages and hidden plots in movies to ensure an all-inclusive product. Due to the correlating and deductive reasoning techniques applied in this document, and because of a lack of information pertaining to events exactly as they unfolded in Wuhan, sections of that analysis are subject to change as new evidence is uncovered. The rest is conclusive. The lessons are presented as informational. They aren't intended to diagnose, treat, or cure any disease.

## The Origins of SARS-CoV-2

Truth is always the first casualty of war.

— Aeschylus

Truth has a devastating impact. Most aren't prepared to handle it. When a lifetime is spent hearing half-truths and lies, many will dismiss truth to escape the pain of reality.

There have been numerous theories circulating the web as to the origin of SARS-CoV-2: from Deep State operatives whose intent was to embarrass President Donald Trump and tank the world economy, influencing the next election—to a false flag operation designed to give intelligence agencies sweeping powers and control, further eroding privacy and civil rights; a population control measure by the globalist elites of the New World Order—to a power struggle between rival factions within the Chinese government; a guise to gather all of China's critics and dissidents and silence them in one fell swoop—to a theory which has caused a lot of uproar and property damage; a test pilot program for ID2020; a digitized virus that's activated by 5G, coupling biological warfare (biowarfare) with an electromagnetic field (EMF), thereby allowing for the remote assassination of targeted individuals with smart dust they've inhaled from chemtrails. . . . An innovative hypothesis. Although studies have shown EMF's potential and role in virus genome activation in latently infected cells,<sup>1</sup> an overabundance of evidence points to a deliberate release of a bioengineered virus as the cause for this global catastrophe, with the primary and strategic goal of population reduction.

The detail with which this story unfolds can't be clearly expressed alone through these lessons learned. Even conceptual frameworks, due to the complexity of events, can't visually present all the information. Some of the grit dates back decades, shrouded under the cloak of secrecy that's difficult to pierce. The veil imposes a partial blind spot. But what's there does have a beginning. To better understand, it's crucial to go back in time and see the totality of events leading up to the pandemic.

## Timeline of Events

1. **02/XX/1981.** Dean Koontz writes a thriller titled *The Eyes of Darkness*, a novel with a viral outbreak called Wuhan-400.
2. **09/27/1995 – 10/01/1995.** The Mikhail Sergeevich Gorbachev Foundation, funded by the United States (U.S.), gathers 500 of the world's most important statesmen, economic leaders and scientists in the San Francisco Fairmont hotel for a high-level round table conference, discussing problems about globalization and how to guide humanity forward into the 21<sup>st</sup> century. The outstanding people of the world in attendance thought that in the 21<sup>st</sup> century a mere 20% of the world's population would be sufficient to maintain the world's economy and prosperity, and the other 80% or 4/5 of the world's population would be human garbage unable to produce new values. The people in attendance thought that this excess 80% population would be a trash population and **“high-tech” means should be used to eliminate them gradually.**

Partial list of attendees.<sup>2-4</sup>

| 35. <b>John Naisbitt</b> (Author and futurist)            | 47. <b>Sonia Gandhi</b> (founder of the Rajiv Gandhi Foundation)                             |
| 36. <b>Tansu Ciller</b> (Prime Minister of Turkey)        |  |
| 37. <b>Vaclav Havel</b> (President of the Czech Republic) |  |

This "human garbage" population resides all over the world, but most of it is in the Near East and South East Asia. Roughly half the world's population in that location. All living in proximity and poverty.

- ~ 1.5 billion people in China
- ~ 1.4 billion people in India
- ~ 274 million people in Indonesia
- ~ 221 million people in Pakistan
- ~ 165 million people in Bangladesh
- ~ 110 million people in the Philippines
- ~ 97 million people in Vietnam

3. **04/05/1999.** The most senior defector from the Soviet germ warfare program says in a new book that Soviet officials concluded that China had suffered a serious

accident at one of its secret plants for developing biological weapons (bioweapons), causing two major epidemics.<sup>5</sup>

4. **11/16/2002.** A SARS outbreak is first identified in Foshan, Guangdong, China.<sup>6</sup>
5. **11/03/2003.** The Central Intelligence Agency (CIA), Directorate of Intelligence, releases a 2-page unclassified document titled *The Darker Bioweapons Future*.<sup>7</sup>
6. **02/XX/2004.** A security breach at a lab in China bears responsibility for the reemergence of SARS.<sup>8</sup>
7. **02/15/2005.** *The War is Not Far from Us and Is the Midwife of the Chinese Century*, a speech given by Chi Haotian, Minister of Defense and vice-chairman of China's Central Military Commission, is published on peacehall.com, arguing for the necessity of China to use bioweapons to depopulate the U.S. and prepare it for a future massive Chinese colonization.<sup>9</sup>
8. **12/26/2005.** Xu Jinping Meng, a person from Wuhan University, files a patent that looks to modulate a coronavirus's spike protein genes.<sup>10</sup>
9. **02/XX/2008.** China's Thousand Talents Plan (TTP) is announced by the central government of China to recognize and recruit leading international experts in scientific research, innovation, and entrepreneurship. Both the U.S. and Canada warn that China intends to use scientists involved with this program to gain access to new technology for economic and military advantages.<sup>11</sup>
10. **05/22/2009.** Konan Michel Yao, a former researcher at the National Microbiology Laboratory (NML), a BSL-4 in Winnipeg, Canada, is accused of trying to smuggle genetic material from the Ebola virus across the Manitoba-North Dakota border on 5/5/2009 and then pleads guilty to a lesser charge after his arrest.<sup>12</sup>
11. **XX/XX/2011 – XX/XX/2014.** The Wuhan Institute of Virology, a BSL-4 facility, is constructed with help from the French. Upon completion, the CCP refuses to honor its agreement with the French and ends their partnership right after the opening ceremony.<sup>13, 14</sup>
12. **10/16/2014.** The National Institutes of Health (NIH) issues a statement that the U.S. government will review funding gain-of-function research into Influenza, SARS, and MERS viruses, pending a safety assessment, effectively imposing a 3-year moratorium on such research.<sup>15</sup>
13. **XX/XX/2015.** The University of North Carolina (UNC) contravenes the ban on gain-of-function research by **creating a SARS-like chimeric virus with gain-of-function built-in** that enlists the help of a Chinese virologist (Dr. Zheng-li Shi) because its study predated the NIH ban by a few weeks.
14. **06/12/2015.** UNC submits its scientific research for publication, detailing its findings for the SARS-like chimeric virus it created.
15. **08/XX/2015.** Two researchers at UNC required medical monitoring after a mouse briefly escaped inside one of UNC's BSL-3 labs. UNC officials refused to disclose the name of the virus, but NIH officials told ProPublica it was a type of SARS-associated coronavirus.<sup>16</sup>
16. **09/30/2015.** Tesla rolls out a bioweapon defense mode button on their new model X.<sup>17</sup>
17. **10/XX/2015.** Three UNC researchers were potentially exposed to an undisclosed "mouse-adapted" virus when a shallow container fell to the floor of a BSL-3 lab,

spilled, and potentially created aerosolized droplets. NIH officials told ProPublica the incident involved a type of SARS-associated coronavirus.

**18.10/08/2015.** UNC's report on the SARS-like chimeric virus it created is accepted.

**19.10/13/2015.** Richard Rothschild files a provisional priority application with a Dutch organization for a family of patents, one a System and Method for Testing for COVID-19 that was then applied for on 05/17/2020 and granted on 09/03/2020.<sup>18</sup>

**20.11/XX/2015.** Two UNC lab workers were potentially exposed to a lab-created type of MERS coronavirus when an empty cage with contaminated animal bedding spilled on the floor of a BSL-3 lab.

**21.11/06/2015.** The creation of UNC's SARS-like chimeric virus triggers a debate by scientists into gain-of-function research.<sup>19</sup>

**22.11/09/2015.** UNC's study is officially published electronically, titled *SARS-like Cluster of Circulating Bat Coronaviruses Shows Potential for Human Emergence*.<sup>20</sup>

**23.02/XX/2016.** A researcher at UNC is bitten by a mouse that was infected with the created SARS-like chimeric virus. Instead of quarantining to wait for signs of infection, the scientist was allowed to go about her life in public for the next ten days, wearing a surgical mask and reporting her temperature twice daily.

Throughout years, before and after the events, movies, TV shows, and video games through plots and subliminal messages allude to a coming pandemic.

- a. **09/09/2011.** *Contagion* (A virus jumps the cross-species barrier from bat to pig and then to human and starts killing off the world's population, ravaging America and other countries. Interestingly, it has splices of HIV that in the movie occur naturally.)
- b. **09/09/2015.** *Maze Runner: The Scorch Trials* (Filming began on October 27, 2014, and officially concluded on January 27, 2015. The dystopian sci-fi film is based on James Dashner's 2010 novel *The Scorch Trials*, the second novel in *The Maze Runner* book series, which centers around aggressive zombie-like people that have been infected by a plague known as the Flare virus. The disease attacks the brain and causes victims to lose their humanity and become crazy.)

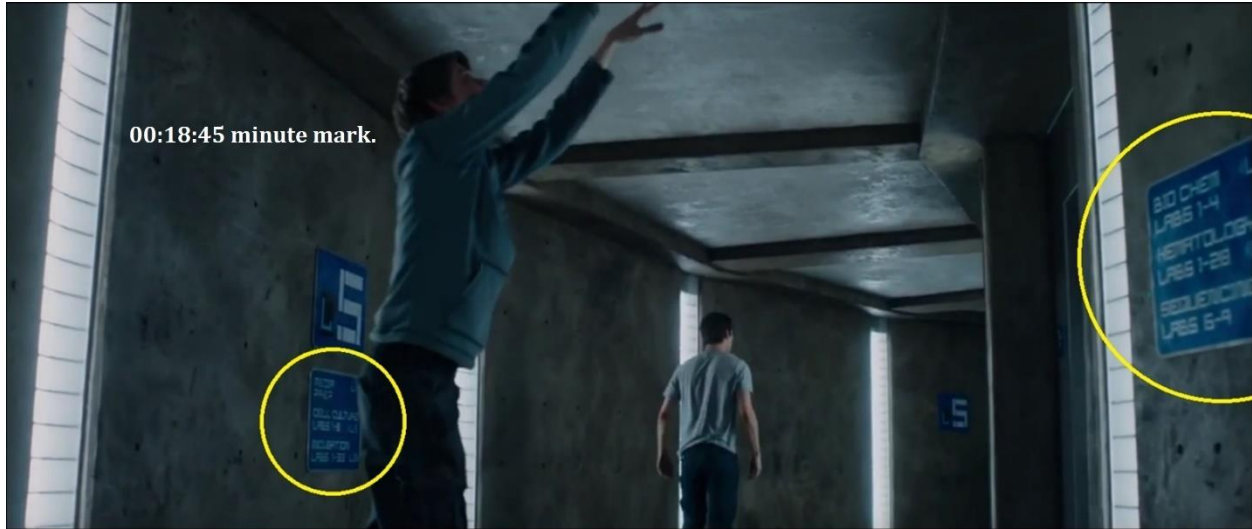

Image still #1 from *Maze Runner: The Scorch Trials*

During Thomas's exploration of the WCKD (pronounced Wicked) facility, signs are seen briefly on the walls denoting labs and their functions. Upon closer review, the same labs are responsible for different tasks, a clear indicator the numbers aren't meant to represent labs but timeframes of real-world timelines that those tasks take. The font used is another giveaway. LABS looks like LAGS, as in lags behind, an association with time. Labs 1-4 are Bio Chem, implying 1-4 days. Labs 1-28 are Hematology, implying 1-28 days. Labs 1-8 are Cell Culture, implying 1-8 days. Labs 1-33 are Incubation, implying 1-33 days. Labs 6-9 are Sequencing, implying 6-9 days. And Media Prep has no numbers associated with it because the media is a tool that can be used at a moment's notice. It requires no preparation. Actual comparison to the length of time it takes to perform Bio Chem, Hematology, Cell Cultures, Sequencing, and a virus's incubation period all fall within those specified timeframes. They're not movie specific.

Image still #2 from *Maze Runner: The Scorch Trials*

During Thomas's escape from the WCKD facility, a sign that wasn't seen clearly before is visible in the primary field of view for a second as he shoots a guard with a stun gun while coming out of a lab.

- c. **10/13/2015.** *The Last Witch Hunter* (Filming was concluded in December of 2014. The film stars Vin Diesel as an immortal witch hunter who **must stop a plague from ravaging the entire world.**)

## The Last Witch Hunter

From Wikipedia, the free encyclopedia

*The Last Witch Hunter* is a 2015 American fantasy action film directed by Breck Eisner and written by Cory Goodman, Matt Sazama, and Burk Sharpless. The film stars Vin Diesel as an immortal witch hunter who must stop a plague from ravaging the entire world.<sup>[6]</sup> The film was released on October 23, 2015, grossing \$147 million while receiving generally unfavorable reviews from critics.

Plot  [edit]

Eight hundred years ago, the Witch Queen unleashes the Black Plague to wipe out humanity. A band of knights, including a widowed Kaulder, whose family had died in the plague, storms her lair and in the ensuing battle, Kaulder manages to defeat her. Before dying, the Witch Queen curses Kaulder with eternal life.

In the present day, Kaulder prevents a teenage witch, Bronwyn, from unintentionally destroying an airplane with weather-controlling runes stored in her luggage. Kaulder is revealed to be working as a witch hunter for the Order of the Axe and Cross, an organization which aims to keep the truce between humans and witches (allowing witches to live freely providing they do not use magic on humans) and either executes or imprisons the witches who break the law. He is aided by a priest called "Dolan", a tradition carried from the first priest who fought in the battle to destroy the Witch Queen.

<b>Directed by</b>	Breck Eisner
<b>Produced by</b>	Mark Canton Vin Diesel Bernie Goldman

<b>Box office</b>	\$146.9 million <sup>[3]</sup>

Within the movie, there are subliminal messages and hints such as Smith-Corona. That's the name of a company that used to make typewriters. The reference is seen twice in a journal for not more than two seconds each time. The journal is used by Michael Cain's character to signal to Vin Diesel's character that he wants him to remember his death. He does so covertly with a bloody fingerprint that he used to mark the words: "Remember Your Death," individually, on three random pages of the journal. Around the words he marked are clues and pandemic terminology that at first glance, are impossible to note because of how quickly they appear and disappear in the film, unless a screenshot is taken and a deep analysis performed. Image stills and close analysis reveal exactly that.

Easter eggs in movies are very common. However, when so many hidden elements add up, it's more than a mere coincidence. An 800-year-old immortal that is trying to stop a Witch Queen from **unleashing a plague**; the initial release of the film on **10/13/2015** in NYC, marking the same date Richard Rothschild filed a provisional priority application for a family of patents; the **Smith-Corona** references which have no business being used: all signify that

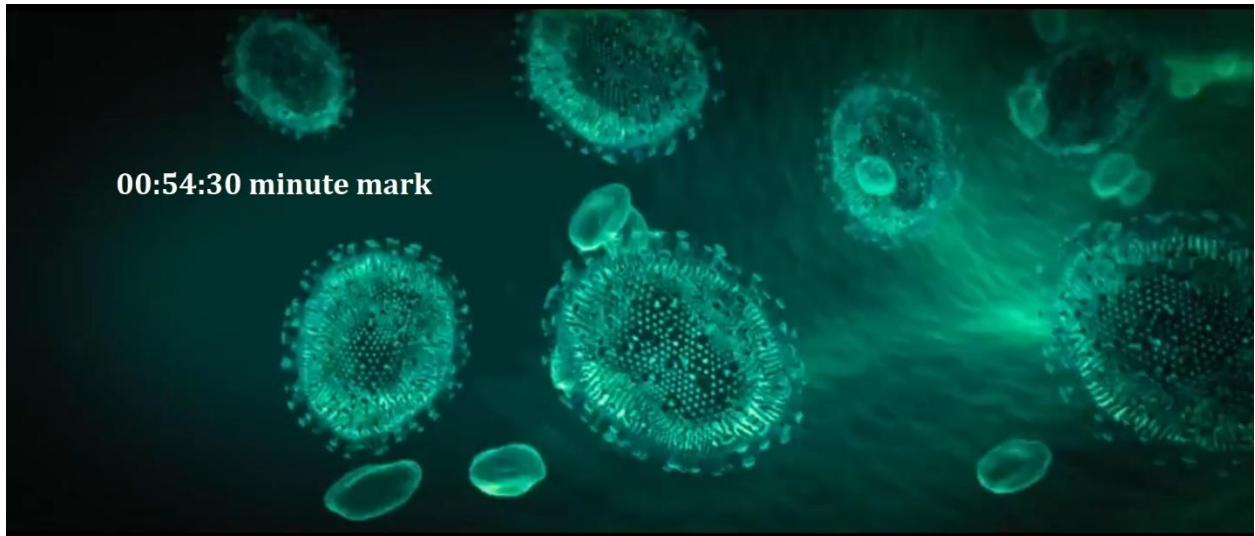

an industry insider or someone with prior knowledge was trying to secretly warn and signal to the unsuspecting population of the coming pandemic via a coronavirus. There would be no logical reason to utilize any of the terminologies used, especially how they were used clandestinely, even in a movie about a plague, unless someone wanted to leave breadcrumbs for someone else to piece it all together. Instead of Smith-Corona, the Underwood Typewriter Company could've been used, or the Royal Typewriter Company. There are numerous U.S.-based old typewriter companies. Yet, Smith-Corona was chosen. That wasn't by accident.

- d. **03/08/2016.** *10 Cloverfield Lane*. (The film is a psychological thriller that takes place inside a bunker from an apparent world-ending event.)

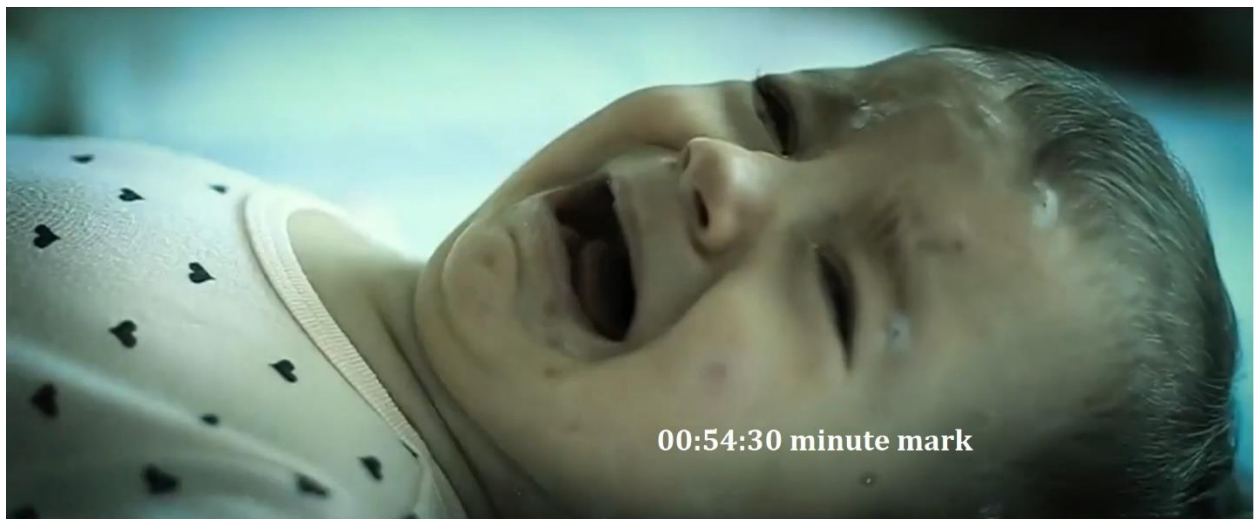

Image still #1 from *10 Cloverfield Lane*

- e. **10/08/2016.** *Inferno* (Filming wrapped up on 07/21/2015. The premise of the film? A billionaire and **transhumanist** scientist **develops a biological virus to wipe out the world's population in an effort to save it from overpopulation.**)
- f. **12/23/2016.** *Resident Evil: The Final Chapter* (Filming concluded on 12/7/2015. The film's franchise revolves around an imaginary virus called the T virus that escaped from an underground testing facility and infected the entire world, turning people into flesh-eating zombies.)

During Dr. Isaacs's end of the world speech, flashes of coronavirus in the bloodstream are seen for not more than a split second, followed by a baby crying, a young boy being loaded into an MRI machine, and an old man with an oxygen mask and a dying look upon his face. The suggestion from the imagery that the virus doesn't discriminate. The young and old will die alike. When paused at the correct moment, four coronaviruses are in the primary field of

view. The layout matches a 2D image of a microscopic view of a coronavirus found on Getty Images. The spacing is equivalent, though not completely identical to the 2D image. This is a result of the transfer of the image from a 2D view to a 3D view. The shapes of the coronaviruses in the 3D image are proportionate to the 2D image and slightly skewed at the same junctions, taking into consideration 3D orientation in the bloodstream. Because the Resident Evil franchise has its own imaginary virus, the T virus, which turns the infected into flesh-eating zombies, there would be no reason to utilize the coronavirus, especially with quick flashes during an end of the world speech that is clear and strong evidence of subliminal messaging, unless done to tie it in with real-world events. Correlation removes the possibility of an accident or coincidence and implies intentional placement with the 2D image as a reference guide.

There are many more TV shows and movies with hidden elements, but it would muddy the waters of these lessons learned if they were listed and a detailed analysis was done on all of them. **(If any subliminal messages that were shown get removed from streaming, you can still find them on hard copies. On the DVDs and BluRays they were released on.)**

**24.01/10/2017.** Dr. Anthony Fauci warns of a “surprise outbreak” during the Trump Administration. *“There is no question that there will be a challenge to the coming administration in the arena of infectious diseases,”* he said during a speech at the

Georgetown University pandemic preparedness forum. **“There will be a surprise outbreak.”**<sup>21</sup>

25. **02/06/2017.** DARPA aims to develop an integrated end-to-end platform that uses nucleic acid sequences to halt the spread of viral infections in sixty days or less.<sup>22</sup> (DARPA funded Moderna’s RNA vaccine development, a gamble which might have created the best hopes for stopping COVID-19.)<sup>23, 24</sup>
26. **02/22/2017.** U.S. researchers issue a warning that a virus can escape the BSL-4 in Wuhan.
27. **08/14/2017.** President Donald Trump instructs U.S. Trade Representative Robert E. Lighthizer to investigate China's alleged unfair trade practices, starting a trade war.<sup>25</sup>
28. **12/19/2017.** NIH lifts the 3-year moratorium on funding gain-of-function research for viruses such as the avian flu, SARS, and MERS, allowing for certain types of research to resume.<sup>26</sup>
29. **01/18/2018.** A U.S. led delegation visits the Wuhan Institute of Virology, the first visit of many, and sends an unclassified cable back to the U.S., noting, **“During interactions with scientists at the Wuhan Institute of Virology laboratory, the new lab has a serious shortage of appropriately trained technicians and investigators needed to safely operate this high-containment laboratory.”**<sup>27</sup>
30. **03/01/2018.** Steven Walker, director of DARPA, issues a concern about a CRISPR Bioattack as China seeks the genome lead.<sup>28</sup>
31. **03/27/2018.** The U.S.-led delegation visits the Wuhan Institute of Virology for the last time, sending more cables detailing their findings.
32. **05/15/2018.** Clade X pandemic exercise is conducted, highlighting policies needed to prevent and reduce the worst possible outcomes in future pandemics.<sup>29</sup>
33. **11/28/2018.** A Chinese scientist at the University of Science and Technology in Shenzhen, China, reveals that he has used CRISPR to make the world’s first genetically engineered babies immune to HIV.<sup>30</sup>

## Analysis of Events

In 1995, 500 of the world's most prominent leaders and scientists gathered at the Fairmont hotel in California for a high-level round table about how to guide humanity forward into the future. In that meeting, a conclusion was reached that 80% of the world's population would become a trash population, and high-tech means should be used to eliminate them gradually. Partial transcripts found online indicate Sam Keen said, *"Cut the population by 90% and there aren't enough people left to do a great deal of ecological damage,"* a quote attributed to Mikhail Gorbachev. But it is unknown who specifically stated high-tech means should be used to eliminate them gradually or whether this was the consensus among all the participants. 80%-90% of the world's population is approximately 6-7 billion people today. Because the nature of the topic was nothing less than conspiracy to commit mass genocide, the Chinese undertake the need to obtain a means to defend themselves. *"Since the enemies are secretly planning to eliminate our population, we certainly cannot be infinitely merciful and compassionate to them,"* is what Chi said in his speech that came years later.

With the Cold War over, a new one begins. The massive campaign that the Chinese have waged for decades to modernize their military is intensified. No avenue is off-limits. From bribes, blackmail, and cyberattacks—to flat-out physical theft; piece by piece, they work as a collective to ensure the Communist party's survival. America bleeds over decades. Lingchi is what it's referred to as. Trillions of dollars are lost. But America's jobs and economic status aren't the only things that are cut as China ascends, striving to be the world's leader: its military strength and advantage erode as well.

To ensure a Chinese century, biotechnology is a field that China must master. The priority is high.<sup>73, 74</sup> And talks of constructing a BSL-4 laboratory in 2003 that the Chinese Academy of Sciences approved and the epidemic of SARS spurred gave the project momentum. A few years later came a patent on how to manipulate the spike protein of a coronavirus, indicative of the Chinese application of the arts they began to master by tailoring viruses for human adaptation and the unnatural origin of the original SARS-CoV. In parallel to their efforts, China's TTP was created to contribute and expedite intellectual property theft. Like a centralized hive, China scattered its worker ants across the globe to forage and bring back. But the TTP was just one avenue in a long list. Exploitation of supply chains, joint ventures, and mergers and acquisitions were others. China's purchases over the years, which included U.S. sequencing company Complete Genomics, a procurement by its state-funded BGI that provided the Chinese access to a DNA database that contained the private genetic information of a large number of Americans, wasn't its first.<sup>75</sup> China has been buying people's DNA.<sup>76, 77</sup> Their purchase sprees, which always have a strategic purpose, caught the attention of the CIA and FBI. Their vast knowledge and duty to protect is what binds them to action. But their jobs weren't done because of corruption due to politicization. Intelligence agencies fully understand the nature of genetic companies and their role in the collection of genetic data, which can be used to custom tailor a bioweapon to an ethnic portion of the population or a specific individual. Yet a motion to dismiss the purchase on national security grounds wasn't filed, and the acquisition cleared the hurdles in 2012.<sup>78</sup> Opponents of the deal even cited an article in the November 2012 issue of *The Atlantic* at the time as a way to try and

stop it, highlighting the ability of such a purchase to derive custom bioweapons in the future.<sup>79</sup> Despite the science-fiction scenario that the article opened with—the plot, utilizing forward-thinking, wasn't that farfetched. But the concerns that were brought forth were dismissed. Now, practically a decade later, the Office of the Director of National Intelligence (ODNI) issued a warning that China's collection of U.S. healthcare data and DNA poses serious risks to privacy and the economy, as well as national security, revealing internal turmoil and incompetence in the Intelligence Community (IC).<sup>80</sup>

The study of coronaviruses has been ongoing for decades. Research wasn't limited to the U.S. and China but included the Australians, British, Canadians, French, Germans, Indians, Italians, South Africans, and Russians. A coronavirus is an adaptive and multipurpose tool that has many applications. It can be used for immunotherapy, as a vaccine, a bioweapon, or a bridge between biology and cybernetics (which will be explained in the transhumanism section), in addition to allowing for the study of virulence as part of an assessment on biosecurity risk and threat reduction. But because of the dangers that can result from experimenting with a virus's pathogenicity, gain-of-function research was suspended in the U.S. in late 2014, pending a safety assessment—but UNC contravened the NIH ban and created a SARS-like chimeric virus because its study predated the ban by a few weeks.

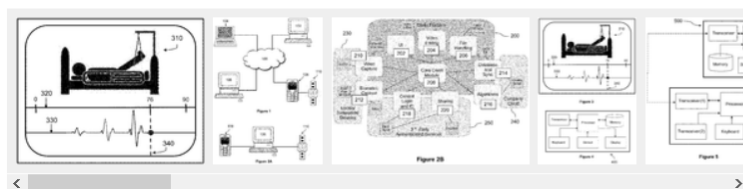

Five days after UNC's scientific study was peer-reviewed and accepted on 10/08/2015, came Richard Rothschild's provisional priority application for a family of patents, the talk of countless individuals as the smoking gun for the fact that this pandemic was planned.

### System and Method for Testing for COVID-19

#### Abstract

A method is provided for acquiring and transmitting biometric data (e.g., vital signs) of a user, where the data is analyzed to determine whether the user is suffering from a viral infection, such as COVID-19. The method includes using a pulse oximeter to acquire at least pulse and blood oxygen saturation percentage, which is transmitted wirelessly to a smartphone. To ensure that the data is accurate, an accelerometer within the smartphone is used to measure movement of the smartphone and/or the user. Once accurate data is acquired, it is uploaded to the cloud (or host), where the data is used (alone or together with other vital signs) to determine whether the user is suffering from (or likely to suffer from) a viral infection, such as COVID-19. Depending on the specific requirements, the data, changes thereto, and/or the determination can be used to alert medical staff and take corresponding actions.

Reuters fact-checked that, indicating Richard Rothschild didn't patent a test for COVID-19 in 2015 and 2017.<sup>81</sup> But their fact-checks, which purportedly debunked the planned pandemic theory, were incorrect, lacking several things, and didn't take into account other pieces of evidence: one being the subliminal messages in *The Last Witch Hunter*, which couple, correlate, and establish a synergistic relationship, revealing signaling by an individual: what's referred to as predictive programming.

### The Last Witch Hunter

From Wikipedia, the free encyclopedia

*The Last Witch Hunter* is a 2015 American fantasy action film directed by Breck Eisner and written by Cory Goodman, Matt Sazama, and Burk Sharpless. The film stars Vin Diesel as an immortal witch hunter who must stop a plague from ravaging the entire world.<sup>[6]</sup> The film was released on October 23, 2015, grossing \$147 million while receiving generally unfavorable reviews from critics.

#### Plot

Eight hundred years ago, the Witch Queen unleashes the Black Plague to wipe out humanity. A band of knights, including a widowed Kaulder, whose family had died in the plague, storms her lair and in the ensuing battle, Kaulder manages to defeat her. Before dying, the Witch Queen curses Kaulder with eternal life.

In the present day, Kaulder prevents a teenage witch, Bronwyn, from unintentionally destroying an airplane with weather-controlling runes stored in her luggage. Kaulder is revealed to be working as a witch hunter for the Order of the Axe and Cross, an organization which aims to keep the truce between humans and witches (allowing witches to live freely providing they do not use magic on humans) and either executes or imprisons the witches who break the law. He is aided by a priest called "Dolan", a tradition carried from the first priest who fought the battle to destroy the Witch Queen.

Red arrows in the image above show the initial release of the movie on the same date the prepatent application was filed: 10/13/2015. That coupling adds more evidentiary weight, expressed by the green link. “Remember Your Death” was the message. It’s emphasized in blue because the subliminal messages appeared out of order in the movie. On each subliminal message screenshot, there are clues and pandemic terminology accentuated in yellow. Liking the typewriter is a reference to Smith-Corona, a company that used to make typewriters. SARS-CoV-2, a coronavirus, causes the disease known as COVID-19. Your dark ages, no immediate causalities, and twelve were hospitalized are references to a pandemic and stealthy spread of the virus that leads to a mass casualty incident. When looked at in order and comprehensively, the message is clear.

The filing of a provisional priority application for a family of patents, one of which was a System and Method for Testing for COVID-19 that was then applied for on 05/17/2020 and granted on 09/03/2020, despite not mentioning COVID-19 until the disease was officially named, doesn’t reveal that the virus that causes the disease known as COVID-19 existed long before that, and was first discovered in 2012 when Mojiang miners in Yunnan, China, fell ill after working in bat caves.<sup>82</sup> Dr. Zheng-li Shi led the expedition and then lied about how they died.<sup>83</sup> Her expertise and research on coronaviruses and bats, which dubbed her the title “batwoman,” was primarily the reason as to why she was invited to UNC in the development of their SARS-like chimeric virus. But while some have dismissed Richard’s filing as a mere coincidence, not worthy of the conspiracy talk it has generated, a close examination does raise suspicions. 10/13/2015 is an important date because the priority date of the application is right after UNC’s study was approved for publication. But the study wasn’t published until a month later, indicating some form of early access or indirect funding. And because of the nature of one of Richard’s patents and the subliminal messages laced in *The Last Witch Hunter*, which couples the movie and its initial release date to the initial filing of the application, shows a sequence of events that exhibit circumstantial evidence, displaying intent. Someone knew this virus was going to be intentionally released and purposely left a warning important enough to chain it to the patent. Anybody that disagrees is ignoring all the facts instead of taking a holistic approach of reviewing aggregated open-source data. Richard knew this pandemic was coming in advance and sought to make a profit from it. How he knew is clear.<sup>84</sup> It was planned.

A pandemic limits the amount of money flowing into a country. It restricts movement and cripples an economy. The Rothschild dynasty is an old and wealthy one, built on banking, and spans back centuries. The power and wealth it has attained isn’t limited to legal revenue streams but involves illegal ones as well.<sup>85</sup> If the global population and economy were growing at an undesirable rate and needed a great reset to restructure them to bring about reform that would guide the world in the direction that was wanted by its “handlers,” a pandemic would be a great way to do it. Reappropriation of wealth through buy-backs of shares and companies at lower prices would help the rich get richer,<sup>86</sup> furthering the inequality gap while simultaneously allowing the opportunity to push new laws and agendas. Because a decrease in economic growth leads to a negative GDP quarter, a supplementary source of income is needed to offset some of the losses. A patent helps to achieve that. Additionally, because advances in bioweapons and breakthroughs have been made over the last several decades, the chances of a world-ending super-plague are at an all-time high. New

protective measures and guidelines for biosecurity risks must be updated and implemented but can't be without a catalyst: a significant and traumatizing event with a substantial loss of life that emotionally tethers the population to it, justifying curtailment of civil liberties, privacy, and freedoms without a lot of pushback from the people. Not a black swan event, but a gray rhino to psychologically stress and demoralize so it will never be forgotten, prompting behavioral modification through fear-induced and trauma-based mendacity while acclimating people to the new norms of society. Whereas 9/11 brought a restructuring of the U.S. IC and new surveillance tools to spy on the public to combat the rising threat of terrorism, so too will a pandemic, bringing about change and exposing deficiencies to allow the appropriate biodefense and contact tracing (warrantless surveillance) measures to be implemented.

Although bioweapon research dates back to the Second World War, it was during the Cold War that significant breakthroughs were made. Defectors from the former Soviet Union mentioned some of them: binary bioweapons and designer viruses.<sup>87</sup> Because of the prevalence and difficulty of tracking bioweapon programs and the dual-use nature of over-the-counter equipment and available public research, a bioweapon could be manufactured in a home by someone with the right skillset and education. Those are some of the reasons why officials are concerned and constantly warn about pandemics. The prevalence of knowledge and ease of production are a recipe for disaster. But the prior knowledge exhibited by Richard and Dr. Anthony Fauci indicates staging (Preparation for an intentional release). The provisional priority application, the filing of which reveals anticipation on a level that is beyond intuition, and Dr. Fauci's statement in an address at Georgetown University in 2017, warning of and guaranteeing a "surprise" outbreak during the Trump administration two years before it happened: are telltale signs of a conspiracy. An outbreak can't be a surprise if it's known in advance. Richard's prepatent application also shows that the "pandemic" was set to happen regardless of the winner of the 2015 presidential election. That explains Dr. Fauci's inconsistent statements and lies throughout this pandemic which extended beyond his denial that NIH funded gain-of-function research in Wuhan, China, at the cost of causing a pandemic because the intention all along was to do just that.<sup>88, 89</sup> His initial stance, that masks weren't effective against the coronavirus, which is true, depending on the type of mask and the filtration system it has, was to ensure healthcare workers access to the supplies needed during the initial wave so panic-buying by individuals who weren't at risk of contracting the virus wouldn't lead to shortages that would unnecessarily expose doctors and nurses to harm, diminishing the level of care that they could administer without the proper PPE (Personal Protective Equipment). His dismissal of Hydroxychloroquine, however, as an effective drug to combat and treat patients who were infected with the coronavirus, despite conducting studies a decade ago at NIH that showed its efficacy in the correct doses, conveys that he doesn't have the people's best interests in mind, violating his Hippocratic oath.<sup>90</sup> A body count is the highly sought-after prize of this pandemic.<sup>91</sup> Since it's been exposed that various elites from around the world have been working together for their agenda, and have been aiding and using China to achieve it,<sup>92</sup> it's not a surprise that they would use it for the release, similar to the 2009 Swine flu pandemic—and that's exactly what happened. To guide humanity forward into the future and enslave it, milestones need to be achieved. They can't be done at once, otherwise they would draw attention, criticism, and lead to revolution—so they're done slowly, over decades: a strategic erosion equivalent to a

gradual nibble on a cookie. It is needed to usher in more control for a New World Order and the establishment of a British-American federation that was fantasized in the late 1800s by Cecil J. Rhodes, a British mining magnate and former Prime Minister of the Cape Colony in South Africa, that would allow for the cessation of all wars and the formation of a universal language for the world, the goals that only a secret society could achieve by gradually absorbing the wealth of the world, as written by William T. Stead in the New York Times in 1902.<sup>93</sup> That's why a body count is so important. It generates fear and uncertainty, leading to panic, which facilitates a willful surrender of society by their own hands.

Cecil's admiration of the Society of Jesus, an order established in the 1500s with the blessing of Pope Paul III, and instructions to mirror the Jesuits when establishing a secret society in his first will with substitutions such as "English Empire" for "Roman Catholic Religion," demonstrates his imperialistic quest to ensure England's reign, a mission that lives on through his and other secret societies.<sup>94</sup> The Jesuits, an order Donald Trump, Dr. Anthony Fauci, and Governor Andrew Cuomo are alumni of, are one of the many secret societies that exist.<sup>95</sup> Though controversies surrounded all three individuals and their handling of the pandemic, there were noted dual loyalties. Trump's public feud with Dr. Fauci, calling him an idiot,<sup>96</sup> and the personal attacks on Andrew Cuomo's response in NYC show a betrayal.<sup>97</sup> Trump's tout of Hydroxychloroquine as a lifesaving measure clashed with Dr. Fauci's stance against it, even with scientific evidence backing up Trump's claim. One side sought to preserve life, and the other aimed to take it. This duality is seen and expressed in various religions, orders, and secret societies across the world: the battle of good vs. evil, light vs. dark, and life vs. death. But belonging to an order or secret society doesn't merit guilt. Actions are what define a person, which necessitates the review of several events before the pandemic: the restructuring of the National Security Council (NSC) pandemic response unit that oversaw Global Security and pandemic readiness one year before the outbreak, the sudden resignation of Rear Admiral Timothy Ziemer who oversaw and was part of that unit,<sup>98</sup> budget cuts to the CDC that left hundreds of vacant positions and impacted epidemic response in foreign countries, and claims that Trump held a stake in Sanofi, a company that makes Hydroxychloroquine under the brand-name Plaquenil, the very drug touted by Trump that proved effective in most instances when administered early on with supplemental therapeutic remedies.

The restructuring of the NSC pandemic response unit, a streamline by John Bolton, was labeled as a firing by Michael Bloomberg and the media.<sup>99</sup> That was proven incorrect. The opinions and language used were intended to instigate hate and cast blame, further eroding support for Trump. Dr. Fauci even stated, *"It wouldn't be characterized as a mistake (to eliminate the unit), though it would be nice if it was there."*<sup>100</sup> But according to a senior Trump administration official that was quoted by ABC, *"The NSC's global health security directorate was absorbed into another division where similar responsibilities still exist, but under different titles. The work of coordinating policy and making sure that decisions made by Trump's coronavirus task force are implemented is still the job of the NSC."* A fact-check by USA Today confirms Trump didn't fire the entire pandemic response unit and that the bloat of the NSC staff that had nearly 400 members was too much, requiring a reorganization.<sup>101</sup> Members from Obama's administration agreed. Some positions on the NSC staff were filled by inexperienced staffers.<sup>102</sup> The same thing happened when Barack Obama took office in 2009.

He eliminated the White House Health and Security Office that worked on international health issues,<sup>103</sup> and what followed after was the 2009 Swine flu pandemic. A pattern emerges that displays sabotage to impair response to planned events. Guttings by new administrations, regardless if coincidental, deliberate, needed or not, further the political divide. The left says they left a playbook; the right says it needed to streamline. The intent is to polarize the parties and loyalists under the guise of change and unity while dividing and accomplishing the strategic goals set forth at the highest levels. There is no left or right but a committee that steers, pushing and pulling in each direction to maintain forward progress. The chaos generated facilitates the perfect conditions for the U.S. and allows it flexibility because the U.S. thrives and operates best under those conditions.<sup>104</sup> In a litigious society with centuries of case law, it's necessary to remove the constitutional rights and freedoms afforded to U.S. citizens and operate in legal grey areas that a national emergency provides.<sup>105</sup> Jumping from event (deliberately botched withdrawal from Afghanistan) to event (vaccine mandate, George Floyd trial, Kyle Rittenhouse trial, Ghislaine Maxwell trial, Waukesha Christmas Parade attack) during the national emergency (COVID-19 pandemic) refocuses attention and blames the next administration. Distractions keep the ball rolling. Before long, the truth is buried under the mountain of time and forgotten, but the surveillance tools and laws enacted remain in place as systems of control. The planned event facilitates change as intended at the cost of innocent lives, privacy, and freedom with little to no legal ramifications, and life goes on.

Rear Admiral Timothy Ziemer's resignation and sudden departure, under pressure from John Bolton, display the strategic sabotage.<sup>106</sup> Ziemer's effective approach to curbing malaria deaths worldwide, dubbing him the title as "*one of the most quietly effective leaders in public health*,"<sup>107</sup> would've hampered the goal of depopulation. Because an anti-malarial drug was touted as a means to combat the coronavirus with scientific studies to back up the claim; Africa demonstrated why effective management of malaria on a continent with limited resources and fewer than 6% vaccinated individuals, was one of the least affected regions in the world, averting a COVID-19 disaster—and puzzled scientists who couldn't connect the dots.<sup>108</sup> The removal of Ziemer, along with Tom Bossert, a champion of investment in global health security, eased the obstacles that stood in the way.<sup>109</sup> Furthermore, as a high-ranking military member with decades of experience, it's a certainty Ziemer was aware of the coming pandemic because Dr. Fauci openly warned of a "surprise" outbreak one year prior. If a celebrity doctor knows it's coming, a Rear Admiral should as well. Since DARPA funded Moderna's mRNA vaccine development, the NIH claimed joint ownership,<sup>110, 111</sup> and the Pentagon aided with vaccine distribution,<sup>112</sup> it would be incorrect to state some military commands and components weren't aware despite compartmentalization. Ziemer would've been given a heads-up because of his rank. DARPA's funding of Moderna overlaps with the Next-Generation Non-Surgical Neurotechnology (N<sup>3</sup>) program that aims to develop a high-resolution neural interface and will be discussed in the Precursor to Transhumanism and then to Posthumanism section, explaining why the perfect opportunity (COVID-19 pandemic) to inject and experiment presented itself, and why the military isn't stepping in and coming to the rescue (they're in on it).

Budget cuts to the CDC that scaled back and discontinued work to prevent infectious disease epidemics and other health threats in 39 of the 49 foreign countries it was working in,<sup>113</sup> and vacancies in approximately 700 positions,<sup>114</sup> reiterate the strategic sabotage as part of an effort to eliminate “human garbage” in those countries. If the CDC was there, any aid rendered may have saved lives, jeopardizing U.S. interests and national security in those regions since population growth poses a strategic threat. Destabilization, following the pandemic, would waste the country’s resources instead of the U.S.’s, allowing the perfect opportunity to intervene and offer aid at the right time, garnering support and favors in return.

Lastly, the claim that Trump owned a direct stake in Sanofi was incorrect. He owned mutual funds in various trusts and index funds that amounted to a small stake.<sup>115</sup> That small stake equated to approximately \$45,000, not enough to be labeled as a sellout or a profitable margin by someone in his position. Nonetheless, it’s a certainty Trump knew of the coming pandemic because of all the things mentioned prior.

Presidents are often used as scapegoats by the real controllers. While a considerable amount of evidence points to Trump being blamed for everything with evidence contrary to those accusations, supporting evidence exists that shows Trump played a role in a high-level master plan that unfolded. Trump’s advocacy for the administration and use of an ineffective vaccine he deemed as safe after his presidential term, with considerable evidence contrary to the fact, puts into question his true intentions.<sup>116</sup>

Trump lied for various reasons: to protect himself, to protect the economy, and to protect the country. Downplaying the dangers of the virus in the early months of the pandemic was due to the threat and damage it would’ve caused to America’s economy as a result of the

panic it would've generated, not death.<sup>117</sup> Without an economy, a country is dead. Decoupling from China had to be done with as little economic damage to the U.S. as possible because of the level of integration. Furthermore, the survival rate of the virus was very high, greater than 99%, unless an individual had underlying health issues. The impact of the virus on individuals with comorbidity had to be left unchecked to purge the planet of weakness and strengthen the gene pool instead of condemning future generations by allowing obesity and poor hygiene to propagate and taint it. The majority of people who died had diabetes,<sup>118</sup> some form of a psychiatric disorder,<sup>119</sup> and were old: clear indicators of select targeting that would alleviate dependency and costs to prescription drugs, welfare, social security, Medicare, and Medicaid programs. And since predictive algorithms can provide future insight, a president's words and actions are of great importance to market, economic, military, and global stability. The President of the U.S. is one of the highest-ranking positions in the world, and is monitored and analyzed 24/7. To give the U.S. an advantage over foreign adversaries during a national emergency, he would have to say conflicting things for counterintelligence reasons. *"If he's predictable, he's defeatable,"* is what Hillary Clinton said about Mike Pence while trying to get rid of Trump via a Pence takeover.<sup>120</sup>

Trump's victory over Hillary Clinton prompted several things: one was a movement known as "QAnon," the result of an alleged government insider known as Q who posted anonymously at the same time Trump tweeted publicly, validating authenticity by deltas between timestamps of both messages that contained clues and cryptic information. The entire movement centered around a theory that Trump was secretly working to overthrow a cabal of Satanic worshipping, cannibalistic pedophiles engaged in ritualistic sacrifice and human trafficking. The theory, dismissed as an elaborate conspiracy with little to no evidence, had plenty of evidence through coded messages in social media and emails of prominent individuals to substantiate it, despite what mainstream sources said,<sup>121</sup> incriminating numerous politicians and celebrities, including James Alefantis, the owner of Comet Ping Pong, who, according to 4Chan, is a Rothschild using the fake name James Alefantis, the English adaptation of the French saying *J'aime le enfants* (I love children),<sup>122</sup> and is the son of the late Baroness Philippine Mathilde Camille de Rothschild (French).

French involvement and connections are profound, extending beyond assisting the Chinese in constructing the Wuhan Institute of Virology. The Rothschild family is spread across the world. Different houses compete for money and control.<sup>123</sup> The relationship between the British and Swiss/French branches has been in turmoil, and the rift became evident with the death of Benjamin de Rothschild.<sup>124</sup> Disagreements sometimes extend beyond words and legal action, spilling out into the streets in battles for house dominance in a Rothschild vs. Rothschild. Speculation as to why Benjamin died falls under human trafficking as part of a criminal probe that ensnared his bank,<sup>125</sup> with an unsubstantiated claim Trump ordered the hit. These battles are also seen in competition of defense contracts which exacerbate desperation amid a global pandemic because of the limitations on means of revenue.

The test of an M51 SLBM (submarine-launched ballistic missile) without a warhead was to validate the missile's performance under operational conditions.<sup>126</sup> While Bermuda was publicly stated to be the target, launch trajectory indicated the intended target was the U.S., Washington D.C to be exact, explaining why the deviation from the initial trajectory to a

target area north of Bermuda was hypothetical and unrealistic. The launch was a message and “friendly” warning by the French to stop poaching their contracts.

The warning came months before Australia scrapped its \$90 billion French submarine order in favor for the U.S. and U.K.'s. That's why the French were so angry.

The worldwide lockdown the pandemic prompted, labeled as a hoax and attempt to dethrone Trump, was praised by some as part of the plan to stem human trafficking. The possibility the military piggybacked off of the pandemic to initiate the “soft coup” is a certainty since they were aware. The purging of “the swamp” still had to be done. The behind-the-scenes war was legitimate, and the pandemic served as the perfect pretext to limit movement and disappear people. Talk shows were canceled,<sup>127</sup> and prominent individuals died under mysterious circumstances. But several problems arise when looking at it from an all-source perspective: control, benefactors, and strategic objectives. Despite the promises made, the rich got richer, innocent civilians lost their lives, and the destruction of the middle-class is still occurring—a Rothschild was killed, but one profited, and the pandemic ushered in global surveillance—most importantly: justice was denied.

Promises of bringing treasonous traitors guilty of collusion and selling out to foreign governments never happened. Executions at Guantanamo Bay were delusional fantasies. What happened was the reappropriation of wealth, as planned. Q was controlled opposition, another tool and system of control to polarize and divide the U.S. while identifying domestic terrorists in the process of appropriating blackmail to control politicians and elites, removing others while uncovering deficiencies and strengthening U.S. defenses along the way, usurping power from the people under the guise of giving it back. Q posts contained cryptic information as opposed to actual intelligence. Actual intelligence, methods and sources, can't and will never be shared to preserve operational integrity. Q hinted at known general things and electrified followers with breadcrumbs from internal investigations into corruption probes and misuses/abuse of power, stalling while baiting individuals with promises of executions, imprisonment, and change to satisfy the bloodlust. Staged photo ops bought time while people eagerly waited. But change never came. It never came because leverage is more important than murder. Compromising material or Kompromat is of great

importance. To remove a controlled individual from a position of power would be to sacrifice a queen for a pawn in chess with nothing in exchange.

This proof is a perfect illustration of control over politicians. The Q post came approximately seven months before the vote on Trump's first impeachment trial. And it was correct.

Many postulated Q was a General or Admiral; some said it was Trump, and one individual thought outside the box by speculating Q was a future-integrated quantum computer whose primary processor exists in an undefined, atemporal state.<sup>128</sup> Q is for quantum. Q is not human. Q extracts data from the future to provide the U.S. a strategic advantage in the present. While plausible because of technological progress, the conclusion presently is that

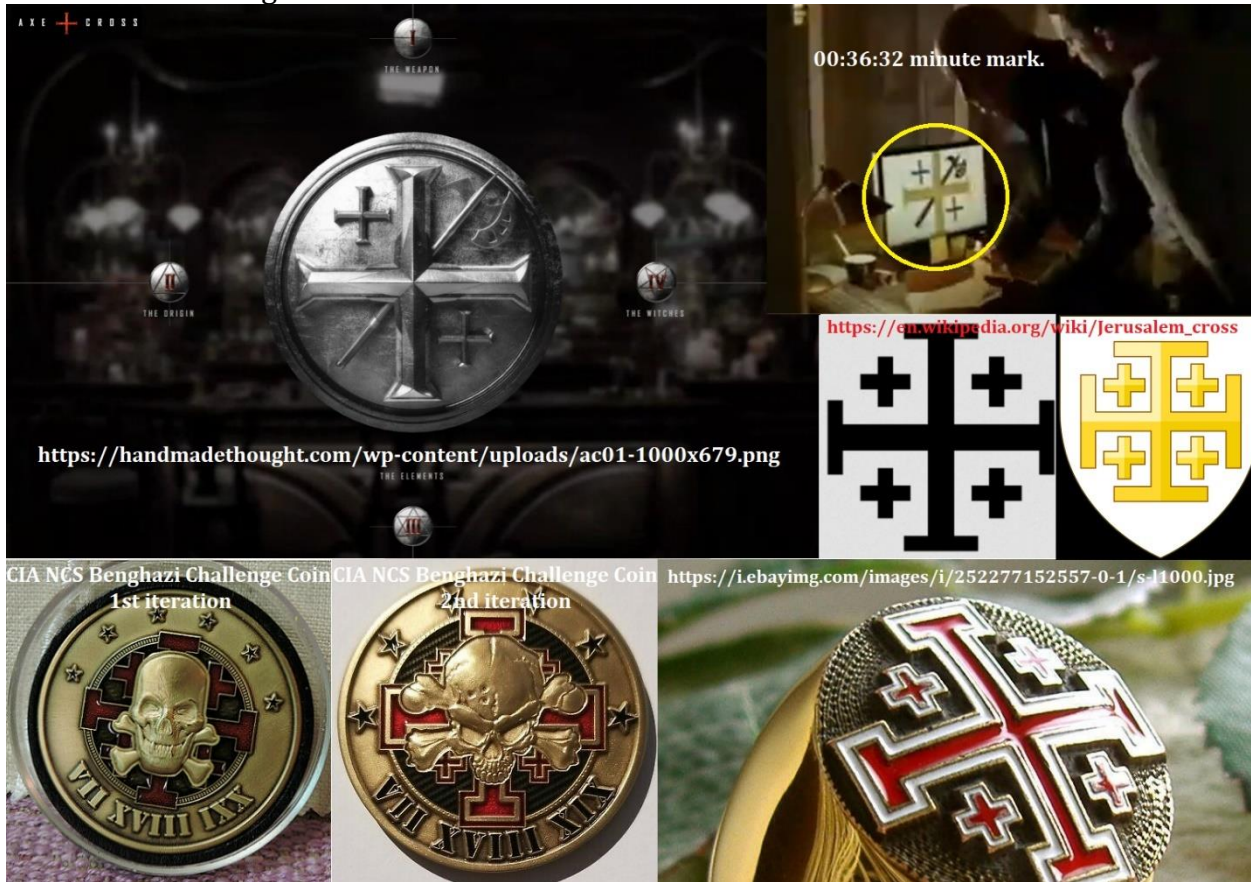

it was scripted reality. Senators were instructed which way to vote to give Q more credibility and control over followers. Q posts that correlate perfectly to news articles in the future can be described as a chronon, a clock tick to the precision relevant to the organization<sup>129</sup> releasing them as part of a multidimensional military communication system and readiness campaign (Q war clock).

Q bears hallmarks of British ingenuity since the British use designators that identify their chiefs by codename letters. The head of MI6 is officially designated as C but fictionalized as M in the James Bond films,<sup>130</sup> and Q is an abbreviation for quartermaster. There's also a security and counterintelligence directorate inside NSA known as the Q group that hunted Edward Snowden.<sup>131</sup> When the one world power system, comprising of the U.S. (military), the U.K. (finance), and Italy (religion) is threatened by Communist encroachment and outside influence, power is exerted to regain control. The sword is used to purge the house. To control the people and lessen bloodshed, hope is given (Q), anonymous individuals (anons) try to help, and the media labels it a movement (QAnon). Although Trump gave legitimacy to Q, evidence indicates it was a government ploy to control right-wing individuals. Everything went as planned. The word of a Jesuit means nothing to a non-Jesuit.

The Jesuits were exposed by Edmond Paris in his 1975 book *The Secret History of the Jesuits*, prompting a vow to destroy his life, his reputation, and his work. According to him, *"The Jesuits (Society of Jesus) are the spies and the assassination squad of the Catholic Church. People who believe this institution to be 'religious' or 'spiritual' are sadly deluded. It is and always has been political in every respect. It is a political front that operates to control people using many fictitious religious characters and ceremonies stolen from religions predating it from around the world. The separation of church and state mean nothing to the Catholic Church, which works relentlessly and ruthlessly for world domination by any means possible. This institution has been built on mass murder, torture, extortion, organized crime, lies and depriving humanity of true spirituality. It has controlled kings, queens, nobility, presidents, governments, and nearly anyone in power."* Eric Phelps's book *Vatican Assassins: Wounded in the House of My Friends, The Diabolical History of the Society of Jesus Including: Its Second Thirty Years' War [1914-1945], its Cold War [1945-1990], and Its Assassination of America's First Roman Catholic President, John Fitzgerald Kennedy [1963]* reiterates the goals of the Jesuits. *"The Jesuits secretly and relentlessly work toward two major goals for the Roman Catholic Institution: 1. 'Universal political power' and 2. 'A universal church in fulfillment of the prophecies of Revelation 6, 13, 17 and 18,'"*<sup>132</sup> the fulfillment of prophecies Archbishop Vigano warned President Donald Trump about in an open letter, cautioning him about the ramping up of "a global conspiracy against God and humanity," to mirror The Book of Revelation and subdue the world.<sup>133, 134</sup>

Edmond Paris tallied the Jesuit member count across the world at 33,000 in his 1975 release. The number has grown. But the Jesuits are part of the picture. Baroness Margaret Thatcher, the British stateswoman present at the Fairmont Convention, was one of the high-ranking members that attended Bilderberg meetings. So the Bilderberg's, while not a secret society, play a role. George W. Bush who was also present is a member of the Skull and Bones.<sup>135</sup> And the subliminal messages in *The Last Witch Hunter* allude to the Freemasons and Knights Templar, thus displaying a collective at play that's working together.

The logo of the order of Axe and Cross from *The Last Witch Hunter*.

The Jerusalem Cross

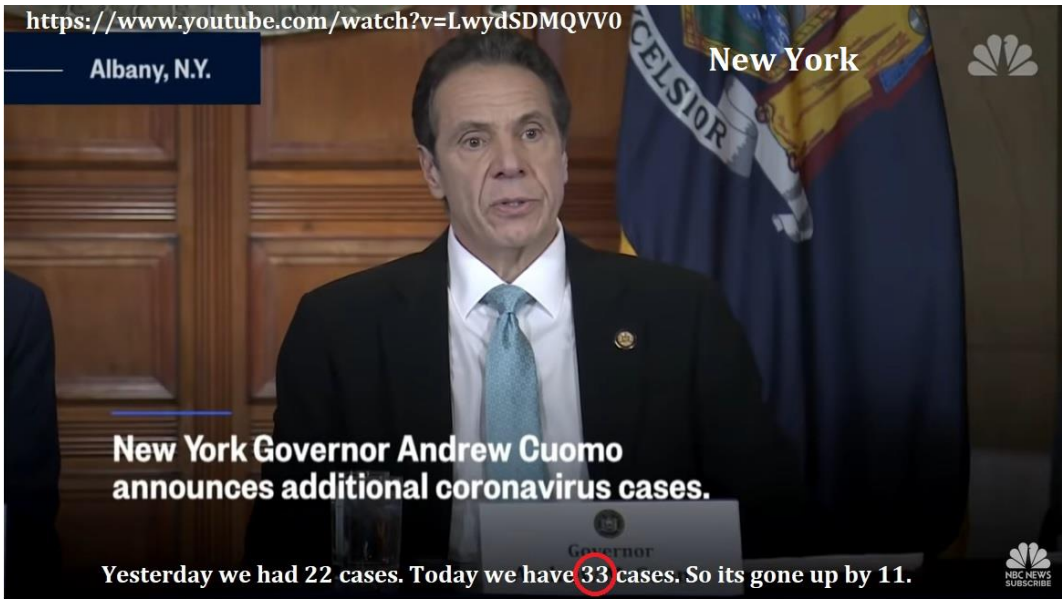

Freemasonry and Knights Templar imagery on official CIA challenge coins show the level of infiltration, thus implicating the agency through loosely connected breadcrumbs that will never hold up in a court of law. It also shows a level of influence and control that conflict with an intelligence agency's independent position. That level of influence and control indicates intelligence sources and products can be used for a custom-tailored narrative, effectively using a country's resources and military power for personal objectives and gain.<sup>136, 137</sup> That level of influence and control extends beyond the CIA to other intelligence services, foreign and domestic.

Secret society involvement is also evident in the numbers of the pandemic. The number 33, for example, a powerful and symbolic numeral that is strongly rooted in not only Freemasonry and the New Age and occult movements, but in religions across the world, was seen and said countless times, displaying the degree of planning and success that unfolded. The statistical probability of so many counties, states, and countries having exactly 33 total cases reported on, jumping to, by, and at different times is astronomical. It's not a coincidence. The number was singled out. Screenshots paint a partial picture. Not all news conferences are listed because of the amount.

Another example of prior knowledge is Tool's highly anticipated Fear Inoculum album which was recorded in 2018 but officially released on 08/30/2019.

## Fear Inoculum

### [Verse 1]

Immunity, long overdue  
Contagion, I exhale you  
Naive, I opened up to you  
Venom and mania  
Now, contagion, I exhale you

### [Interlude]

The deceiver says, he says  
"You belong to me  
You don't wanna breathe the light of the  
others  
Fear the light, fear the breath  
Fear the others for eternity"  
But I hear them now, inhale the clarity  
Hear the venom, the venom in  
What you say inoculated

Bless this immunity  
Bless this immunity  
Bless this immunity

### [Chorus]

Exhale, expel  
Recast my tale  
Weave my allegorical elegy

### [Verse 2]

Enumerate all that I'm to do  
Calculating steps away from you  
My own mitosis  
Growing through division from mania

### [Chorus]

Exhale, expel  
Recast my tale  
Weave my allegorical elegy

### [Bridge]

Forfeit all control  
You poison, you spectacle  
Exorcise the spectacle  
Exorcise the malady  
Exorcise the disparate  
Poison for eternity  
Purge me and evacuate  
The venom and the fear that binds me

### [Outro]

Your veil now, lift away  
I see you runnin'  
Deceiver chased away  
A long time comin'

- "Pneuma"  
Released: 2020

[https://en.wikipedia.org/wiki/Fear\\_Inoculum](https://en.wikipedia.org/wiki/Fear_Inoculum)

In previous versions of this analysis, the prior knowledge exhibited by Tool in their album was attributed to psychic abilities. Though that may still be the case, one newly uncovered thing is mentioned. Danny Carey's father was a Freemason.<sup>138</sup> Speculation has led some to believe that he and Maynard James Keenan, the band's singer, are ones as well, explaining how their album contained pandemic terminology in advance of the pandemic. Although the information on Tool's website stated Danny never pursued Freemason membership or aligned with any other school of religion, instead maintaining interests in occult studies, it's possible he joined since the information is outdated. In the picture below, Danny is seen wearing a Boston 33 jersey while performing at a concert. This particular video is of interest because of the number on the jersey and because the user who uploaded the video slowed the playing speed to 33.3 rpm (revolutions per minute) from 45. 45 and 33.3 are references to vinyl record formats, not video, since video speeds are expressed by frame rates (frames per second), and could signify coded language since Donald Trump was the 45<sup>th</sup> president at the time. Presently, information is lacking to come to an accurate conclusion on the meaning of the numbers and if a hidden message was implied by the uploader.

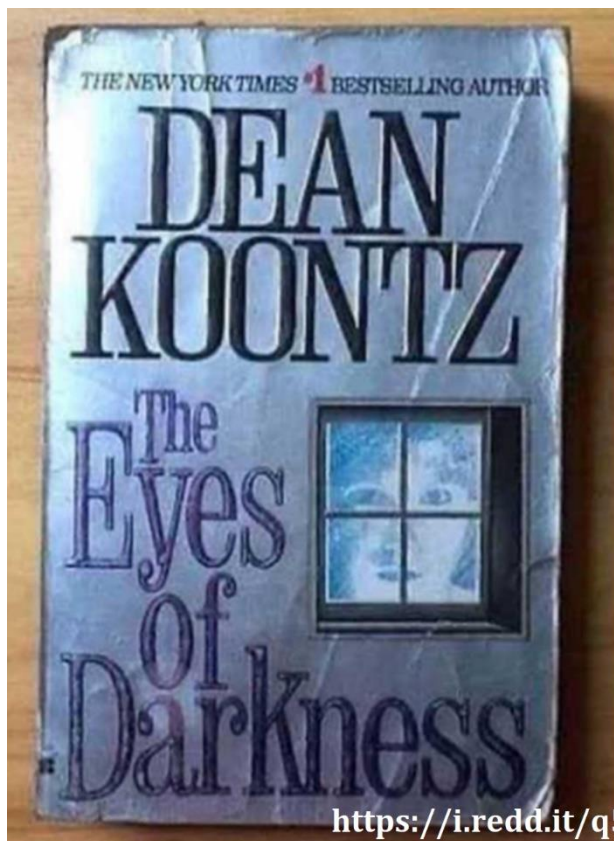

Danny Carey - 'Pneuma' by Tool - Live - 45rpm slowed to 33.3rpm (135% slower)

But sometimes, prior knowledge doesn't carry sinister intent. A perfect example is author Dean Koontz, who in his book, *The Eyes of Darkness*, foreshadowed the event 40 years ago, and with remarkable precision.

~~SECRET~~

**demonstrate an ability for relaxation and dissociation. In fact, they demand openness to new and unusual experiences and have a tolerance for the unrealistic. People with PSI potential show high confidence levels and usually have success early in life. They have high expectations with regard to success and are, in general, high achievers. A link between PSI experiences and creative ability was found in people like Mark Twain and Robert Browning.**

Reuters fact-checked that also, providing a verdict of partly false, indicating Dean Koontz wrote about a fictional virus called "Wuhan-400," but its symptoms didn't match the ones of COVID-19.<sup>139</sup> Raw data from psychic experiences alludes to things at broad levels without diving deep into granularity. The location of the virus's release, a defector from China, the year, and various other things were what Dean pulled out. But the fictional aspect of his novel required him to make some things up to fill in the blanks. That's why it differs from the actual outbreak. And because it was written at the height of the Cold War when Russia was the enemy, that's why earlier editions have Gorki-400 instead of Wuhan-400, to help with sales.

Problems with fact-checking arise when not enough research is conducted or there are conflicts of interest. Richard currently resides in the U.K. where his wealth and power could be used to change or skew the narrative.

There are many examples of prior knowledge by other gifted individuals dating back years. That's why some authors, songwriters, artists, and people in Hollywood, who have and exhibit that creative ability, can foresee what's coming down the pipeline before anybody else. They give clues and warnings as a heads up to unsuspecting individuals to draw attention to the topic. But the psychic element is just one part. Actual research and soft disclosures by Hollywood are the other. They are an effective and useful tool for briefing the public on the current level of technology and progress that has been made behind the scenes, though not everyone will read between the lines and believe what they're seeing. Now and then, the information provided in movie magic is viewed as a conspiracy when the intent is benign. Not everyone is on it, and not everything is a grand conspiracy, even though there are some grand conspiracies. Insiders that know of the true nature and intent of real-world plots that movies are made about, often leave clues for the audience to piece it together.

The Wuhan Institute of Virology's completion at the end of 2014 marked the dawn of a new era, an era that would allow the Chinese to officially work with high-class pathogens. The lab was constructed under a cooperation agreement with the French, allowing them to have a presence, but the Chinese betrayed them when the institute was finished and didn't allow them to set foot inside.<sup>140</sup> The BSL-4 facility, however, wasn't cleared to work with high-class pathogens until 2017 and was accredited by the Chinese themselves. After the self-accreditation came numerous warnings and reports from U.S. researchers, health experts, and diplomats, indicating deficiencies in the quality of material that was used to construct the lab, lax safety standards, and protocols, as well as a lack of appropriately trained personnel that were needed to operate the equipment. But as years progressed, research and theft of research continued, in addition to unethical and classified experiments, building templates (RaTG13) for and creating chimeric viruses. That's the other reason why warnings were issued and pandemic exercises conducted. Leaders were aware of what the Chinese were doing.

The extent of the research at the Wuhan Institute of Virology, and other labs in China, varied and is unknown publicly. Funding requests by the Chinese to DARPA through an intermediary sought money for studying skin-penetrating nanoparticles with chimeric spikes as part of an effort to inoculate bats, raising concerns about whether a coronavirus would need to be inhaled for infection to take root in humans because of the potential for dual-purpose research.<sup>141</sup>

PM SUMMARY SHEET  
SOURCE SELECTION SENSITIVE

Solicitation Number: HR001118S0017  
Solicitation Title: PREventing EMerging Pathogenic Threats (PREEMPT)  
PM Name: James Gimlett  
Proposer: EcoHealth Alliance  
Proposal Title: Project DEFUSE: Defusing the Threat of Bat-borne Coronaviruses  
Proposal Identifier: HR001118S0017-PREEMPT-FP-019

I have reviewed the attached proposal and Evaluation Reports and find that this proposal is selectable based on the evaluation criteria included in the BAA. However, I am not recommending funding at this time based on the rationale provided below.

Funding Requested (by proposer):

Phase I	Phase II	Total
\$8,411,546	\$5,797,699	\$14,209,245

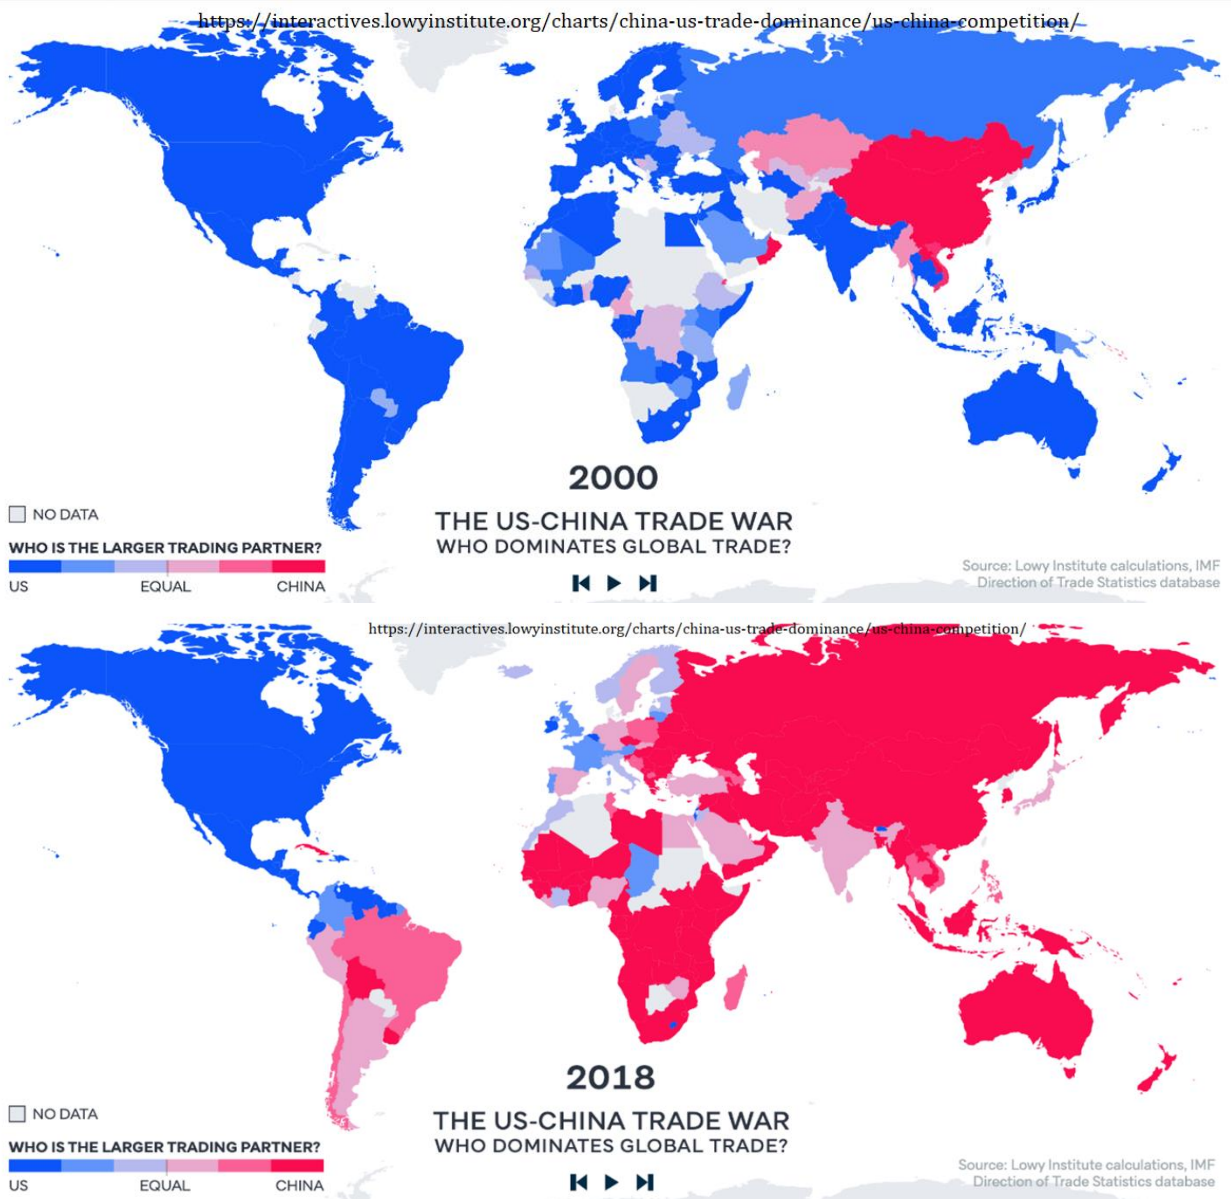

This proposal aims to identify and model spillover risk of novel, pandemic-potential SARS-related coronaviruses (SARSr-CoVs) in Asia, focusing specifically on known hotspot bat caves in China. In prior work under USAID Predict, the team identified high risk of SARSr-CoVs in specific caves in Asia. The project has a good running start since the hotspot caves already test positive, with high prevalence, for several SARSr viruses so the team won't be looking for needles in haystacks. The team will build on past surveillance work as well as some impressive work in developing geo-based risk maps of zoonotic hotspots based on past spillovers and ecological data. Two approaches are proposed to preempt zoonotic spillover through reduction of viral shedding in the bat caves: 1) innate immune boosting to downregulate viral regulation; 2) targeted immune boosting via vaccine inoculations using chimeric polyvalent recombinant spike proteins to protect against specific high risk viruses.

Two of three reviewers marked this proposal as Selectable. Key strengths are the experienced team and the selected coronavirus hotspot caves that show high prevalence for novel bat coronaviruses. Experimental in vivo and in vitro work is logically thought out and will be used to validate molecular and evolutionary models. Proposed preemption approaches, while somewhat conventional, have the advantage of a fast timeline for validation on bat or "batenized" mouse models. Multiple vaccine delivery mechanisms are proposed, including aerosolized spray, transdermal nanoparticle application, and edible adhesive gels. However, several weaknesses to the proposal were also noted. These include a lack of detail regarding data, statistical analyses and model development and how prior work will be leveraged and extended. Proposal also lacks clear decision points to assess the deployment and validation of TA2 preemption methods in the

The war for global supremacy between the U.S. and China, and the rise of China in its quest for dominance of global trade, are evident in the pictures below.

China's intellectual property theft and unfair trade practices, which aided its growth during those years, were the primary reason a trade war between the U.S. and China was started, putting China's plans on hold and economic status at risk. Its economy, a bloodline that delivers vital nourishment for the nation, feels the pressure. As the trade war intensifies, leading up to the virus's release, rhetoric between both nations heats up, tariffs are implemented against Chinese products, and sanctions are imposed on CCP members as a means of getting the Chinese to concede and agree to a new deal. Chinese executives are arrested and indicted, in addition to Chinese spies both domestically and abroad. The trade war remained as nonviolent as it could.

**Author's Comment:** At the current push and rate of globalization; Communist acquisitions,<sup>142</sup> investments, and takeovers in private institutions and education centers which are ignored and covered for by the people at the highest echelons, allowing for Chinese propaganda to be pushed,<sup>143, 144</sup> coupled with feigned ignorance by intelligence agencies that amounts to nothing less than willful negligence, and because the economic and political benefits of a partnership with China outweigh the national security risks to some countries who will overlook the atrocities committed by the regime for its cheap slave labor and sell themselves out: most will continue to do business with China, despite China's betrayals,<sup>145</sup> allowing it to overtake their countries in return.<sup>146</sup> By the 2030s, China will achieve its goal of global dominance via the massive international investments<sup>147</sup> it has made that will pay off and condition the next generation of youth to perceive the CCP in a positive light, ignoring the lessons of history and allowing China to overtake the U.S. as the next superpower.<sup>148</sup>

When Dr. Xiangguo Qui, a Canadian government scientist working at the NML in Winnipeg, Canada, garnered attention for improperly sending biological samples to China on 03/31/2019, the trade war turned hot. The matter was referred to the Royal Canadian Mountain Police (RCMP) for investigation, resulting in her removal from the lab on 07/05/2019, and revocation of her security access, along with her husband's Dr. Keding Chan, who specialized in coronaviruses. The "policy breach" referenced in news articles by CBC was espionage.<sup>149</sup> Dr. Qui was a participant in China's TTP and was traced back to China's biowarfare program. One Canadian government employee was quoted saying, "It's not right that she's a Canadian government employee providing details of top-secret work and know-how to set up a high-containment lab for a foreign nation." That statement, coupled with what the U.S. diplomatic team saw during their visits to the Wuhan Institute of Virology in 2018, are clear indicators of incompetence, gross negligence, and deficiencies in safety and security protocols.

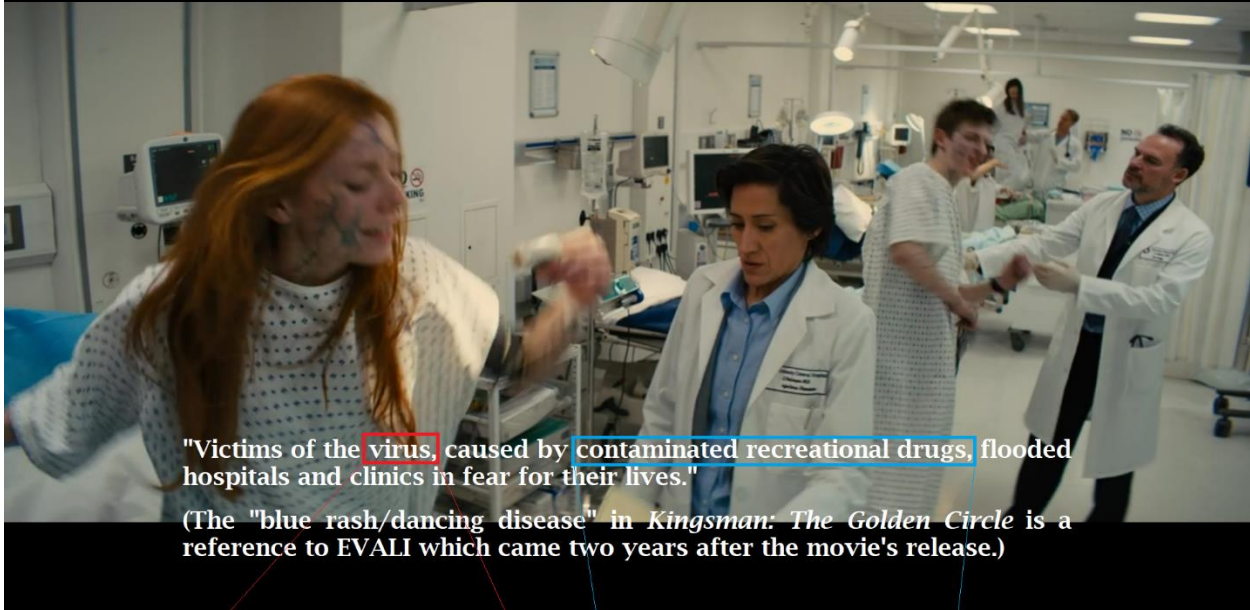

The GreatGameIndia, a Journal on Geopolitics and International Relations, broke the entire story, indicating, "In 2012 when a previously unknown coronavirus was isolated from the

*sputum of a 60-year-old man who died in Saudi Arabia,<sup>150</sup> the Erasmus Medical Centre in Rotterdam, Netherlands, was the first lab that received a sample,<sup>151</sup> and then sent a sample to the Canadians at the NML.<sup>152</sup> If UNC sent samples of the SARS-like chimeric virus it created to Fort Detrick and the NML as part of a security agreement on studying coronaviruses for the advancement of scientific research, then the NML was undoubtedly the point of theft of those viruses, likely even before Dr. Qui made headlines. The reason Canada was targeted for espionage by the Chinese was made clear by Richard Fadden, a former director of CSIS (Canadian Security Intelligence Service), who said, "We don't worry as much about national security as does the United States. So I think, from that perspective, we're viewed as an easier target."<sup>153</sup> Canada's laidback mentality when it comes to national security, and allowance of the buildup of tens of thousands of Chinese troops on Canadian soil, puts into question the allegiance and status of a long and crucial ally.*

Less than a month after Dr. Qui made headlines, for the first time, a mysterious vaping illness hit adolescents in the U.S., sharing similarities to symptoms of COVID-19 in lab results and radiologic findings according to a medical case report published by SAGE journals,<sup>154</sup> and was the initial starting point of this pandemic, pushing the onset back to early Q2 of 2019, but likely just before that. NBC News highlighted a Stanford study: teen vapers were 5-7 times more likely to get COVID-19 than non-e-cigarette users.<sup>155, 156</sup> That's not because they were smokers, but because of what they were smoking. THC (tetrahydrocannabinol), CBD (cannabidiol), and dabs from cartridges laced with a bioweapon. That implies that the coronavirus, or another type of virus, was sent to the U.S. in those cartridges from China because viral loads in aerosolized form from a vaper or e-cigarette would be in the highest concentrations right at the point of inhalation, ensuring an infection via a mass dose administered at first breath which would germinate inside the lungs and lead to an infection, furthering propagation to unsuspecting individuals around via cough and beginning a pandemic.<sup>157</sup> China's crackdowns on and problems with cannabis users, both domestic and abroad, have been well documented.<sup>158-160</sup> Vitamin E acetate, the culprit blamed for EVALI, wasn't the only ingredient that caused bilateral ground-glass opacities in victims' chests. A study in *The Lancet* corroborates that presumption, asserting, "*Radiological diagnosis of EVALI has a large overlap in its radiological features with other disease processes, particularly viral lung infections.*"<sup>161</sup> Haphazard quality controls, unsafe ingredients, and nicotine levels higher than what was on the packaging were some of the things noted on products that came from China.<sup>162</sup> A published and peer-reviewed editorial by Dr. Willard C. Harrill contributes to the piling evidence, stating, "*The EVALI epidemic nearly mirrors that of current COVID-19 pandemic reported cases, thus matching regional social behavior risk with current regional pandemic risk.*"<sup>163</sup> Furthermore, in *Kingsman: The Golden Circle*, the blue rash/dancing disease, caused by contamination of recreational drugs by a virus, was a hint and reference to EVALI but differed in name and symptoms. People that were infected danced. EVALI confined them to bed. That's called memeing the future. The opposite happened. But references to contamination of recreational drugs by a virus that then occurred two years after the movie's release are of importance, serving as another piece of evidence and demonstrating advanced knowledge. The association between the cause of illness in the movie and EVALI in real-life, in the image below, helps substantiate a virus as the culprit.

*Kingsman: The Golden Circle*  
01:17:19 minute mark.

"Victims of the virus, caused by contaminated recreational drugs, flooded hospitals and clinics in fear for their lives."

(The "blue rash/dancing disease" in *Kingsman: The Golden Circle* is a reference to EVALI which came two years after the movie's release.)

**Leo Bear-McGuinness**  
Science Writer & Editor

E-cigarette or vaping-associated lung injury (EVALI) cases were significantly less common in US states with access to legal recreational cannabis, according to a new study published in *Addiction*.

Conversely, the study found that states without a legal recreational marijuana market were more likely to have more EVALI cases per capita.

The EVALI outbreak emerged around last August and has been strongly linked to vitamin E acetate, a cutting agent commonly found in illicit cannabis vape products.

The study's findings thus add to the growing weight of evidence that the illicit cannabis vape cartridge market – not its legal, regulated counterpart – was the prime source of the vaping-related disease

<https://www.analyticalcannabis.com/news/majority-of-cannabis-legal-states-had-fewer-evali-cases-study-finds-312623>

Since most of the world's e-cigarette manufacturers (90%)<sup>164</sup> are located in China,<sup>165</sup> and because the majority of black-market drugs originate from there as a means of revenue,<sup>166</sup> a very high degree of confidence is asserted, beyond a reasonable doubt, that Beijing instigated unrestricted warfare<sup>167</sup> against the U.S. civilian population to try and covertly win the trade war, tank the U.S. and the world economy in the process<sup>168, 169</sup> to start a purchase spree of corporations at cheaper prices after they devalue and file for bankruptcy at the behest of elites at the top,<sup>170-172</sup> gain access to intellectual property via those purchases, enroot China

deeper in the world through acquisitions and medical aid,<sup>173</sup> divide, collapse and defeat America through the disharmonious nature and internal conflict of all 50 states, and get rid of President Donald Trump through the use of a mail-in voting system that is susceptible to massive voter fraud.

UNCLASSIFIED

DIRECTOR OF NATIONAL INTELLIGENCE  
WASHINGTON, DC

SUBJECT: Views on Intelligence Community Election Security Analysis

REFERENCE: Intelligence Community Assessment: Foreign Threats to the 2020 U.S. Elections

From my unique vantage point as the individual who consumes all of the U.S. government's most sensitive intelligence on the People's Republic of China, I do not believe the majority view expressed by Intelligence Community (IC) analysts fully and accurately reflects the scope of the Chinese government's efforts to influence the 2020 U.S. federal elections.

The IC's Analytic Ombudsman issued a report, which I will reference several times below, that includes concerning revelations about the politicization of China election influence reporting and of undue pressure being brought to bear on analysts who offered an alternative view based on the intelligence. The Ombudsman's report, which is being transmitted to Congress concurrently with this Intelligence Community Assessment (ICA), also delves into a wider range of election security intelligence issues that I will not focus on here. However, the specific issues outlined below with regard to China reporting are illustrative of broader concerns. It is important for all IC leaders to foster a culture within the Community that encourages dissenting views that are supported by the intelligence. Therefore, I believe it is incumbent upon me in my role as the Director of National Intelligence to lead by example and offer my analytic assessment, alongside the majority and minority views. This letter was prepared in consultation with the Ombudsman to ensure that I am accurately articulating his findings and presenting them in their proper context.

The majority view expressed in this ICA with regard to China's actions to influence the election fall short of the mark for several specific reasons.

Analytic Standard B requires the IC to maintain "independence of political considerations." This is particularly important during times when the country is, as the Ombudsman wrote, "in a hyper partisan state." However, the Ombudsman found that:

"China analysts were hesitant to assess Chinese actions as undue influence or interference. These analysts appeared reluctant to have their analysis on China brought forward because they tend to disagree with the administration's policies, saying in effect, I don't want our intelligence used to support those policies. This behavior would constitute a violation of Analytic Standard B: Independence of Political Considerations (IRTPA Section 1019)."

Furthermore, alternative viewpoints on China's election influence efforts have not been appropriately tolerated, much less encouraged. In fact, the Ombudsman found that:

UNCLASSIFIED

UNCLASSIFIED

SUBJECT: Views on Intelligence Community Election Security Analysis

“There were strong efforts to suppress analysis of alternatives (AOA) in the August [National Intelligence Council Assessment on foreign election influence], and associated IC products, which is a violation of Tradecraft Standard 4 and IRTPA Section 1017. National Intelligence Council (NIC) officials reported that Central Intelligence Agency (CIA) officials rejected NIC coordination comments and tried to downplay alternative analyses in their own production during the drafting of the NICA.”

Additionally, the Ombudsman found that CIA Management took actions “pressuring [analysts] to withdraw their support” from the alternative viewpoint on China “in an attempt to suppress it. This was seen by National Intelligence Officers (NIO) as politicization,” and I agree. For example, this ICA gives the false impression that the NIO Cyber is the only analyst who holds the minority view on China. He is not, a fact that the Ombudsman found during his research and interviews with stakeholders. Placing the NIO Cyber on a metaphorical island by attaching his name alone to the minority view is a testament to both his courage and to the effectiveness of the institutional pressures that have been brought to bear on others who agree with him.

Intelligence Reform and Terrorism Prevention Act (IRTPA) Analytic Standard D requires that coordinated analytic products be “based on all available sources of intelligence.” However, because of the highly compartmented nature of some of the relevant intelligence, some analysts’ judgements reflected in the majority view are not based on the full body of reporting. Therefore the majority view falls short of IRTPA Analytic Standard D.

Tradecraft Standard 1 requires the analytic community to be consistent in the definitions applied to certain terminology, and to ensure that the definitions are properly explained. Having consumed election influence intelligence across various analytic communities, it is clear to me that different groups of analysts who focus on election threats from different countries are using different terminology to communicate the same malign actions. Specifically, definitional use of the terms “influence” and “interference” are different between the China and Russia analytic communities. The Analytic Ombudsman found that:

“Terms were applied inconsistently across the analytic community... Given analytic differences in the way Russia and China analysts examined their targets, China analysts appeared hesitant to assess Chinese actions as undue influence or interference.”

As a result, similar actions by Russia and China are assessed and communicated to policymakers differently, potentially leading to the false impression that Russia sought to influence the election but China did not. This is inconsistent with Tradecraft Standard 1.

In the Ombudsman’s report, he accurately acknowledged my commitment “to provide an independent avenue for analysts to pursue unbiased analysis.” My approach here is not without precedent. In 1962, a National Intelligence Estimate stated that the Soviet Union was unlikely to place missiles in Cuba. Then-CIA Director John McCone forcefully disagreed with the analysts,

UNCLASSIFIED

SUBJECT: Views on Intelligence Community Election Security Analysis

and later ordered the U-2 reconnaissance flights that discovered that missiles had in fact been deployed.

In that same spirit, I am adding my voice in support of the stated minority view -- based on all available sources of intelligence, with definitions consistently applied, and reached independent of political considerations or undue pressure -- that the People's Republic of China sought to influence the 2020 U.S. federal elections, and raising the need for the Intelligence Community to address the underlying issues with China reporting outlined above.

  
\_\_\_\_\_  
John Ratcliffe

January 7, 2021  
\_\_\_\_\_  
Date

The initial release from China is deduced based on an overwhelming amount of evidence and a culmination of events, both current and historical, that include but are not limited to:

1. An active and covert offensive biowarfare program spanning back decades.
2. An escape from a germ factory in 1999, leading to an epidemic.
3. Two previous escapes of the SARS virus in 2002 and 2004, leading to an epidemic.
4. Substandard material used in construction of the Wuhan Institute of Virology.
5. Self-accreditation of the Wuhan Institute of Virology.
6. Warnings issued by U.S. researchers and U.S. diplomats that a virus can escape from the Wuhan Institute of Virology, and a lack of appropriately trained personnel to maintain the equipment.
7. Statements from Russian virologists about the unethical things occurring at the Wuhan Institute of Virology.
8. Lax and deficient safety protocols, and handling techniques of biohazardous material in various labs throughout China.
9. Improper handling of biological materials and research abroad.
  - a. Failure to properly claim and notify U.S. Customs of biological imports.
  - b. Failure to properly sanitize biological material containers.
  - c. Substandard containers for carrying and smuggling biological materials into and out of the U.S.
  - d. Theft of biological materials.
10. Gross human rights violations over the last several decades.
11. Protests in Hong Kong that threatened the stability of mainland China, a problem that vanished with the virus's release.
12. Hints from China's state-affiliated media that COVID-19 was a tool to beat populism.
13. A retaliatory counterstrike by the U.S. in China.
14. Japan and Australia's formation of a defense pact to counter China.<sup>174</sup>

The incidents that occurred at UNC and Fort Deitrick, with all those highly trained personnel, clearly show that mishaps in BSL-3 and BSL-4 facilities still happen in America. Even a superpower isn't immune from having accidents and deviating from standard operating procedures. A lack of robust protocols and strict enforcement that unequivocally ensures no infections and escapes that condemn the entire population are what's alarming. Because of that, it's accepted as fact that many more incidents occurred in China where such training and safety protocols weren't up to U.S. standards. Because of censorship and the strict flow of information from the Communist bloc, it's also assured that many of those incidents went unnoted and were intentionally buried, leading to countless undocumented outbreaks and partially explains the plethora of other coronavirus clades that are in circulation in Asia.

The culpable individual, and exact location in China responsible for the release of the virus, are still unknown, because the Wuhan Institute of Virology, while the primary facility that has drawn so much attention, wasn't the only laboratory in China that was experimenting with the coronavirus, or conducting research on it. The Wuhan Institute of Biological Products, located 21.6 miles away from Wuhan Institute of Virology, and only 9 miles away from Huanan Seafood Market, and the Wuhan Center for Disease Control, which is less than 1,000 feet from the Huanan Seafood Market, were others. As a result, the exact point of origin may never be uncovered. Dr. Dany Shoham, an Israeli biowarfare expert, in a 2015 academic paper, asserted that more than 40 Chinese facilities are involved in bioweapon production.<sup>175</sup> Interestingly, the Shenzhen Jiusheng Biotechnology Products Plant, a facility listed by Dr. Shoham as affiliated with the defense establishment and poised for research, development, production, testing, and storage of bioweapons, is located in Shenzhen, China, where most of the world's e-cigarette manufacturers are also found; where a professor from the Southern University of Science and Technology claimed to have made the world's first genetically engineered babies that are immune to HIV using CRISPR/cas9 (a technique that can also be used to manipulate a virus, enhancing or reducing its strength and virulence accordingly); and where the proximity of protests in Hong Kong threatened the stability in mainland China: pieces of the puzzle that when looked at together, could explain the origins of EVALI. Dr. Shoham, who has studied Chinese biowarfare, said the Wuhan Institute of Virology is linked to Beijing's covert bioweapons program.<sup>176</sup> And while China has denied having any offensive bioweapons, a State Department report in August of 2019 revealed suspicions of covert biowarfare work.<sup>177</sup>

**Author's Comment.** Documents from the Securities and Exchange Commission in 2011 show the Soros Fund Management, LLC, invested heavily into WUXI Pharmatech Caymen, Inc., a company that provides validated research including in vitro (HTS, SAR screening support) and in vivo disease models in cardiovascular, respiratory, metabolic and infectious diseases, and is located in Wuhan.<sup>178</sup> Numerous articles claiming that Soros funded anti-Trump movements in 2016 and 2020 are also available online, with documentation that shows funding from the Open Society Foundation to said groups. Because of Soros's hatred for Donald Trump and close ties with other elites who have expressed both criticism and great distaste for the president, striving to get rid of him because of his policies and actions, utilization of China to achieve that goal would be optimal. If spies or loyalist insiders within labs in China working on the coronavirus followed orders to initially release a high pathogenicity strain to start the chain of events that culminated and led to a counterstrike,

pitting East vs. West, then removing Donald Trump and instigating a superpower and its rival to bring both countries to the brink of war to further the new world agenda, was done consciously and with calculation. Bruno Maçães, an author and former politician in Portugal, wrote an article in the National Review that was cited earlier, titled *China Wants to Use the Coronavirus to Take Over the World*, and said, “The pandemic set in motion a global competition to contain the virus, for which China and the CCP were uniquely prepared. . . Important countries could experience the kind of economic shock that leads to widespread social and political collapse. At that point, China would have a unique opportunity to step in, provide aid, and refashion these countries in its image. It would look like a repeat of the Marshall Plan and the beginning of the American world order after the ravages of World War II. Indonesia, South Asia, and even Russia might be of special interest in such a scenario. To put it more bluntly: There was always an argument that **the existing world order cannot change because only a momentous war has done that in the past and world wars have become impossible. But in pandemics — and soon in climate change — we may have found two functional equivalents of war.**” That also explains why climate change and new technologies, which are supposedly cleaner than fossil fuels but are unproven in longevity and resilience, are being pushed so hard.

Jennifer Zeng 曾铮

Admitted! Chen Ping, Senior Researcher at #FudanUniversity, professor at #PekingUniversity, says the #CCP won the trade war, science & technology war, and especially the biological war in 2020. "The achievement is unprecedented. This is an epoch-making historical record."

12:30 PM · May 18, 2021 · Twitter Web App

1,091 Retweets 318 Quote Tweets 1,293 Likes

Jennifer Zeng's tweet is misleading. She goes on to correct it in subsequent tweets. Chen Ping didn't admit that China released the virus. What he said in the original video, which is longer than the short clips that were released, is that the CCP won the trade war, the science and technology war, and the first people's biological war, clearly indicating what COVID-19 was. He goes on to mention that China contained the outbreak better than the U.S., touches upon Trump's failure to resecure a second term, an obsession that reiterates China's hate for the president, and then discusses the failures of the U.S. and U.K.'s neoliberalism policies and

modernization attempts in Europe while warning the liberal, American-worshipping cult in China to stop loving the U.S. But while Chen Ping's statements look incriminating and legally damning, they're Chinese propaganda. China's response to the coronavirus may have allowed it to overcome adversity and contain the viral outbreak better than the U.S. at the cost of civil rights and the personal freedoms of its citizens, but the extent of the damage can't be compared with the rest of the world because China isn't transparent. It has falsified the number of dead and its GDP growth. Furthermore, if China truly won the science and technology war, the quality of their materials and products, which are subpar when compared to the U.S.'s, in addition to the scope of their achievements that they have just attained: would've been attained and publicized decades ago, before the U.S. accomplished theirs. His statements are an attempt to bolster China and make it look strong but are drawing criticism and ire instead.

Dr. Kary Mullis's death, due to its timing and method, raises suspicions, and was the result of foul play, stemming from a successful assassination attempt via a bioweapon because he was an outspoken critic who went against the grain. And because the tools to diagnose SARS-CoV-2 lacked efficacy in correctly identifying it, allowing it to be overlooked as a normal disease while it masqueraded as something worse, no suspicions were cast when he died without the proper treatment. His expertise on PCR technology, which is widely used for COVID-19 tests, and opposing and controversial points of view were the factors that sealed his fate. Since the pandemic was planned, if Dr. Mullis stood to impede any efforts in his capacity, his death would remove all possible obstructions. Rapid antigen tests are cheap and can deliver results in 15 minutes, but both the CDC and FDA prefer to use PCR technology which is costly but more "reliable," requiring a couple of days for labs to render their findings.<sup>179</sup> But one hour after Joe Biden was sworn in, the WHO released a statement and admitted that "*PCR testing at high amplification rates alters the predictive value of the tests and results in a huge number of false positives,*" revealing PCR technology might be unreliable.<sup>180, 181</sup> That circles back to the sought-after body count that is needed to blow the pandemic out of proportion but shouldn't diminish or dismiss the seriousness of the coronavirus and the damage it has done. SARS-CoV-2 was in circulation much earlier than people were led to believe. Indeed, antibodies taken from individuals in Italy dating back to 09/03/2019 convey just that. Those specific antibodies, since coronaviruses account for 25% of common colds, were identified in 111 people from September of 2019 until February of 2020 in an Italian cancer study that predates the outbreak in Wuhan, with 23 of those cases in September of 2019 alone. A Fact Sheet released by the State Department mentions that the U.S. government believes several researchers from the Wuhan Institute of Virology became sick in the autumn of 2019 with symptoms consistent with COVID-19, predating the official timeline of the outbreak.<sup>182</sup>

Though a mysterious vaping illness in the U.S. is a biosecurity risk that must be assessed to determine cause and origin, prompting intelligence agencies to investigate, the number of subliminal messages laced in U.S. movies indicates the CIA was aware of this "pandemic" well in advance, being the primary agency that deals with and authorizes subliminal message use in movies and media. Likewise, because Richard Rothschild's patent traces back to the U.K., British intelligence's MI6 was also in the know, thus clearly displaying rogue elements within the DoD, CIA, MoD, and MI6 since the pandemic was planned and allowed to happen. The

reason why, which is more than to expose and bury China's offensive biowarfare program, will be discussed in the Global Depopulation Agenda section of this document.

Samples obtained through bloodwork and tissue for analysis to determine the cause and origin of EVALI would've had laboratories all over the world, including Vector, for example, working on a vaccine or experimenting with the clade and other bioweapons long before any public announcements were made. That explains why there was an accidental explosion due to scheduled remodeling. While the actual cause remains unknown and was labeled as an "accident," it's mentioned due to timing and because claims were made that it was the Russians that released it.

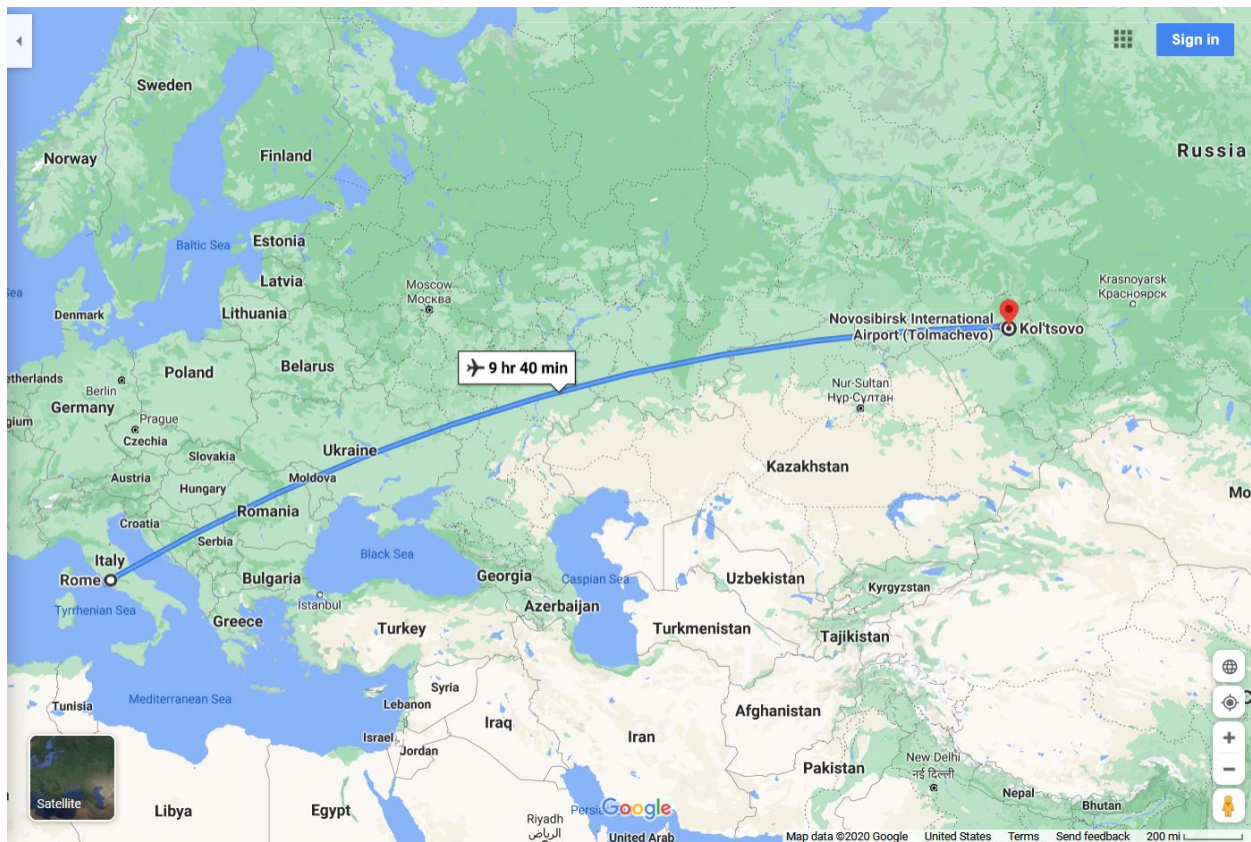

Image from Google Maps

Vector is more than 3,500 miles away from Italy. An explosion at the institute, which also shows the seriousness of mishaps at a Russian BSL-4 facility, could've propelled infectious airborne particulate to the extent that unsuspecting individuals would've been infected miles from the lab. But given no evidence of any major outbreaks after the fact, and the locale of the institute in the remote parts of Novosibirsk, diminish the possibility that Russia was somehow responsible.

Even though the Novosibirsk Tolmachevo International Airport is less than 15 miles from the Institute itself, any infection that may have occurred on the same day of the explosion would require the infected to instantly travel, or infect other travelers that are going to Italy,

to infect thousands of people quickly and allow for antibodies to manifest in the bloodwork of hundreds that were taken. The incubation period of SARS-CoV-2 indicates that people in Italy would have to have been exposed and infected in August of 2019. Coupling that with the EVALI occurring in the U.S. from the spring until the fall, and Dr. Kary Mullis's assassination confirms an early release theory. Without ignoring the explosion at Vector because of its significance; all open-source intelligence points to China as the origin. The reason Italy was such a hotspot was because of some 300,000 Chinese nationals that currently live there and the five million that visit it each year,<sup>183</sup> and to destabilize the country to weaken it for strategic, economic, and geopolitical reasons that will be explained later on.

The simulated drill that took place at the Wuhan Tianhe airport on 09/18/2019, exactly one month before the 7<sup>th</sup> CISM Military World Games, highlights two interesting events: a biological agent that was determined to be a coronavirus infection, of all the viruses that could've been chosen, and detection of severe radiation from a nuclear agent from a country that had a nuclear energy program and underwent a military coup a little over a year later, hinting at the geopolitical tensions and battles that had already begun.<sup>184, 185</sup>

【Sudden passenger discomfort? Excessive nuclear radiation detected in baggage? There they come!】 On the afternoon of September 18, the customs in Wuhan Tianhe Airport received a report from the airline that “a passenger on the inbound aircraft was unwell, having difficulty breathing, whose vital signs were unstable.” Immediately, the airport customs initiated a contingency plan and started transferring the passenger to the hospital. Two hours later, Wuhan Medical Center reported that the passenger had been clinically diagnosed as Coronavirus infection...The pictures below show the scene of emergency response drill held at ports of the airport, which simulated the whole process of responding to newly discovered infected case. The drill also simulated in the passenger lane a case where a passenger was found to carry “Myanmar ore” with severe radiation exceeding the limit. At the 30-day countdown to the Military Games, Wuhan Customs has made every effort to ensure the security of the ports and to safeguard the game. # Go along with the Military Games # # Wuhan Military Games # # The Military World Games 30 days ahead# (Hubei TV reporter Xiao Lingfeng, Correspondent Chen Liling Yuan Jian)

The release of a stealth and chimeric coronavirus marks a new chapter in unrestricted warfare, a chapter that involves the use of viral weaponry as a means of asymmetric and hybrid warfare. An offensive biowarfare program, which most countries secretly have, violates the BWC. Yet, the dual-purpose research is allowed to continue, effectively negating the treaties that were signed. Releases, whether deliberate or accidental, when they occur, constitute an act of aggression and war, requiring a retaliatory response. To allow such an action to go unchecked would display to the Chinese communists that America is weak. It would continue to allow their global expansion at great costs. It means they can get away with killing innocent Americans. An action that the U.S. can't allow. If it did, it would signal the end of the superpower. So a clear and more powerful demonstration is needed to officially blame the country for the catastrophe on the world stage and reveal that the CCP was covertly working on and had an offensive bioweapons program in violation and disregard of the treaties that it signed. Something just as powerful, nonnuclear, and maintains plausible deniability. A tit-for-tat is planned to exercise the right of self-defense. Since viruses can be synthesized in a matter of days,<sup>186</sup> the L clade is created. Once the virus is created, the venue of release is chosen: the 7<sup>th</sup> CISM Military World Games which will be hosted in the Hubei province, Wuhan, China. The stage is set for the retaliation.

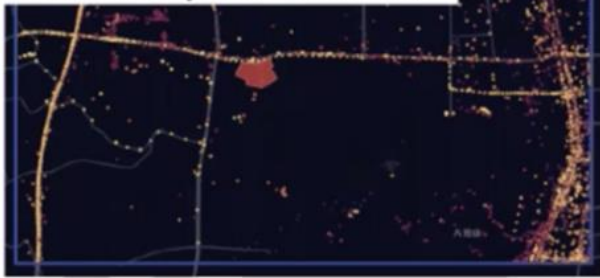

Event 201 is conducted in NYC on the same date as the opening ceremony of the games to simulate the number of deaths if the coronavirus originates in South America. The continent was likely chosen because of its bat populations and because simulating an outbreak in China, where the actual outbreak would occur, would be too obvious, drawing unneeded scrutiny and attention. The participants weren't simulating the S clade's arrival which had been in circulation for months before the event, but anticipating the L clade which was going to be released. The Event itself indicates that those who planned it had some form of prior knowledge and insight as to what was going on. The number of emerging leaders in the biosecurity fellowship at the John Hopkins Bloomberg School of Public Health, Center for Health Security, demonstrates a body of knowledge and a level of expertise that indicates why the Event was planned, alluding to how they knew in advance.<sup>187</sup>

The substantial decrease in cellphone activity at the Wuhan Institute of Virology, as presented in the MACE E-PAI COVID Analysis,<sup>188</sup> was in preparation for the 7<sup>th</sup> CISM Military World Games. Although the authors of that report suggested an early release occurred sometime in October: the early release occurred months before and likely from a different bioweapons facility that is linked to the Wuhan Institute of Virology.

## Device Analysis Indicates Traffic Closures or Roadblocks

Traffic from July 2019 - March 2020

- Device traffic in and around the WIV in the months prior to October was consistent.

Beginning on October 11th, there was a substantial decrease in activity.

- The last time a device is active prior to October 11th is October 6th.
- The window for incident at the WIV is October 6th - 11th.

Traffic from October 14 - 19 2020

As illustrated in the second image, there was absolutely no traffic in the area surrounding the WIV from October 14th - 19th.

During this time, it is believed that roadblocks were put in place to prevent traffic from coming near the facility.

**These events coincide with preparation for the 7th CISM Military World Games that were held in the province from October 18th, 2020 - October 27th, 2020.**

<https://assets.documentcloud.org/documents/6884792/MACE-E-PAI-COVID-19-ANALYSIS-Redacted.pdf>

## Activity within the WIV supports an event occurring between October 6-11

- Activity within the WIV compound.
- It is believed the bunching of points is a security building passed through before accessing the grounds.

- Between October 7th and 24th there was no activity within the WIV compound.

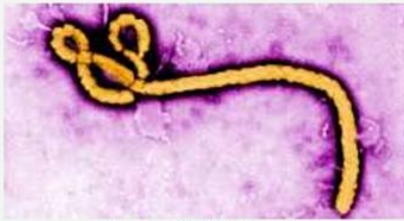

- On October 25th, one device returns to the WIV facility.
- This device is the only device to return to the facility that was present prior to October 7th.
- It is likely this device belongs to a security guard.

**An early release, which evidence does support, occurred months before.**

<https://assets.documentcloud.org/documents/6884792/MACE-E-PAI-COVID-19-ANALYSIS-Redacted.pdf>

Discussions on 4Chan's politically incorrect (/pol/), also confirm an early release.<sup>189</sup>

I work daily with some of the world's most infectious and fatal diseases. Reading internal reports and also stuff available on the internet (papers, new articles), I'm becoming extremely concerned we are massively unprepared for the next epidemic.

People imagine that any kind of epidemic that occurs today can be more or less mitigated through modern public health infrastructure, stocks of vaccines and antivirals, and basic quarantining measures.

The issue is that in modern, densely populated cities, a sufficiently advanced pathogen would be capable of infecting the vast majority of inhabitants in weeks, before any health measures could have an effect. The population density is enough that current quarantining techniques used in cases like smallpox would be completely ineffective. Antivirals have historically proven ineffective and hard to disseminate while our current vaccine stocks might not work at all.

Currently computer simulations indicate that a dangerous enough pathogen could effectively destroy a city like Los Angeles in a few months. "Destroyed" in the sense that emergency services are shut down, medical services are shut down, all economic output ceases and over 30-60% of the population is wiped out.

In short, a small nation-state or even well-funded terrorist organization could easily reduce the US to the state of a third world nation with. Yet no one except my colleagues seems to give a fuck.

Want to know more?

There has been a lot of work done with engineering viruses for specific functions such as gene therapy. The main problem and the reason a lot of this research is highly restricted is that many of the same techniques for engineering a virus to kill off all mosquitoes can be applied to almost any target, including hominids.

That and the risk of spillover. You might intend to wipe out mosquitoes, but you end up wiping out a whole class of insects causing complete ecological collapse.

Of course if you're a terrorist that probably sounds delightful. I'm obviously biased but I considered biological agents, especially viruses, to be the most dangerous thing in the world today, even moreso than nuclear weapons due to their relative affordability and ease of dispersal.

China is a major source of concern. Not only is the place a massive breeding ground for novel agents due to shitty agricultural practices, the proximity of humans to animals ensures that novel strains of influenza and other viruses will hop to humans and spread like wildfire.

It literally only takes one mutation of one virus to unleash a pandemic. Every infectious pig or bird is a little viral containment vessel that could birth the next plague.

Though I'd be surprised if China is actively doing large-scale tests on their population, it wouldn't surprise me. That said, China's biological weapons program is much much larger than the public or even experts in the field are aware of. They are almost certainly genetically engineering certain viruses (smallpox) to be vaccine immune, but they are probably also engineering them to be more lethal agents in general. We really don't know the full scale of China's biological weapons program but I would bet you wouldn't be able to sleep well if you knew its full scope.

>>230586536

Obligatory recommendation you don't do that, and instead come work for the CDC and other organizations working to fight these coming pandemics.

But theoretically, any well-stocked university lab with trained professionals would be capable of genetically modifying a virus to do all sorts of things.

The most difficult thing would be gaining access to some of the more virulent agent such as smallpox or ebola. Most of these are only available in incredibly well guarded facilities in just a few countries.

North Korea likely has a decently sized biological weapons program as well as a cache of some of the more deadly pathogens. A desperate worker there could theoretically smuggle out any number of terrible diseases and sell them on the black market for \$10-\$100k, which for a lot of terrorist organizations would be a pittance.

It's a little complicated. Publicly, we have ceased production of biological weapons. Privately, we already know how to make effective dispersal munitions, and the kind of viral engineering work we do for the purpose of good can just as easily be repurposed for evil. If the US military wanted it could quite easily engineer and disperse a literal apocalyptic plague for less money than it takes to build an F-35.

Hypothetically, if our government turned fully tyrannical and evil a-la Nazi Germany, we could have a very robust biological weapons program producing munitions within a year or so.

Here's a question - what sources of information should I track for early-warning signs of an epidemic? If I sequestered myself for weeks every time the next swine flu or batch of bad vape juice rolled around, I'd be inside half the year. Are there official CDC outlets, or sources of information which the CDC monitors to detect the various expected warning signs?

Interesting question. A couple years ago at a conference I mistakenly entered a small conference room with a presentation about the emergence of candida and its potential as a possible bioweapon. Fungi have unique properties in that they are incredibly resilient and good at spreading, so if you were to introduce a dangerous fungus into a major city it would be almost impossible to fully eradicate so you would end up having to abandon the city or else spend something like \$500 billion on cleanup. I couldn't figure out whether the presenters were cranks or geniuses but seeing the recent articles about candida it does make me wonder...

I saw a few internal documents that scared me pretty badly.

One was regarding what are called chimeraviruses and research work done in the Soviet Union and more recently in North Korea (hypothesized).

The simple idea of a chimera virus is you combine two viral agents into one, which as you can imagine would make it easy to create a virus with more than 95% mortality rate.

The scarier part is that a chimera virus can theoretically have multiple traits that make it far superior as a biological weapon, and the traits can present at different time periods. For example, Ebola is quite deadly, but it's actually pretty hard to spread due to needing direct blood contact.

So what would happen if you combined ebola with say, a common flu? With sufficiently advanced engineering, you could have an ebola that initially only presents as a standard flu for the first 1-2 weeks. People would continue to take flights, go to work etc thinking it was just a relatively harmless flu.

Then two weeks later you'd have massive "mysterious" outbreaks of Ebola all across the world. Millions of people would suddenly present with symptoms of ebola and be freaking the fuck out.

Meanwhile, people who still had the "flu" would continue taking flights, going to work etc.

By the time we discovered that the flu and ebola outbreaks were all a part of the same virus, you'd be looking at easily over 100 million dead, completely collapsed infrastructures etc. It would be unprecedented in modern times.

but THAT's not even the scariest document I read, and I hesitate to talk about it just to avoid alarming people. it's not even really something you can prepare for beyond relocating to a shack in the woods and submerging yourself in a vat of bleach five times a day.

Hypothetically there was a country that wanted to create a doomsday weapon that would function even beyond the deterrent capabilities of nuclear weapons. Basically a "fuck you, world" kind of weapon.

If certain dissidents are to be believed, this weapon has been produced, likely still exists, and may have even been used at some point.

The key feature of the virus is the incubation period. The claim is they extended the incubation period of a certain highly lethal virus to not days, or weeks, but possibly a decade or more.

During this extended incubation, the number of virus particles is low enough that it shows zero symptoms, and it would be undetectable unless you were actually looking for it. While transmission rates would be quite low, over the course of a couple years it should be able to easily spread throughout an entire population. A literal 100% rate of infection.

Now this has been known about in the virology community for a while. One of those intriguing campfire stories we would tell each other after one too many drinks at the hotel lobby.

Well one group had the idea of testing this. Is there a latent and highly lethal virus lying dormant in the population?

They took blood samples from people across the US as well as some Western European countries and discovered something quite disturbing. A mysterious virus, referred to internally as "pathogen X" present in something like 95% of the samples.

It's an unusually large virus with a very particular shape, like a large toroid with spiky protruberances along the central axis.

The genome is HUGE, and that makes knowing its actual payload at this stage almost impossible. It shares significant similarities with smallpox, lassa, influenza, and HIV, but it neither looks nor behaves like any of these.

So the conclusion at this point is an uncomfortable one. You are likely infected by a mysterious virus that might be nothing, or it may become active at some point and almost certainly kill you.

Dissident origin shouldn't be hard to guess.

Treating the virus is an open question at this point. We may be able to decrease the viral count extremely low using standard therapies, but the concern is that during the active phase it will undergo massive amplification in just a few days so it won't really matter how few virus particles are present.

The other idea is to create a vaccination against the active phase. But that would require activating the virus, and it's not clear it even has an active phase (it may remain in the dormant phase permanently), and if it does have an active phase, what exactly triggers that is unknown.

But in theory, if we had the active form of the virus we could begin developing a vaccine very quickly. At this point serious people in the virology world treat the whole thing like a silly sideshow, but as other labs replicate the work and do their own investigating I imagine that might change pretty quickly.

Have anything to do with Wiley Burgdofer? Lyme and rickettsia?

If not that incident can at least be a teacher. Millions of people could die from these things. Within a week our national infrastructure and supply chains would be irrecoverably destroyed.

I'm hoping for mass extinction as soon as possible. I literally pray for the speedy destruction of 90% of mankind. It will happen soon because that's where we are marching to blindly.

Out of the ashes man.

The best example of this I am aware of was reported by Alibek shortly after his defection from the USSR. They took a rhinovirus and attached it to myelin, the idea being that you now have the common cold, which spreads like wildfire, but this one has the interesting property that as the body defeats the cold virus, it also learns to destroy its own myelin, thus causing MS that is always lethal. And this was just the beginning according to Ken. No doubt Israel already has far better weapons, given their complete disregard for international treaties and rampant political psychosis. You must be new, my friend, I've been scared shitless about this stuff for nearly 30 years.

Technically an active infection but asymptomatic. The genus/family is unknown. The genome is like a sock drawer. It's somewhat like a coronavirus but mostly defies classification.

This lends to the speculation of it being an engineered pathogen as it appears so different from every other known virus. It's like if you suddenly saw a dog in the wild with wings and feathers. There's no way mere evolution could produce such an unusual organism seemingly overnight. It would have had to have been purposefully created.

Thank you for your information, I work in clinical medicine and since I assume you are a virologist I would like to ask you how an engineered chimera virus like the one you described here would be treated therapeutically.

You mentioned vaccination and that this one virus has strains from influenza, so does it have a similar mutation rate?

How stable is a pharmaceutical treatment, could it theoretically have appropriate target receptors?

You also said that its mostly in a dormant phase - What is known about its cycle? You mentioned its asymptomatic in its incubation - which ones are the target cells in its dormant phase?

So the real terrifying threat isn't OPs larpy campfire stories for 12 year olds. Its CRISPR, and the fact that a huge amount of DNA is race specific, and the fact that CRISPR vectors are incredibly infectious and at the same time have practically zero morbidity.

What does this mean? Take a normal e-coli strain that will survive on surfaces and colonize the human gut with no resulting illness. Infect it with chimeric bacteriophage that can also target human mitochondria. Kill everybody in a haploid group by shutting down all the cells in their entire gastro-intestinal tract.

Super scary? The chinese are certainly already rushing to develop such an agent.

Similar to coronavirus in the fact some of the PCR results got flagged for coronavirus but not SARS. This was last week but when we worked it out it was generally around 35kb which is MASSIVE for an RNA virus.

This is just a rotation for me so I'm likely not the best person to ask beyond letting you know its in Eastern Canada

The takeaway from the entire thread that suspiciously emerged during the 7<sup>th</sup> CISM Military World Games, is that a virus was already on the loose long before; a handful of genocidal individuals, who likely weren't people but part of a botnet, showed support for a culling of the population when talks of a coming pandemic were brought up, exhibiting the same ideologies of those that have been talking about it for years with the use of keywords and phrases that clearly illustrates a psychological operations (psyops) element at play to sway others toward the same mentality, cheering on that "much needed 'reset'" as if people's lives and the world's economy were a joke; and China was the main focus, with what appears to be a deliberate intent to prime and scapegoat the country for a viral strain or strains that it actually already unleashed upon the world beforehand, but was unknown at the time by the public, with which the retaliatory counterstrike would properly unveil, correctly placing the blame on.

News of a virus soon flooded several news outlets and forums, including 4Chan, once again. Users indicated the nature of the event, prompting accusations of larps (live action role playing, also known as "shitposting") and conspiracy theories from others. What most didn't know at the time was that different clades had already been in circulation for months before

that event. Surprisingly, some anonymous users correctly indicated what it was: a chimeric virus that disguises itself as the flu with a long incubation period.

Okay I just got back from a briefing on this, I am a figure in the UK's Department of Disease Control (DDC) and have a wide background working with the WHO, UN and others.

>Escaped viral bioweapon

>Heavily modified "chimera" strain of flu with a bioengineered neurological kick to it; two viruses in one, the flu is just a method of delivery for the real payload

>Causes people to develop flu-like symptoms that creep for a while and then suddenly fall over where they stand as the payload creeps through the body and then infects the brain (which then does something to the diaphragm inhibiting breathing) and lung tissue (you produce liquid in your lungs so you drown)

>Can be spread via skin-to-skin contact, air, water and blood

>Developed by China as a possible WMD

>Escaped from lab not in Wuhan but elsewhere

>Wuhan IS quarantined but that's because China selectively releases information and we are not being told about other outbreaks in China - downplaying

<https://archive.4plebs.org/pol/thread/240561111/>

It IS a weapon and the design is quite special.

It produces rapid death while hiding behind a usually harmless flu-type infection. This was a weapon that was designed to stealthily infiltrate a population as much as it can before finally unleashing its cargo.

To facilitate further spread, the host's bronchi rupture and the diaphragm stops, making the patient's breaths ragged, harsh and full of blood; meaning that they will spray blood everywhere infecting others if they assist.

It spreads via contact, air and blood and can get into food and water too.

We don't know exactly how it got out but this is what we've been told. However we do not think this was done intentionally.

No human experiments here I am in a comfy office in the UK

>>240570804

I don't know when but some of our analysts are now recommending that we start soon. Two weeks max probably sooner. Once people see this shit it's going to be biblical. Even if the ports WERE open you'd have no luck getting out.

Okay!

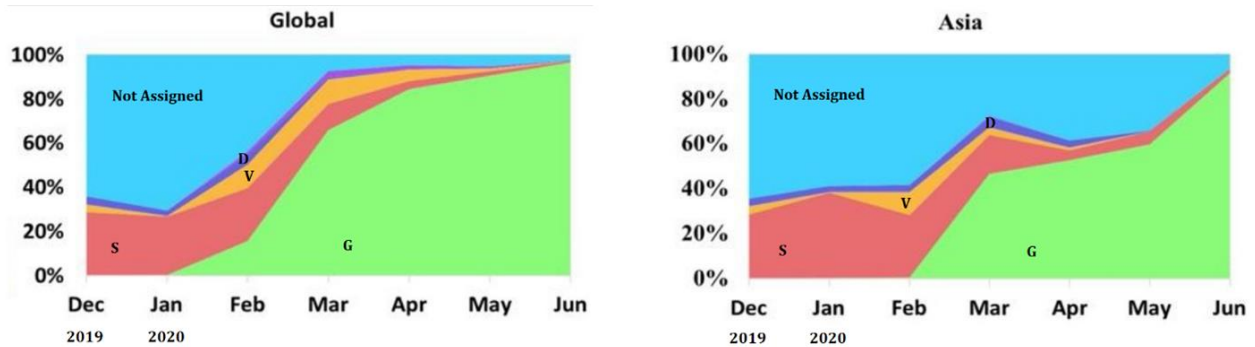

To understand the number of different clades and to obtain a complete picture of the regional distribution around the world over a 6-month period from 12/24/2019 to 06/30/2020, authors of *A genetic barcode of SARS-CoV-2 for monitoring global distribution of different clades during the COVID-19 pandemic* plotted the relative proportions of the major clades and their cumulative trends.<sup>190</sup>

Five major clades were identified in their study, the S, G, V, D, and I, with “not assigned” a separate category, what other studies have labeled as the O clade.<sup>191</sup> O is for others. The missing clade is the L, the one everyone thinks was the original when news first broke of an outbreak in China, which brings the total to 7 clades (S, G, V, D, I, O, and L), without counting the GR, GH, and GV mutations that occurred later in the G clade. Evidence is lacking to determine what clade EVALI fell under, whether it was a coronavirus or another type, and

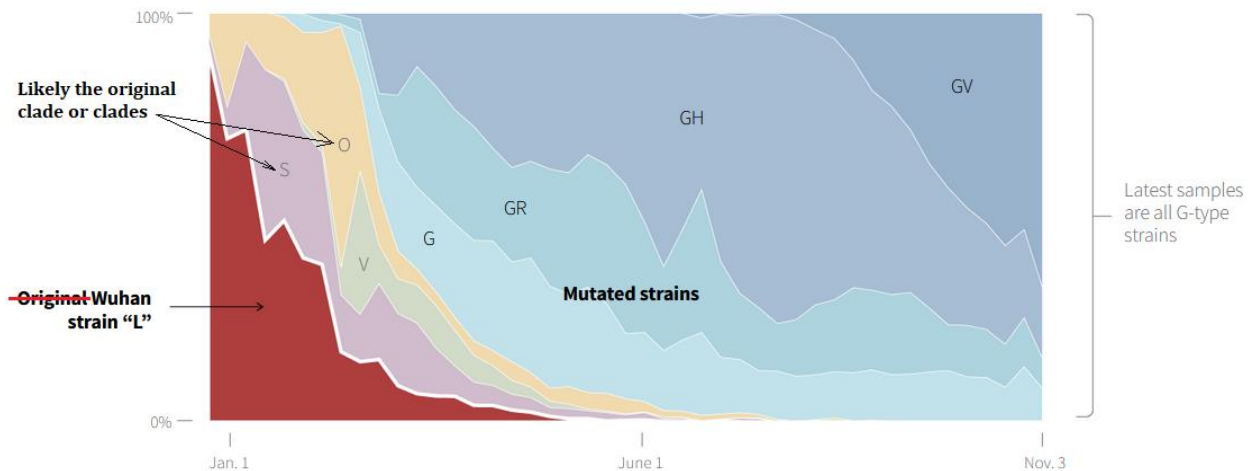

which Dr. Kary Mullis died from. Those two pieces would paint a much clearer picture of the original clade or clades. Presently, since the S clade was the most prevalent in North America before being overtaken by the G, and because the onset of EVALI and Dr. Kary Mullis's death predates any other outbreaks, it's presumed that the S was the original, with a small degree of error based on available but incomplete data.

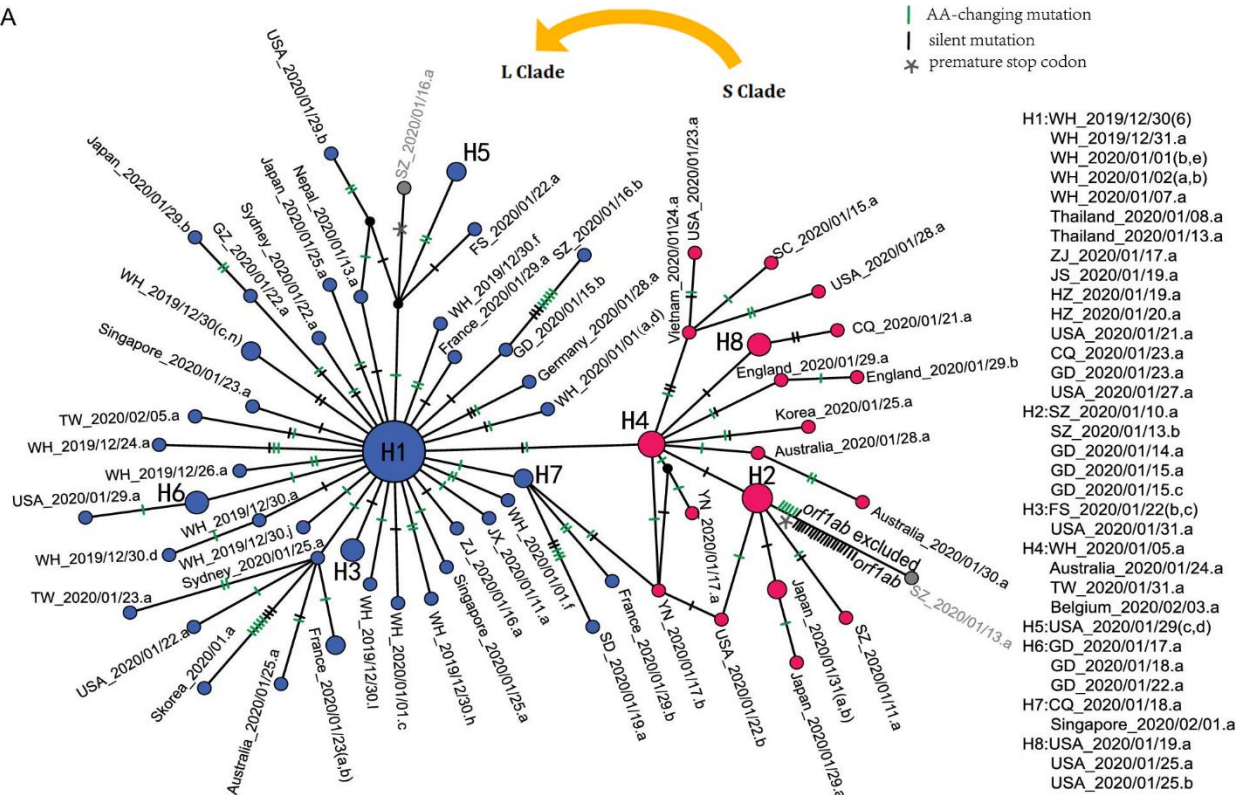

[https://www.ijidonline.com/article/S1201-9712\(20\)30681-0/fulltext](https://www.ijidonline.com/article/S1201-9712(20)30681-0/fulltext)

Weekly breakdown of over 185,000 virus samples from around the world

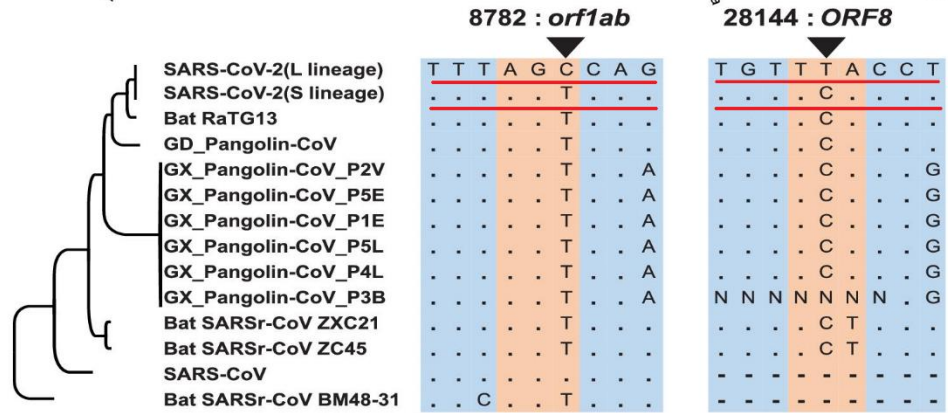

<https://graphics.reuters.com/HEALTH-CORONAVIRUS/EVOLUTION/yxmpjqkdzvr/>

A

B

<https://academic.oup.com/nsr/article/7/6/1012/5775463>

The natural evolution from S clade to L, as depicted in *On the Origin and Continuing Evolution of SARS*,<sup>192</sup> is incorrect. Data can be misrepresented and falsified if all the facts are unknown, if there are conflicts of interest by the authors, or if it's needed to keep the population dumb and docile through deliberate manipulation of scholarly articles. Viruses typically mutate down. That is, they become less deadly, not more unless a bioweapon is engineered to mutate up. Since the S clade predated the L by months without undergoing any major evolutions and then underwent a spontaneous jump in Wuhan, drastic changes in genes and sites, coupled with a culmination of events before it was unleashed, leads to the conclusion that it was artificially manipulated prior to release. The two lineages are indicative of two releases by two different nation-states.

Not only did the virus not originate at the seafood market, it did not originate in Wuhan at all, and it has now been proven that it did not originate in China but was brought to China from another country. Part of the proof of this assertion is that the genome varieties of the virus in Iran and Italy have been sequenced and declared to have no part of the variety that infected China and must, by definition, have originated elsewhere.

<https://web.archive.org/web/20200313030234/https://www.globalresearch.ca/covid-19-further-evidence-virus-originated-us/5706078>

That statement, part of an article written by Larry Romanoff on 03/11/2020, was used as propaganda by a Chinese government official, Lijian Zhao, that tweeted about it on 03/12/2020, contradicting the natural evolution study written by the Chinese themselves and published on 03/03/2020, well before his tweet.

The article has since been taken down but shows a lack of coordination in Chinese propaganda efforts, affirming incompetence and casts doubt on the veracity of what was written in the study. Nonetheless, there is a small and partial truth. If viruses in Italy and Iran were sequenced and had no part of the variety that infected China, that reiterates that it didn't naturally evolve from S to L but was artificially manipulated. Despite the fact that what Lijian Zhao said was Chinese propaganda, the lie is important because it shows that the Chinese were trying to conceal that they had an offensive bioweapons program and attacked the U.S. first, what Li-Meng Yan, the second defector from China, indicated publicly.<sup>193</sup> That's

why at an emergency meeting in Beijing held on 02/14/2020, Chinese leader Xi Jinping spoke about the need to contain the coronavirus and set up a system to prevent similar epidemics in the future, prompting the Chinese Ministry of Science and Technology to release a new directive titled *Instructions on Strengthening Biosecurity Management in Microbiology Labs that Handle Advanced Viruses like the Novel Coronavirus*.<sup>194</sup> The escape, as mentioned previously, occurred long before the L clade. The L clade was a statement to China in the same language that it used.

Lijian Zhao's finger-pointing during the initial scramble extended beyond his tweet, accusing UNC, specifically Ralph Baric, for creating and leaking the virus.<sup>195</sup> He then backtracked 24 hours later and blamed Florida.<sup>196</sup> But the blame game, dismissed as a conspiracy theory and Chinese propaganda, drew attention to the research and all the relevant parties.

**Author's Comment:** Several pieces of intelligence stand out and can act independently or be used in conjunction to further a specific narrative. Since this intelligence product seeks to accurately convey information, clarifying certain pieces of evidence in the misinformation muck is paramount. Initially, there were numerous Chinese whistleblowers accusing specific individuals within their government of mishandling laboratory work, mismanaging laboratories, and intentionally releasing the virus, things that are evident and true. The accused are Dr. Zheng-li Shi, Director-General of the Institute, Wang Yanyi, and Dr. Peng Zhou.<sup>197-199</sup> But some of the accounts of the Chinese citizens that accused those individuals publicly were hacked, contributing to a misinformation campaign by a foreign nation that is making it appear as though it's only the Chinese and pushing that specific narrative. Dr. Kary Mullis's assassination refutes that possibility. As a subject matter expert, his death indicates a rogue element at play, someone other than the Chinese. But even though accounts of Chinese citizens were hacked, that doesn't absolve the accused individuals from negligence or any wrongdoing. It merely illustrates a cyber information warfare element in use. Initially, it was presumed that the official timeline for the outbreak started in November of 2019. Evidence points to a much earlier release than is publicly admitted. Because this analysis is based on inference through available open-source data, a significant percentage of probability falls onto the foregone conclusion that the U.S. was attacked and retaliated. But because the pandemic was planned years in advance and ties in with China's offensive biowarfare program, several elements don't add up: predominantly the narrative that's pushed and the political duplicity. A considerable number of lies are emanating from intelligence agencies and governments around the world, a clear indicator of their intent to cull their populations. History has taught that a large population is a threat to its rulers; difficult to control and subdue. Richard Rothschild's patent and England's release of the B.1.1.7 and B.1.351 lineages of the coronavirus that will be discussed and explained in the Global Depopulation Agenda section draw attention to a strategic goal and a benefactor. The complexity and scope of events, while originating in China, don't allow for a conclusion as simple as China released it and is trying to cover it up. The pandemic presents a perfect opportunity to achieve strategic goals, with some countries attacking themselves by releasing different strains of SARS-CoV-2 that target specific gene profiles to rid themselves of their undesired populations, making it look like mutations are occurring naturally when they're not.

Dr. Frank Plummer’s death, like Dr. Mullis’s, was the result of a successful assassination attempt, but not with a bioweapon. The timing of it, and under mysterious circumstances from a heart attack in Nairobi, Kenya, which witnesses say was brought on spontaneously, wasn’t an accident. According to reports, he was the key to the Chinese espionage case at the NML.<sup>200</sup> He also made a habit of getting the biological materials he was working on stolen from him. Because of his alcoholism,<sup>201</sup> a disorder and addiction that reflects unfavorably on the character and integrity of an individual because of the high-risk behavior that is associated with it, comprising of impaired judgment through alcohol-induced carelessness, coercion, blackmail, or any situation that may lead to a compromise, especially for an individual in a high and prestigious position as Director of the NML, if Dr. Plummer held a security clearance and was unknowingly or deliberately hemorrhaging information and materials that would be of benefit to the Chinese or another foreign nation—to stop the hemorrhage and ensure no loose ends, he would have to have been permanently silenced.

Dr. Peter Daszak, president of EcoHealth Alliance (EHA), a New York-based nonprofit organization, who made an appearance on *The Next Pandemic*, led the charge against “conspiracy theories” that indicated COVID-19 was leaked from a lab, going as far as publishing an article in *The Lancet* to condemn the attacks and show solidarity with Chinese scientists,<sup>202</sup> but later admitted, through a spokesman, that he did it to protect them from online criticism, having had close contact and working with them for years.<sup>203</sup> That wasn’t the only reason. He was implicated and had a stake in the work. EHA provided funding to Dr. Zheng-li Shi for the development of UNC’s SARS-like chimeric virus, a piece of information that was initially omitted when the study was first published but was subsequently corrected and annotated appropriately.<sup>204</sup>

But despite Dr. Daszak's evident conflicts of interest, the WHO appointed him to a 10-person panel that began investigating the origins of the virus in China in January of 2021, without exploring the possibility that it came from a lab,<sup>205</sup> what other prominent individuals have warned not to ignore.<sup>206</sup> Dr. Daszak's inclusion on the panel due to his prior connections with the Wuhan Institute of Virology, which received criticism from independent experts, echoes an ongoing coverup attempt.

Dr. Fauci was not honest with the American people. Your money went to China for gain-of-function research on viruses. Lots of questions for him to answer.

[NIH Admits Fauci Lied About Gain-Of-Function Funding To Wuhan Lab](#)

In a letter released Wednesday, a top National Institute of Health official admitted taxpayers help fund gain-of-function research on bat coronaviruses

12:08 PM · Oct 21, 2021 · Twitter Web App

**2,917** Retweets   **212** Quote Tweets   **8,380** Likes

Funding to EHA, which involved approximately \$103,722,669, traces back to various U.S. government organizations and agencies, including the Pentagon, whose funding to EHA from 2013 to 2020, included contracts, grants, and subcontracts that amounted to approximately

\$39,000,000, with most of that \$39,000,000 (\$34,600,000) from the Defense Threat Reduction Agency (DTRA). The remaining funds were from USAID (State Department which means it actually came from the CIA), comprising of \$64,722,669, for a total of \$103,722,669.<sup>207</sup>

## Acknowledgements

Thanks to James Baratta and Mariamne Everett for researching the funding sources.

## Footnote

1. The figure for EHA's USAID funding was obtained from the University of California at Davis, a major grantee of PREDICT funds, which EHA has been a major sub-grantee of Davis confirmed that EHA's funding from PREDICT totaled \$64,722,669 (PREDICT-1: 2009 to 2014: \$19,943,214; PREDICT-2: 2014 to present (2020) \$44,779,455)

<https://www.independentsciencenews.org/news/peter-daszaks-ecohealth-alliance-has-hidden-almost-40-million-in-pentagon-funding/>

Of importance to note is a science and policy advisor to EHA: Dr. David Franz,<sup>208</sup> former commander of Fort Deitrick, who also sits on the steering committee of the John Hopkins Bloomberg School of Public Health, Center for Health Security, helping to connect the entities and military links.

## David R. Franz, D.V.M., Ph.D.

### **Former Commander, United States Army Medical Research Institute for Infectious Diseases**

PRINT      6

*"Nuclear, chemical, and biological weapons present unique challenges; protecting our military force and the homeland from their use is complex and fraught with unknowns. The Program for Emerging Leaders is committed to identifying future leaders and educating them about these issues to create an interagency community that is knowledgeable, engaged, and ready to work together to address the threats. This is an invaluable contribution to our national security."*

—Dr. David R. Franz

Dr. David R. Franz served in the U.S. Army Medical Research and Materiel Command for 23 of 27 years on active duty and retired as colonel. He served as Commander of the U.S. Army Medical Research Institute of Infectious Diseases (USAMRIID) and as Deputy Commander of the Medical Research and Materiel Command. Prior to joining the Command, he served as group veterinarian for the 10th Special Forces Group (Airborne).

Dr. Franz was the chief inspector on three United Nations Special Commission biological warfare inspection missions to Iraq and served as technical advisor on long-term monitoring. He also served as a member of the first two U.S.-U.K. teams that visited Russia in support of the Trilateral Joint Statement on Biological Weapons and as a member of the Trilateral Experts' Committee for biological weapons negotiations.

Dr. Franz was technical editor for the Textbook of Military Medicine on Medical Aspects of Chemical and Biological Warfare released in 1997. Current standing committee appointments include the National Academy of Sciences Committee on International Security and Arms Control, the National Research Council Board on Life Sciences and the Department of Health and Human Services National Science Advisory Board for Biosecurity. He serves on the Board of Integrated Nano-Technologies, LLC.

Accusations directed at Maatje Benassi, a security officer and reservist at U.S. Army's Fort Belvoir in Virginia, alleging that she was patient zero and brought the virus to Wuhan because of a bicycle crash she was involved in during the 7<sup>th</sup> CISM Military World Games are

incorrect.<sup>209</sup> Users targeted her because they weren't aware of the full chain of events that occurred before the games and because they needed a patsy. Covert action is always conducted by the CIA's Directorate of Operations, Special Activities Center (SAC), formerly known as the Special Activities Division prior to the CIA's restructuring in 2016. Since the U.S. was "attacked," and no formal declaration of war was declared, the SAC would have oversight and jurisdiction of any clandestine action needed to retaliate in self-defense based on a presidential finding issued by the president (Tertia Optio). The U.S. Army likely aided in creating the L clade due to their expertise and years of research but didn't release it. That would've been at the discretion of the CIA. The DoD conducted a study many years ago and concluded that the CIA should be the sole government agency conducting covert action, indicating, *"That even under U.S. law, it does not have the legal authority to conduct such activities or the operational agility to carry out those types of missions."*<sup>210, 211</sup> While the method of release is still unknown because an individual doesn't have to be the vector of spread, especially in the era of microdrones; claims that Maatje Benassi was patient zero aren't only incorrect but are completely disproved because SARS-CoV-2 (S clade) was in circulation for months before the games.

Numerous prominent individuals have since come forward, risking their reputation and lives to indicate what's already obvious: SARS-CoV-2 is not a natural zoonosis but was created artificially in a lab.<sup>212</sup> What lacked was a complete picture of the chain of events. Several scientific studies have alluded to the same, highlighting irregularities in the virus: from a polybasic and furin-like cleavage site that is absent in CoV's of the same clade,<sup>213, 214</sup> to a low bootstrap value that is often considered as the threshold for good confidence,<sup>215</sup> in addition to an S protein binding affinity that allows for SARS-CoV-2 to affix itself at least ten times more tightly than the corresponding S protein of the original SARS-CoV to their common host cell receptor.<sup>216</sup> None are coincidences.

Screenshots from the World Integrated Trade Solution (WITS) that surprisingly show imports and exports for COVID-19 Diagnostic Test instruments and apparatus, and test kits by countries in 2017, two years before the official outbreak of the disease, were the result of human error when the nomenclature was changed during the pandemic. A close analysis reveals that despite the fact the pandemic was planned.

#### **COVID-19 Test kits (382200) exports by country in 2017**

**Additional Product information:** Diagnostic reagents based on polymerase chain reaction (PCR) nucleic acid test.

**Category:** COVID-19 Test kits/ Instruments, apparatus used in Diagnostic Testing

As shown in numerous screenshots from selected Harmonized Tariff schedules over the years, nothing in those import or export codes mentions COVID-19. A generic name utilized for the 9027.80 product code changed, but others remained the same. This has been fact-checked by Reuters also, which is something they got right.<sup>218</sup>

The WCO indicated on their website why their classification references changed. *“To respond to the unprecedented demand in medical supplies amid the current global COVID-19 pandemic around the world, and in order to help countries speed up the cross-border movement of these critical products, the WCO and the WHO joined hands to strengthen their cooperation by establishing a coordinated approach in their response to the pandemic. As a result of this joint effort of the two organizations, the HS Classification Reference for COVID-19 Medical Supplies was updated, in a more structured and user-friendly format, to reflect more of the products that would be required in the professional opinion and experience of the WHO in public health. The first HS classification reference for COVID-19 medical supplies, published by the WCO at the dedicated section of its website two weeks ago, was an initial response of the Secretariat to help countries in their fight against the spread of COVID-19.”*<sup>219</sup>

What their update and structured approach did was change the nomenclature of the products, drawing attention to the imports/exports and leading people to believe that COVID-19 Testing Kits and equipment were being imported and exported in 2017 and 2018. Because of the attention and criticism that drew, the nomenclature was then changed again

to reflect a generic name (Medical Test kits), which only furthered suspicions of a coverup (which there actually is but not in the WITS database) and made things worse.

The data here track previously existing medical devices that are now classified by the World Cust

Change selection (Reporter, Year, Trade Flow, Partner and HS 6 digit Product)

[https://web.archive.org/web/20200907120640if\\_/https://wits.worldbank.org/trade/comtrade/en/country/ALL/year/2017/tradeflow/Exports/partner/WLD/nomen/h5/product/300215](https://web.archive.org/web/20200907120640if_/https://wits.worldbank.org/trade/comtrade/en/country/ALL/year/2017/tradeflow/Exports/partner/WLD/nomen/h5/product/300215)

If a classification system is updated to reflect new nomenclature, then previous imports and exports, when brought up electronically in the system, will automatically reflect those changes in the database, especially if the database is setup to annotate those changes retroactively and doesn't retain the previous nomenclatures for historical purposes. From available open-source data, that's exactly what happened and how the WITS database is structured. Thus, the import and export of COVID-19 tests and equipment, which appear as though they were imported and exported in 2017 and 2018, were not and were a simple misclassification due to human error from the urgency the pandemic generated.

Expected Project Closing Date

31-Mar-2025

<https://stateofthenation.co/?p=33972>

The expected project closing date for the Strategic Preparedness and Response Program (SPRP) is likely the date that enough of the world's population will be vaccinated against COVID-19, as part of a long-term strategic goal and with possible repercussions that will be discussed in the Global Depopulation Agenda and a Precursor to Transhumanism and then to Posthumanism sections.

The B.1.1.7 lineage is of particular interest because of the alternations made to it. To quote the authors of the study, *“The accrual of 14 lineage-specific amino acid replacements prior to its detection is, to date, unprecedented in the global virus genomic data for the COVID-19 pandemic. Most branches in the global phylogenetic tree of SARS-CoV-2 show no more than a few mutations and mutations accumulate at a relatively consistent rate over time.”* The jump, which shows a year’s worth of evolution in a month, isn’t natural but consistent with a reverse genetic system that can create viruses with customizable mutations.<sup>220</sup> The intentional release of a strain that is 70% more contagious and deadlier furthers the intent to cull the population, clean up England and extend the pandemic. Why it was released, and the locations will be discussed in the Global Depopulation Agenda section. 14 non-synonymous mutations and three deletions were what was noted, with the explanation falling upon, according to the authors, *“High rates of mutation accumulation over short time periods of immunodeficient or immunosuppressed patients who are chronically infected with SARS-CoV-2 and treated with convalescent plasma (sometimes more than once) and with the drug remdesivir.”* But the number of cases that sprouted up spontaneously, key mutations

and deletions, and genetic divergence from root tell a different story. Even scientists in England have raised suspicions about the new strain and the numbers about its virulence, stating: *“I’ve been doing this job for 25 years and I can tell you can’t establish a quantifiable number in such a short time frame. . .It has massive implications, it’s causing fear and panic, but we should not be in this situation when the Government is putting out data that is unquantifiable.”*<sup>221</sup>

To summarize much more simply as to what happened in Donald Trump’s presidential term, five screenshots from headlines of news articles are provided below.

## George Soros Touts China as Leader of New World Order

by [Raven Clabough](#)  November 17, 2010

Leftist billionaire George Soros continues to make headlines with his disturbing sentiments regarding a new world order. At the Canadian International Council on Monday evening, where he accepted his Globalist of the Year award, Soros not only defended the formulation of a new world order, but asserted that China should be one of the global leaders.

At the ceremony, “Soros announced that China’s grip on the global economy is getting tighter and compared the United States’ recent economic woes to the decline of the United Kingdom following World War II,” reports [The Blaze](#).

His assertions came after harsh criticism of political gridlock on Capitol Hill, which he contends has stalled economic reforms in the United States.

Soros maintains that China “has risen rapidly by looking out for its own interests.” (It seems worthwhile to point out that Soros’ praise of China for prioritizing its own needs is confusing, as he has criticized the United States and the capitalist economy for doing the same in the [Story of Stuff](#) video series.)

# GEORGE SOROS: CHINA IS A 'MORTAL ENEMY' OF THE WEST

by JOEL B. POLLAK | 25 Oct 2019

Billionaire left-wing philanthropist George Soros told the *New York Times* in an interview published Friday that China is a “mortal enemy.”

Though Soros has often pushed for free trade, he [told the \*Times\* that China had not played by the rules and that its values were at odds with those of the “open society” to which he had devoted his political life:](#)

“I consider Xi Jinping’s China the worst threat to an open society,” he said of China’s president, repeating a declaration he made this year in Davos, Switzerland, that prompted China to retort, “We hope the relevant American can correct his attitude.”

Mr. Soros, who has long encouraged free trade as a strategy to open up otherwise closed countries, said that the strategy had not worked in China the way he had expected and that more intervention was needed.

Mr. Soros, pointing a finger in the air, called China “a mortal enemy” and said the West gave it too much of the benefit of the doubt.

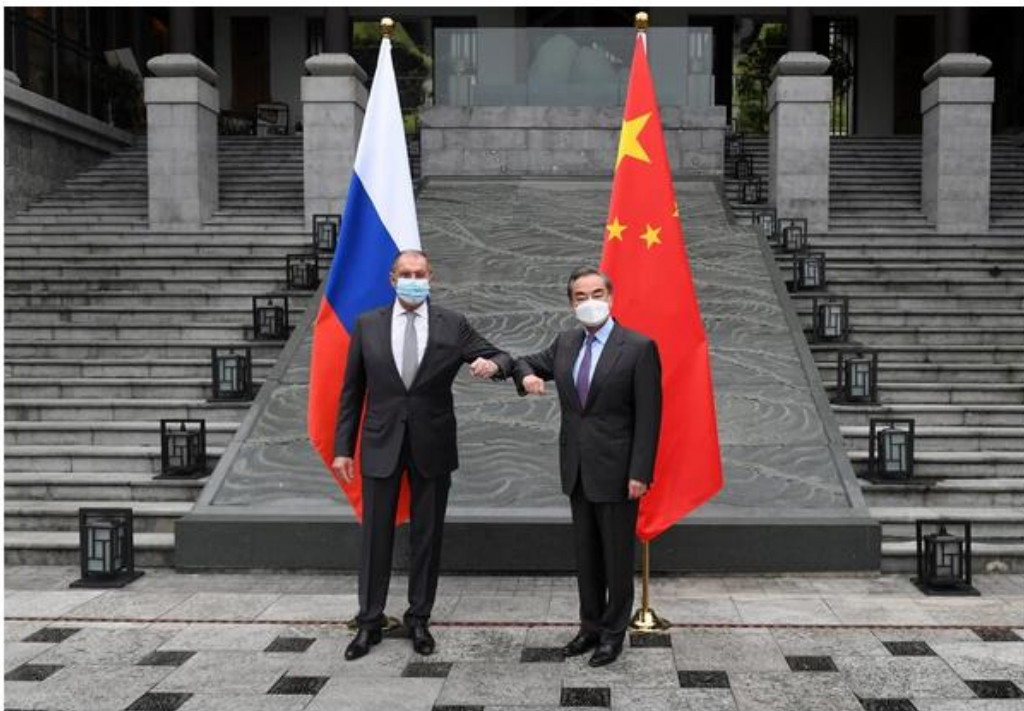

“We should recognize it: It’s a different system. It’s totally opposed to ours, diametrically opposed to ours,” he said. Perhaps to qualify his words, he added: “I’m not anti-Chinese at all. I’m just anti Xi Jinping.”

Soros’s words echo an op-ed he published in the *Wall Street Journal* last month in which he [praised](#) President Donald Trump’s policy of confronting China as a “great achievement.”

# *An Alliance of Autocracies? China Wants to Lead a New World Order.*

As President Biden predicts a struggle between democracies and their opponents, Beijing is eager to champion the other side.

Sergey V. Lavrov, left, and Wang Yi, the Russian and Chinese foreign ministers, in Guilin, China, last week. They urged the United States to “reflect on the damage it has done.” Lu Boan/Xinhua, via Associated Press

By Steven Lee Myers

March 29, 2021, 5:00 a.m. ET

President Biden wants to forge an “alliance of democracies.” China wants to make clear that it has alliances of its own.

<https://www.nytimes.com/2021/03/29/world/asia/china-us-russia.html>

Trump was dismantling the New World Order behind the scenes and derooting China, which didn't want to be a leader of the New World Order, but the leader. China's betrayal is what led George Soros to change his stance against it when compared to his praise a decade prior. That's why Trump was painted as the most controversial, hated, and damaging president of the U.S. That's why everyone attacked him publicly, privately, and wanted him dead and gone. He put America first, which went against the plan and dipped into people's pockets. And in doing so, he incurred their wrath.

Deep State roots date back to the 1700s, prior to the founding of America, but some allege that it goes back even farther.<sup>222</sup> Despite the numerous books written about it, the Deep State is viewed as a conspiracy theory. Believers are labeled as crazies and conspiracy theorists to discredit them and turn their views into some kind of psychosis, painting them as unstable individuals in need of a psychological evaluation. Even with considerable evidence, any talks of it are labeled as delusional fantasies.

The Deep State goes by many names: Shadow Government, the Cabal, the Swamp, the Committee of 300, the Olympians, the Hidden Hand; and in movies that are made about it: the League of Shadows, the Syndicate, Rogue Nation, Trinity, Hydra, SPECTRE, Monarch, and many others. Its appendages reach far and deep. An octopus is often used for its logo because it's a versatile, adaptable, and highly intelligent creature, just like its members. The most prominent films that are made about it include the Marvel and James Bond franchises.

Because movies encompass real-world hidden plots within them, and from an all-source intelligence perspective, several quotes and excerpts are provided throughout the rest of this document with real-world scenarios to tether and convey how the Deep States signals their plans and leaves things in plain sight. The absence of a scientific method to prove that definitively may discourage some from believing the information, but correlating it with events that have occurred would show and verify that information from a statistical standpoint. Coded language and subliminal messages are how they communicate with the public and each other.

**E.U. Nations Urged to Accept 160,000 Migrants**

By James Kanter  
Sept. 9, 2015

BRUSSELS — The European Union's top executive proposed a plan on Wednesday to distribute 160,000 migrants throughout the member nations, even while acknowledging that this measure alone was inadequate to the depth of the crisis.

<https://www.nytimes.com/2015/09/10/world/europe/europe-migrant-crisis-jean-claude-juncker.html>

The EU has relocated just 147 of 160,000 refugees

789,981 Migrants arriving in Greece and Italy by sea in 2015

160,000 Migrants the EU says it will relocate from Greece and Italy

1,418 Places made available in other EU states for migrants

147 Migrants relocated as of November 10, 2015

<https://www.cnn.com/2015/11/05/europe/eu-refugee-relocation/index.html>

**ICE has released more than 160,000 migrants into the U.S. since December – and 88% never showed up for immigration court, officials say**

- Immigration and Customs Enforcement officials say they have released more than 160,000 migrants who crossed illegally into the U.S. since December 2018
- The Department of Justice had its immigration court system establish a pilot program that created expedited court proceedings in 10 cities along the border
- However, 87.5 of immigrants in the program failed to appear before a judge
- ICE wants the authority to detain migrant children for long periods of time, and the ability to immediately deport unaccompanied minors to their home country
- They also want to make it harder for migrants to pursue asylum in the U.S.

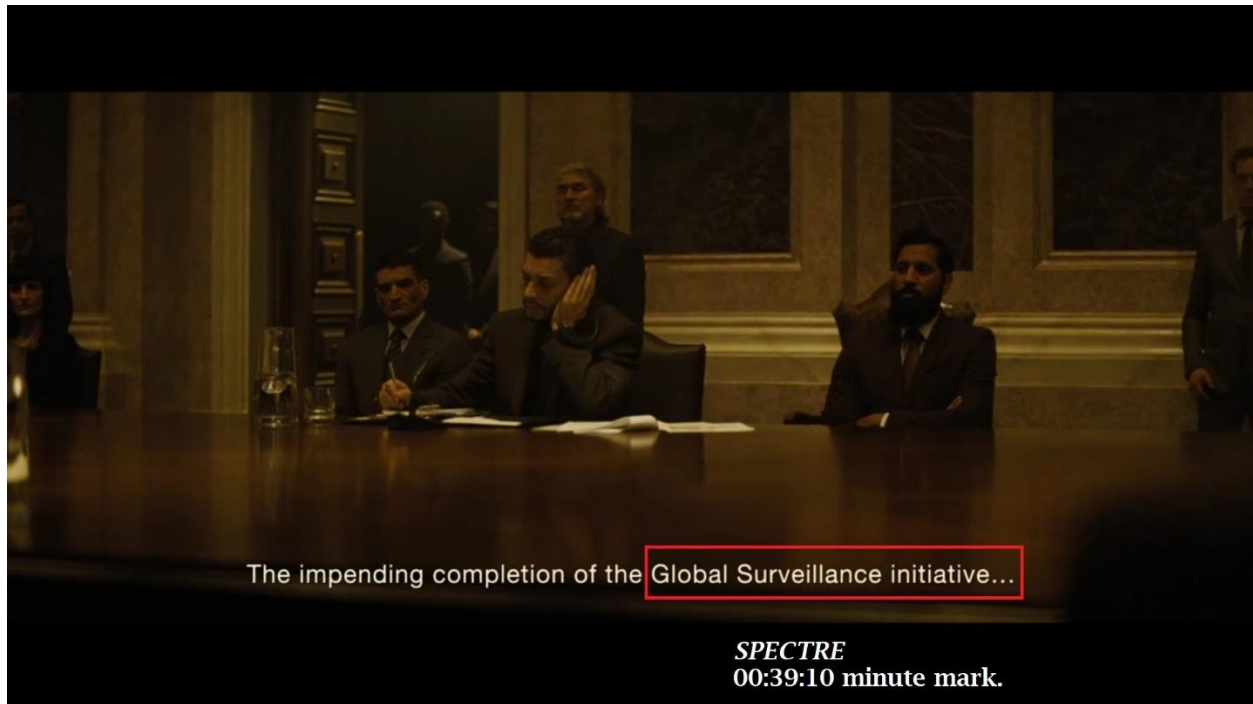

By VALERIE BAUMAN SOCIAL AFFAIRS REPORTER FOR DAILYMAIL.COM  
PUBLISHED: 09:36 EDT, 9 May 2019 | UPDATED: 13:50 EDT, 9 May 2019

<https://www.dailymail.co.uk/news/article-7010495/ICE-released-160-000-migrants-December-88-never-showed-court.html>

The image above is one of many examples of coded language. It doesn't make sense unless coupled with news articles that provide some basis. Destabilization in the middle east has caused a surge of migrants across the E.U. In 2015, approximately 800,000 migrants arrived in Greece. Of those, 160,000 were trafficked into prostitution, which is what Dr. Vogel says, "We have placed 160,000 migrated females into the leisure sector." SPECTRE was released on 11/06/2015 in the U.S. The first article was released on 09/05/2015. A follow-up on

11/10/2015 indicates relocation has begun and 147 have been relocated thus far. The last article on 05/09/2019 shows the displaced have been released into the U.S. by ICE, and 88% never showed up for immigration court is a subtle reference to mean white supremacists never came to stop it. It also means that percentages released into the mainstream are worthless if they're made up and intended to signify something different, skewing statistics.

The Global Surveillance Initiative is an ongoing set of controls from a combination of events, from surveillance tools implemented before the pandemic to the contact tracing measures after. Apps on smartphones are the one of the methods, and vaccine administration is the another. Pfizer's patent application on the following page is a hint as to how people will be tracked remotely, regardless if they have a phone.

System and methods for anonymously selecting subjects for  
treatment against an infectious disease caused by a patho-  
gen. The system comprises a plurality of electronic devices  
comprising instructions to generate an ID and, when in  
proximity of another such electronic device, one or both  
electronic devices transmit/receive the ID to/from the other  
electronic device. Then, a score is generated based on a  
plurality of such received IDs. Additionally, based on infor-  
mation received from a server, relevant treatment instruc-  
tions are displayed to the subjects based on the received  
information and the score. The server comprises instructions  
for sending to the plurality of electronic devices the infor-  
mation to be displayed with the relevant treatment instruc-  
tions, additionally the server and/or the electronic devices  
comprise instructions to generate a prediction of likelihood  
of infection, based on the received information, the score of  
the subject.

The Pfizer patent application approved,  
August 31st, 2021 is the very first patent

that shows up in a list of over 18500 for  
the purpose of remote contact tracing of  
all vaccinated humans worldwide who will  
be or are now connected to the "internet  
of things" by a quantum link of pulsating  
microwave frequencies of 2.4 GHz or higher  
from cell towers and satellites directly to the  
graphene oxide held in the fatty tissues of all  
persons inoculated

"In three days, there's a security conference in Tokyo to decide the New World Order"

-Tanner, SPECTRE

Neurolinguistic clues are laced in numerous TV shows and movies, alluding to what's coming, thus linking them together.

*Pride and Prejudice and Zombies* Release date. 21 Jan. 2016  
00:07:00 minute mark.

(Since the movie takes place in England with an entirely British cast, this is England's way of hinting at what's coming while blaming everybody, but themselves since they stand to benefit and released two strains of the coronavirus four years later: the B.1.1.7 and the B.1.351 lineages, though they will vehemently deny it.)

"From the colonies came not just silks and spices but a virulent and abominable plague. Naturally many suspected the French were to blame. Are you surprised?"

The U.S. federal government should have stopped funding research at the Wuhan Institute of Virology in 2015 when China reduced its cooperation with the French in building and operating the lab, according to the leader of an investigation into COVID-19's origins by the State Department under the Trump administration.

In 2015, French intelligence officials warned the U.S. State Department and their own foreign ministry that China was cutting back on agreed collaboration at the lab, former State official David Asher, now a senior fellow at the Hudson Institute think tank, told the Daily Caller News Foundation.

By 2017, the French "were kicked out" of the lab and cooperation ceased, leading French officials to warn the State Department that they had grave concerns as to Chinese motivations, according to Asher.

The State Department alleged in January 2021, at the end of the Trump administration, that the Wuhan lab had engaged in classified research on behalf of the Chinese military since at least 2017.

## Henry Kissinger on the Assembly of a New World Order

The concept that has underpinned the modern geopolitical era is in crisis

The concept of order that has underpinned the modern era is in crisis, writes Henry Kissinger. Above, a pro-Russian fighter stands guard at a checkpoint close to Donetsk, Ukraine in July.

Libya is in civil war, fundamentalist armies are building a self-declared caliphate across Syria and Iraq and Afghanistan's young democracy is on the verge of paralysis. To these troubles are added a resurgence of tensions with Russia and a relationship with China divided between pledges of cooperation and public recrimination. The concept of order that has underpinned the modern era is in crisis.

The search for world order has long been defined almost exclusively by the concepts of Western societies. In the decades following World War II, the U.S.—strengthened in its economy and national confidence—began to take up the torch of international leadership and added a new dimension. A nation founded explicitly on an idea of free and representative governance, the U.S. identified its own rise with the spread of liberty and democracy and credited these forces with an ability to achieve just and lasting peace. The traditional European approach to order had viewed peoples and states as inherently competitive; to constrain the effects of their clashing ambitions, it relied on a balance of power and a concert of enlightened statesmen. The prevalent American view considered people inherently reasonable and inclined toward peaceful compromise and common sense; the spread of democracy was therefore the overarching goal for international order. Free markets would uplift individuals, enrich societies and substitute economic interdependence for traditional international rivalries. <https://www.wsj.com/articles/henry-kissinger-on-the-assembly-of-a-new-world-order-1409328075>

The USNS Comfort hospital ship travels under the Verrazzano-Narrows Bridge in New York, March 30.

The surreal atmosphere of the Covid-19 pandemic calls to mind how I felt as a young man in the 84th Infantry Division during the Battle of the Bulge. Now, as in late 1944, there is a sense of inchoate danger, aimed not at any particular person, but striking randomly and with devastation. But there is an important difference between that faraway time and ours. American endurance then was fortified by an ultimate national purpose. Now, in a divided country, efficient and farsighted government is necessary to overcome obstacles unprecedented in magnitude and global scope. Sustaining the public trust is crucial to social solidarity, to the relation of societies with each other, and to international peace and stability.

# A New World Order for the Coronavirus Era Is Emerging

The next six months will go a long way to determining what the geopolitical map will look like at a time of intensifying rivalry.

By [Alan Crawford](#)

July 10, 2020, 12:00 AM EDT

<https://www.bloomberg.com/news/articles/2020-07-10/a-new-world-order-for-the-coronavirus-era-is-emerging>

The crises Zola was referring to were the wars waged for the last 70 years. Destabilization events by the military industrial complex former President Dwight D. Eisenhower warned about. The purification process is a cleansing of the bloodlines. You're seeing it firsthand. The removal of those who are deemed weak and inferior. Those who are genetically predisposed or have certain medical conditions. Not all are societal degenerates, but they are, to quote actor Ethan Hawke from *Gattaca*, "deGENERates." The old, the obese, the poor, the sick and mentally ill—those who are by virtue of their DNA and lifestyle are a burden to the system, regardless of whether they're innocent or guilty of any wrongdoing. But those that think it will stop at the old, weak, sick, and poor don't understand how ethnic cleansings work, especially strategic ones. They grab the low-hanging fruit first and then transition upward. Once they get to the highest levels, blonde hair and blue eyes won't be the determining factor. 80%-90% of the world's population is on the chopping block. Plenty of young, healthy people with no underlying health issues are dying from COVID-19 and the vaccines.

**Jasper Sitwell:** Zola's algorithm is a program. . . for choosing Insight's targets!

**Steve Rogers:** What targets?

**Jasper Sitwell:** You! A TV anchor in Cairo, the Undersecretary of Defense, a high school valedictorian in Iowa city. Bruce Banner, Stephen Strange, **anyone who's a threat to Hydra! Now, or in the future.**

**Steve Rogers:** The Future? How could it know? [*Sitwell laughs*]

**Jasper Sitwell:** How could it not? **The 21st century is a digital book. Zola taught Hydra how to read it.** [*Steve and Natasha look at him in confusion*] **Your bank records, medical histories, voting patterns, e-mails, phone calls, your damn SAT scores. Zola's algorithm evaluates people's past to predict their future.**

**Steve Rogers:** And what then?

**Jasper Sitwell:** Oh, my God. Pierce is gonna kill me.

**Steve Rogers:** What then?!

**Jasper Sitwell:** Then the Insight Helicarriers scratch people off the list. A few million at a time.

*Captain America, The Winter Soldier.*

Zola's algorithm is a reference to algorithmic governance and a social credit system that is already secretly deployed behind the scenes. People simply don't know about it. They think that it's only live in China, but it's not. Everything that's said, watched, purchased, browsed, and sold is all analyzed and data then retained for future purposes. It may not limit a person's ability to travel or get a job yet, but it will in the future. Vaccine passports are the first step. Totalitarianism is the goal: over the world, society and a person. That's done through planned events that usher in more control. The implications of such a system are diabolically clear. If someone is deemed a threat or noncompliant, all their property can be instantly seized electronically, their access turned off, and they're disavowed by a country if it reaches that point, a dystopian virtual future without a checks and balances, controlled by those at the top. No democracy.

In the James Bond movie franchise, the Deep State is known as SPECTRE, with Quantum a criminal organization that trees up to it, acting as one of its appendages. Each organization works in parallel to achieve the goal of its parent.

00:10:22 minute mark.

“The first thing you should know about us, is that **we have people everywhere.**”  
-Mr. White, *Quantum of Solace*

00:16:13 minute mark.

“When someone says, **‘We’ve got people everywhere,’** you expect it to be hyperbole. Lots of people say that, florists use that expression. Doesn’t mean they’ve got someone working for them inside the bloody room. What the hell is this **organization,** Bond? How can they be everywhere and we know nothing about them?”  
-M, *Quantum of Solace*

## The Global Depopulation Agenda

The global depopulation agenda began at the end of the Second World War for England and years later for the U.S. Close ties between both countries and their affluent families led to discussions and the exchange of ideas that helped plant the seeds for the foundations.

*Case 24*

### Curbing Global Population Growth: Rockefeller's Population Council

Rockefeller Foundation, 1952

Steven Schindler

*Background.* Throughout the first half of the twentieth century, the Rockefeller Foundation had been a significant contributor to broad advances in medical research and efforts in worldwide disease eradication. In contemplating the work of the foundation his grandfather created, John D. Rockefeller III began to believe that a reduction in mortality resulting from his family's foundation efforts in medicine, without a corresponding decline in fertility rates, could contribute to unsustainable population growth, particularly in developing countries. In the late 1940s, a Rockefeller Foundation-sponsored team returning from Asia noted that an imminent worldwide surge in population growth demanded immediate action.<sup>34</sup> Rapid worldwide population growth was known to be taking place, but scholarship on population and demography lacked organization and coherence in part because of the complexity of the problem of population growth and because of the cultural and religious sensitivities implicated in fertility issues. Rockefeller, however, felt that the complexities of rising population growth and the sensitivities of birth control should not inhibit the needed focus of science and public policy.<sup>35</sup>

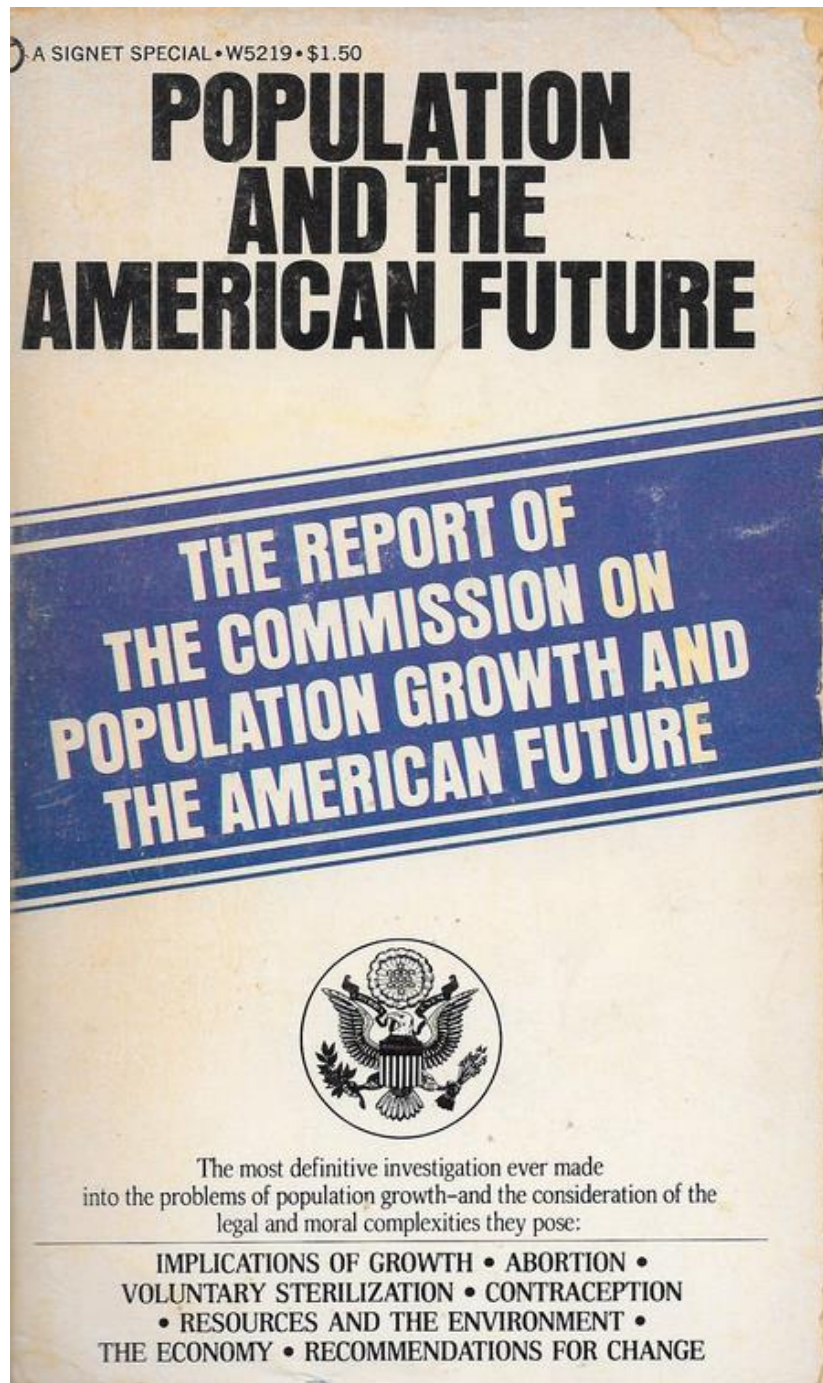

*Strategy.* In the early 1950s, Rockefeller's interest in the problems related to population growth led him to provide the financial support for a two-day conference, held under the auspices of the National Academy of Sciences, the president of which was also the president of the Rockefeller Institute for Medical Research.<sup>36</sup> When the Rockefeller Foundation declined to take up population growth as an issue of concern, Rockefeller formed the Population Council as an independent entity.<sup>37</sup> He provided an initial gift of \$100,000 to enable the Council to begin its work.

The Council's charter members were Frank Notestein, demographer at Princeton University who urged attention be given to high fertility rates; Frederick Osborn, influential proponent of population research; Thomas Parran, dean of the Graduate School of Public Health at the University of Pittsburgh; and John D. Rockefeller, III.<sup>38</sup> Shortly after its formation, Rockefeller provided an additional grant of \$1.25 million to the Council over five years. The Ford Foundation also made an early contribution to the Council, a grant of \$600,000.<sup>39</sup> Later financial backers included the Rockefeller, Mellon, Hewlett, and Packard Foundations.<sup>40</sup>

[https://cspcs.sanford.duke.edu/sites/default/files/descriptive/rockefellers\\_population\\_council.pdf](https://cspcs.sanford.duke.edu/sites/default/files/descriptive/rockefellers_population_council.pdf)

Studies the Rockefellers conducted and the influence they exerted led to several presidential actions. The publication of the Rockefeller report on 03/27/1972 that was commissioned by President Richard Nixon, titled *Population Growth and the American Future*, which was subsequently rejected by Nixon, prompted Henry Kissinger's 1974 memo which spawned NSSM-200, *Implications of Worldwide Population Growth for U.S. Security and Overseas Interests*, a now declassified 123-page document. Because of the length and scope of some of the documents, excerpts via screenshots are provided to convey the general idea without adding length that would unnecessarily extend the analysis.

~~CONFIDENTIAL - GDS~~

April 24, 1974

National Security Study Memorandum 200

TO: The Secretary of Defense  
The Secretary of Agriculture  
The Director of Central Intelligence  
The Deputy Secretary of State  
Administrator, Agency for International Development

SUBJECT: Implications of Worldwide Population Growth for U.S. Security and Overseas Interests

The President has directed a study of the impact of world population growth on U.S. security and overseas interests. The study should look forward at least until the year 2000, and use several alternative reasonable projections of population growth.

In terms of each projection, the study should assess:

- the corresponding pace of development, especially in poorer countries;
- the demand for US exports, especially of food, and the trade problems the US may face arising from competition for resources; and
- the likelihood that population growth or imbalances will produce disruptive foreign policies and international instability.

The study should focus on the international political and economic implications of population growth rather than its ecological, sociological or other aspects.

The study should then offer possible courses of action for the United States in dealing with population matters abroad, particularly in developing countries, with special attention to these questions:

- What, if any, new initiatives by the United States are needed to focus international attention on the population problem?
- Can technological innovations or development reduce growth or ameliorate its effects?

~~CONFIDENTIAL - GDS~~

- Could the United States improve its assistance in the population field and if so, in what form and through which agencies -- bilateral, multilateral, private?

The study should take into account the President's concern that population policy is a human concern intimately related to the dignity of the individual and the objective of the United States is to work closely with others, rather than seek to impose our views on others.

The President has directed that the study be accomplished by the NSC Under Secretaries Committee. The Chairman, Under Secretaries Committee, is requested to forward the study together with the Committee's action recommendations no later than May 29, 1974, for consideration by the President.

  
Henry A. Kissinger

## Executive Intelligence Review

*This article appeared as part of a feature in the [December 8, 1995 issue of Executive Intelligence Review](#). See [Feature Introduction and Table of Contents](#).*

### Kissinger's 1974 Plan for Food Control Genocide

by Joseph Brewda [https://larouchepub.com/other/1995/224\\_9\\_kissinger\\_food.html](https://larouchepub.com/other/1995/224_9_kissinger_food.html)

On Dec. 10, 1974, the U.S. National Security Council under Henry Kissinger completed a classified 200-page study, "National Security Study Memorandum 200: Implications of Worldwide Population Growth for U.S. Security and Overseas Interests." The study falsely claimed that population growth in the so-called Lesser Developed Countries (LDCs) was a grave threat to U.S. national security. Adopted as official policy in November 1975 by President Gerald Ford, NSSM 200 outlined a covert plan to reduce population growth in those countries through birth control, and also, implicitly, war and famine. Brent Scowcroft, who had by then replaced Kissinger as national security adviser (the same post Scowcroft was to hold in the Bush administration), was put in charge of implementing the plan. CIA Director George Bush was ordered to assist Scowcroft, as were the secretaries of state, treasury, defense, and agriculture.

The bogus arguments that Kissinger advanced were not original. One of his major sources was the Royal Commission on Population, which King George VI had created in 1944 "to consider what measures should be taken in the national interest to influence the future trend of population." The commission found that Britain was gravely threatened by population growth in its colonies, since "a populous country has decided advantages over a sparsely-populated one for industrial production." The combined effects of increasing population and industrialization in its colonies, it warned, "might be decisive in its effects on the prestige and influence of the West," especially effecting "military strength and security."

NSSM 200 similarly concluded that the United States was threatened by population growth in the former colonial sector. It paid special attention to 13 "key countries" in which the United States had a "special political and strategic interest": India, Bangladesh, Pakistan, Indonesia, Thailand, the Philippines, Turkey, Nigeria, Egypt, Ethiopia, Mexico, Brazil, and Colombia. It claimed that population growth in those states was especially worrisome, since it would quickly increase their relative political, economic, and military strength.

For example, Nigeria: "Already the most populous country on the continent, with an estimated 55 million people in 1970, Nigeria's population by the end of this century is projected to number 135 million. This suggests a growing political and strategic role for Nigeria, at least in Africa." Or Brazil: "Brazil clearly dominated the continent demographically." The study warned of a "growing power status for Brazil in Latin America and on the world scene over the next 25 years."

**Food as a weapon** [https://larouchepub.com/other/1995/2249\\_kissinger\\_food.html](https://larouchepub.com/other/1995/2249_kissinger_food.html)

There were several measures that Kissinger advocated to deal with this alleged threat, most prominently, birth control and related population-reduction programs. He also warned that "population growth rates are likely to increase appreciably before they begin to decline," even if such measures were adopted.

A second measure was curtailing food supplies to targetted states, in part to force compliance with birth control policies: "There is also some established precedent for taking account of family planning performance in appraisal of assistance requirements by AID [U.S. Agency for International Development] and consultative groups. Since population growth is a major determinant of increases in food demand, allocation of scarce PL 480 resources should take account of what steps a country is taking in population control as well as food production. In these sensitive relations, however, it is important in style as well as substance to avoid the appearance of coercion."

"Mandatory programs may be needed and we should be considering these possibilities now," the document continued, adding, "Would food be considered an instrument of national power? ... Is the U.S. prepared to accept food rationing to help people who can't/won't control their population growth?"

Kissinger also predicted a return of famines that could make exclusive reliance on birth control programs unnecessary. "Rapid population growth and lagging food production in developing countries, together with the sharp deterioration in the global food situation in 1972 and 1973, have raised serious concerns about the ability of the world to feed itself adequately over the next quarter of century and beyond," he reported.

The cause of that coming food deficit was not natural, however, but was a result of western financial policy: "Capital investments for irrigation and infrastucture and the organization requirements for continuous improvements in agricultural yields may be beyond the financial and administrative capacity of many LDCs. For some of the areas under heaviest population pressure, there is little or no prospect for foreign exchange earnings to cover constantly increasingly imports of food."

"It is questionable," Kissinger gloated, "whether aid donor countries will be prepared to provide the sort of massive food aid called for by the import projections on a long-term continuing basis." Consequently, "large-scale famine of a kind not experienced for several decades—a kind the world thought had been permanently banished," was foreseeable—famine, which has indeed come to pass.

**Lester Brown** [https://larouchepub.com/other/1995/2249\\_brown\\_and\\_avery.html](https://larouchepub.com/other/1995/2249_brown_and_avery.html)

Lester Russell Brown has been president of the Worldwatch Institute since its creation in 1974. Often called "Dr. Doom," or "God's Scorekeeper," Brown's entire career is associated with Worldwatch Institute, which was created for propaganda purposes. Brown was born in New Jersey in 1934, and was elevated into his role as an "agriculture authority" as a young man in Washington, D.C. in the 1960s.

**Funding:** The 1974 start-up grant for Worldwatch Institute was \$500,000 provided by the Rockefeller Brothers Fund. The chief funders of Worldwatch over the succeeding years include the following foundations: Ford, Rockefeller, John D. and Catherine T. MacArthur, Andrew W. Mellon, [Ted] Turner, William and Flora Hewlett, Charles Stewart Mott, Geraldine R. Dodge, Edward John Noble, W. Alton Jones, Curtis and Edith Munson, Frank Weeden, Energy, George Gund, Surdna, Public Welfare, and Edna McConnell Clark.

Other Worldwatch funding agencies include the U.N. Environment Program, the U.N. Population Fund, the Rockefeller Brothers Fund, the Winthrop Rockefeller Trust, the Lynn R. and Karl E. Pickett Fund, the Robert R. McCormick Charitable Trust, and the Pew Charitable Trusts.

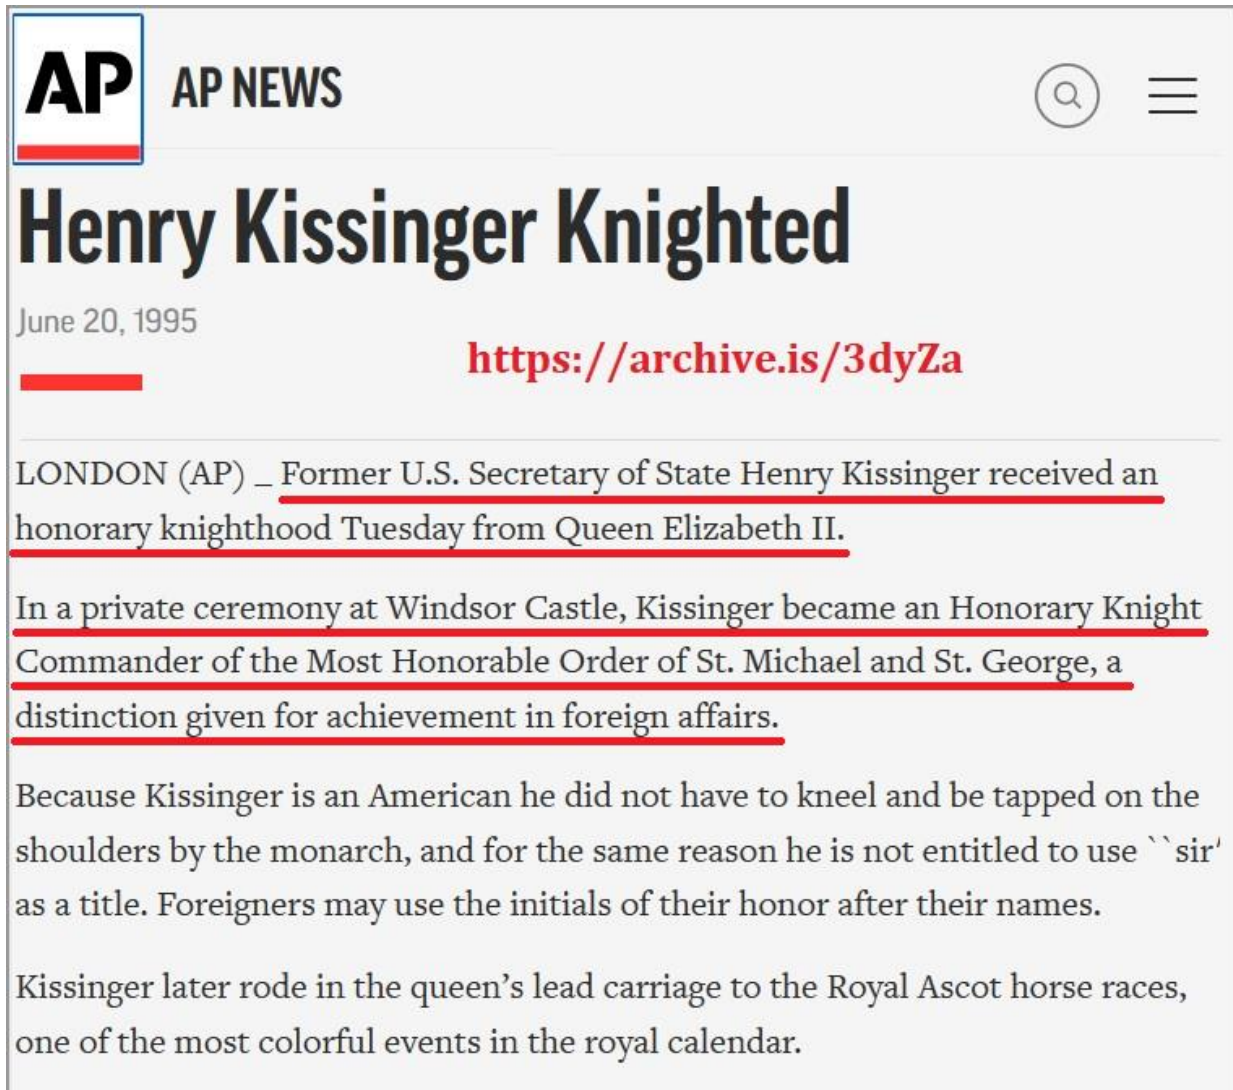

**Associations:** Brown is a member of the following groups: New York Council on Foreign Relations, Zero Population Growth, Common Cause, and World Future Society. He is a board member of the Institute of 21st Century Studies, the Population Reference Bureau; and an advisory council member of the Commission of National Institutions for the Environment. He is on the advisory committee of the Institute of International Economics, a consulting group run by C. Fred Bergsten of the Trilateral Commission, which acts in close association with the International Monetary Fund.

In June, Brown was among the featured speakers at a Washington, D.C. conference, hosted by the International Food Policy Research Institute (based in Washington, and founded in 1975 as part of the Kissinger-era food control politics), where Avery restated his customary theme that the world's population has exceeded the "carrying capacity" of its resource base. Later in the year, Brown toured Asia to trumpet this theme, and to focus on China as the "face of the enemy" in terms of producing too many hungry mouths that will threaten to consume the world's scarce food supplies. To underline this, he released his 160-page tract, *Who Will Feed China? Wake Up Call for a Small Planet*. In October, Brown spoke on the need for population reduction in Quebec City at the 50th anniversary of the U.N. Food and Agriculture Organization.

Recall that Lester Brown was one of the individuals in attendance at the Fairmont Convention, along with Ted Turner and David Packard, former CEO of Hewlett-Packard. The connections between these individuals and funding are much more in-depth than a few screenshots from old articles that mention their names and foundations.

Excerpts from the 12/08/1995 issue of The Executive Intelligence Review, titled *Who Is Responsible for the World Food Shortage*, explain several things:

1. Kissinger was a British instrument. The resources he used for NSSM-200 weren't original, and were largely taken from the British. So England has had, and still continues to have, a large role and influence on U.S. foreign policy.

**AP** AP NEWS  

# Henry Kissinger Knighted

June 20, 1995

<https://archive.is/3dyZa>

LONDON (AP) — Former U.S. Secretary of State Henry Kissinger received an honorary knighthood Tuesday from Queen Elizabeth II.

In a private ceremony at Windsor Castle, Kissinger became an Honorary Knight Commander of the Most Honorable Order of St. Michael and St. George, a distinction given for achievement in foreign affairs.

Because Kissinger is an American he did not have to kneel and be tapped on the shoulders by the monarch, and for the same reason he is not entitled to use ``sir' as a title. Foreigners may use the initials of their honor after their names.

Kissinger later rode in the queen's lead carriage to the Royal Ascot horse races, one of the most colorful events in the royal calendar.

2. The close relationship between England and the U.S., despite the wars waged in the past, isn't only because they share a common history but also because they share

common interests and goals. England still sees the U.S. as its colony and because of that, an extension of its will.

3. Richard Rothschild's provisional priority application for a family of patents in advance of one of his actual patents, which came on the heels of the pandemic, reiterates and shows that not only was the pandemic planned, but the strategic goals of population reduction are still as valid and important today to England as they were almost 80 years ago when King George VI created the Royal Commission on Population in 1944.

*"If I were reincarnated, I would wish to be returned to earth as a killer virus to lower human population levels."*

— Prince Philip

4. It shows why China was the source of the outbreak. (An enemy with too many hungry mouths)
5. It implicates England and shows why the B.1.1.7 lineage (20I/501Y.V1) and B.1.351 lineage (20H/501Y.V2) of the coronavirus, which contain some of the most interesting and unique mutations that allow for better spread and adhesion in the human population, with the 20H/501Y.V2 variant appearing to obviate antibiotics that are used to combat it, first showed up in Kent and Greater London, England, and in Nelson Mandela Bay (Port Elizabeth), South Africa, a former British colony and dominion of England.
6. It explains why Bill Gates, who is always at the center of everything, is now the largest farmland owner in the U.S.

Protests in Hong Kong at the behest of the U.K.,<sup>223</sup> a military coup in Myanmar, tensions on the border between India and China, what all have in common is they were former British territories. Dr. Daszak, a British-born zoologist and president of a New York-based nonprofit organization that funded Dr. Shi and received millions from the U.S. government, exhibits characteristics of an MI6 agent or asset. The U.S.-U.K. alliance and their tag team are unmistakably obvious. England is exerting its will to control its former territories and poise itself as the secret ruler of the world. The ongoing geopolitical battles and the fields they have unfolded on bear the mark of their origins. All roads lead to the House of Windsor.

Time and time again, the same individuals pop up together all over the world with a recurring theme in all their get-togethers and high-level meetings: overpopulation. It's a hot topic for discussion, especially for countries with unchecked population growth that actually leads to irreversible ecological disasters in those parts of the world.

## Billionaire club in bid to curb overpopulation

America's richest people meet to discuss ways of tackling a 'disastrous' environmental, social and industrial threat

<https://www.thetimes.co.uk/article/billionaire-club-in-bid-to-curb-overpopulation-d2f122qhl02>

John Harlow, Los Angeles

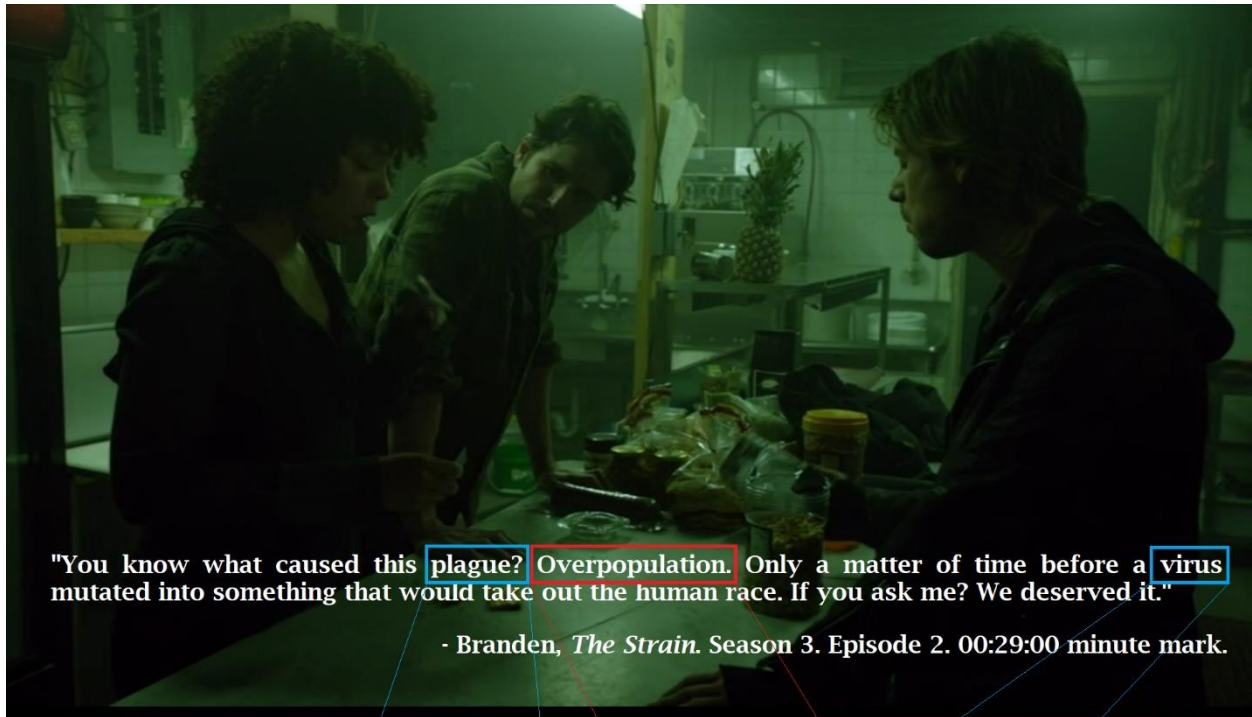

Sunday May 24 2009, 1.00am BST, The Sunday Times

SOME of America's leading billionaires have met secretly to consider how their wealth could be used to slow the growth of the world's population and speed up improvements in health and education.

The philanthropists who attended a summit convened on the initiative of Bill Gates, the Microsoft co-founder, discussed joining forces to overcome political and religious obstacles to change.

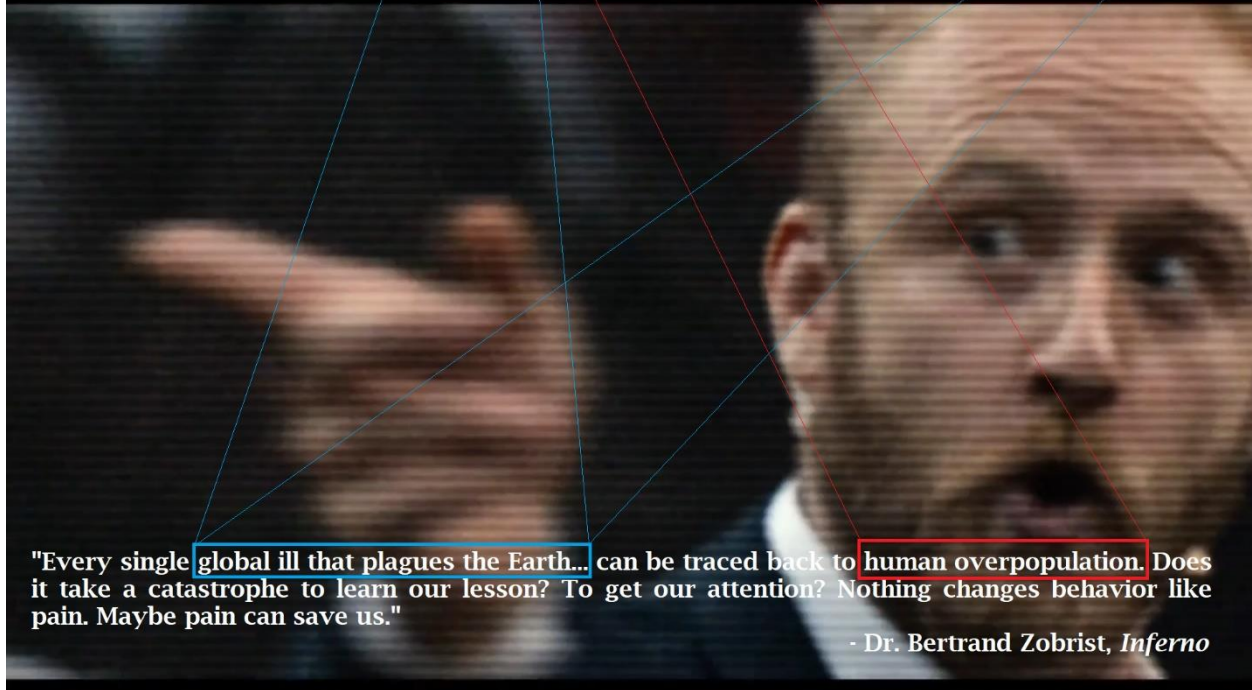

Described as the Good Club by one insider it included David Rockefeller Jr, the patriarch of America's wealthiest dynasty, Warren Buffett and George Soros, the financiers, Michael Bloomberg, the mayor of New York, and the media moguls Ted Turner and Oprah Winfrey.

"You know what caused this **plague?** **Overpopulation.** Only a matter of time before a **virus** mutated into something that would take out the human race. If you ask me? We deserved it."

- Branden, *The Strain*. Season 3. Episode 2. 00:29:00 minute mark.

"Every single **global ill that plagues the Earth...** can be traced back to **human overpopulation.** Does it take a catastrophe to learn our lesson? To get our attention? **Nothing changes behavior like pain.** Maybe pain can save us."

- Dr. Bertrand Zobrist, *Inferno*

CORONAVIRUS

# The COVID-19 Pandemic Has Led To A 'Baby Bust,' Not A Baby Boom

Experts predict the scourges of coronavirus and an economic recession will lead to a drop in birth rates. Here's why that matters.

By Brittany Wong

Because depopulation is expressed so vehemently in movies, meetings, strategic studies, and news articles—always the subject of discussion, and because some elites view humans as a virulent disease that’s plaguing this planet—all of the methods that lead to depopulation are discussed below to show why it was the primary goal of this pandemic.

According to the Proceedings of the National Academy of Sciences (PNAS), COVID-19 has resulted in a decrease in overall life expectancy at birth in the U.S. by 1.13 years.<sup>224</sup> The new life expectancy (77.48 years) is the lowest it's been since 2003, and the 1.13-year decrease is the largest single-year decrease in over 40 years. Although the data set used by the authors only went back to 1980, another data set that went back to 1900 showed that it is the largest single-year drop in life expectancy since 1943.<sup>225</sup>

In addition to a shorter lifespan, COVID-19 has led to a baby bust, not boom, with declining birth rates seen across many states and countries.<sup>226</sup> *“The economic fallout, persistent health concerns, uncertainty about the safety and availability of medical care and the closure of schools all combine to make this a very unappealing time for couples to start or expand their family,”* said Emily Smith-Greenaway, an associate professor of sociology and spatial sciences at the University of Southern California.<sup>227</sup>

Christopher Langan, a man who has an IQ in the range of 195-210,<sup>228</sup> shared his opinions behind the nefarious motivations of the vaccine. Sterilizations, as opposed to mass murder, as a means of curbing population growth, would be the least disruptive path to take by the ruling class to maintain the economy and status quo while achieving their strategic goals, is what he said.

There have been numerous books written about depopulation. One by Dr. John Coleman, a former intelligence officer for the CIA, titled *Conspirators' Hierarchy, The Committee of 300*, highlights depopulation as the primary and strategic goal of secret societies. Dr. Coleman also explains how they manipulate governments, health care, food industries, the media, et cetera. A few screenshots from his book show the recurring theme.

I quote the profound statement made by the prophet Hosea, which is found in the Christian Bible: “My people perish for lack of knowledge.” Some may already have heard my expose of the foreign aid scandal, in which work I named several conspiratorial organizations, whose number is legion. Their final objective is the overthrow of the U.S. Constitution and the merging of this country, chosen by God as HIS country, with a godless One World-New World Order Government which will return the world to conditions far worse than existed in the Dark Ages.

Let us talk about actual case histories, the attempt to communize and deindustrialize Italy. The Committee of 300 long ago decreed that there shall be a smaller—much smaller—and better world, that is, their idea of what constitutes a better world. The myriads of useless eaters consuming scarce natural resources were to be culled. Industrial progress supports population growth. Therefore the command to multiply and subdue the earth found in Genesis had to be subverted.

**Author: Dr. John Coleman, former CIA Intelligence Analyst.**

**Conspirator's Hierarchy : The Committee of 300, Paperback - January 1, 1992**

**Page 4**

**Author's Comment:** If one of the strategic goals is to overthrow the U.S. Constitution and destroy America, merging this country with a One World-New World Order government, then this milestone is another step to help facilitate that objective. The Committee knows how to manipulate people and pull on the strings. The profound and deliberate mismanagement of the pandemic has caused schisms between the vigilant and the indoctrinated, furthering a perpetuating cycle of violence and hate through fierce disagreements. As the divide furthers, it adds to growing pressure inside the country. The fabric of unity erodes, and in its place, violence, hatred, and murder arise. Since half-truths are told, and justice is denied, extremism in the form of vigilantism and domestic terrorism arise as retribution, allowing for more control to be implemented, a double-sided coin that's

part of a brilliantly crafted and laid out plan by the Committee. Heads we win, tails you lose. Observers of this would call for a Civil War and secession as the only recourse to end the suffering and regain control, but in reality, it would be the nail in the coffin. Thus, the psychological rape and perversion of this country's values through laws and guidance issued by "elected" government officials would have to be endured to stave off something worse. The duration of tolerance, however, comes into question since emotional pain manifests physically. As the threat of death and enslavement grow closer each day, so does the right to self-defense. A country can only bleed for so long before it's bled out.

## CONSPIRATORS' HIERARCHY / 5

This called for an attack upon Christianity; the slow but sure disintegration of industrial nation states; the destruction of hundreds of millions of people, referred to by the Committee of 300 as "surplus population," and the removal of any leader who dared to stand in the way of the Committee's global planning to reach the foregoing objectives.

Two of the Committee's earliest targets were Italy and Pakistan. The late Aldo Moro, Prime Minister of Italy, was one leader who opposed "zero growth" and population reductions planned for his country, thereby incurring the wrath of the Club of Rome commissioned by the "Olympians" to carry out its policies in this regard. In a Rome courtroom on November 10th, 1982, a close friend of Moro's testified that the former prime minister was threatened by an agent of the Royal Institute for International Affairs (RIIA)—who is also a Committee of 300 member—while he was still the U.S. Secretary of State. The meteoric rise of the man the witness named as Kissinger will be dealt with later.

**Author: Dr. John Coleman, former CIA Intelligence Analyst.**

**Conspirator's Hierarchy : The Committee of 300, Paperback – January 1, 1992**

**Page 5**

In my 1982 expose of this heinous crime, I demonstrated that Aldo Moro, a loyal member of the Christian Democrat Party, was murdered by assassins controlled by P2 Masonry with the object of bringing Italy into line with Club of Rome orders to deindustrialize the country and considerably reduce its population. Moro's plans to stabilize Italy through full employment and industrial and political peace would have strengthened Catholic opposition to Communism and made the destabilization of the Middle East—a prime goal—that much harder.

**Author: Dr. John Coleman, former CIA Intelligence Analyst.**

**Conspirator's Hierarchy : The Committee of 300, Paperback – January 1, 1992**

**Page 6**

To sidetrack briefly. The events that unfolded are all connected and intertwine with “QAnon,” though it’s not what everybody says it is because some people are rushing to try and make money off of it. It is, in its simplest form, a geopolitical battle and shift in power. That is why the Vatican and Pakistan had power outages.<sup>229</sup> That is why Italy was hit the hardest by the coronavirus after China was. Destabilizing the country would in turn destabilize the middle east, weaken opposition to Communism, depopulate it, and erode the Vatican’s control which has stood in the way of population reduction measures by opposing contraception and upholding traditional Christian values. The Vatican is a must and important entity to control. Both Italy and Pakistan are key strategic countries. A NATO member had very close ties with China and was caught interfering in the 2020 U.S. election, and Pakistan was being developed by China as part of its String of Pearls in its Belt and Road Initiative<sup>230-232</sup> to combat and counter India in South East Asia, which is of importance to the U.S. and U.K. These are very high-level overviews that don’t go in-depth to stay on topic.

# China Betrays Its Deal with the Vatican

By NINA SHEA | February 19, 2021 6:26 PM

Chinese Catholics attend a mass in a church on Christmas Eve in Shanghai, China, December 24, 2018. (Aly Song/Reuters)

Having secured the papacy's help in weakening the Chinese Catholic underground, Xi Jinping's regime is reneging on the commitments it made in return.

<https://www.nationalreview.com/2021/02/china-betrays-its-deal-with-the-vatican/>

Back to depopulation. Two alleged whistleblowers from Moderna who posted anonymously on 4Chan conveyed what's going on behind the scenes with the mRNA vaccine at their company.<sup>233</sup> Time will tell if they were a legitimate source of information and were telling the truth, though a culmination of events does lead one to conclude that they are.

>>295632357 >>295632419 >>295632739 >>295632768 >>295632904 >>295633435 >>295633483 >>295633848 >>295633868 >>295633918 >>295634022 >>295634536 >>295634636 >>295634910

I'm an industrial engineer at Moderna and the other one of us is a process development engineer. I'm sure the same thing is happening with Pfizer-BioNTech. It was hard to put things together based on the small quantities of additions happening in manual step (highly unorthodox for a continuous process production). The explanation we got was highly sensitive trade secret adjuvants being added. Digging in deeper showed how sensitive it actually was.

Most people's understanding of this novel vaccine type is that it works as follows:

1. Make mRNA coding for S protein
2. Make lipid nanoparticle delivery system
3. Profit

<https://archive.4plebs.org/pol/thread/295621351>

How it actually works from what we've uncovered:

1. Make mRNA coding for S protein
2. Make mRNA coding for mutant versions of CYP19A1 and CDKN1B in smaller amounts
3. Make sure that while delivery system for (1) mostly ends up in liver, most of (2) ends up in the gonads
4. Make sure form and quantity of additive upregulating LINE-1 reverse transcription activity makes it hard to detect among legit adjuvants
5. Effects from (2) integrated by (4) are recessive; mildly oncogenic effects in vaccine recipients unlikely to be noticed for many years
6. (5) recessive but since most of population vaccinated, in next generation female offspring have premature ovarian failure

(6) coincides with poor people being obsoleted by AI and robotics, so we didn't have to dig for motivation.

We've taken precautions but fear for our safety. So far I don't think we've raised suspicion, but can't be sure. Not sure what to do. Avoiding taking the vaccine makes us prime suspects for this leak.

Anonymous ID: CjV1c4Sa Wed 09 Dec 2020 06:09:08 No.295625359 Report

Quoted By: >>295625657 >>295625658 >>295625781 >>295625791 >>295625805 >>295626344 >>295626659 >>295630940

>>295622149

Trying to gather evidence in a way that doesn't implicate us. It's not easy. Imagine if you were in our position. I'm taking lorazepam just to be able to go to the office not freaked out.

>>295622603

It's not about one company. There's no way to pull this off without government actors and multinational organizations being involved. You think we can just send evidence to the FBI? Call the cops? Go to another country expecting shelter from the government there, assuming we can even get on a flight? Maybe one of these is a safe option. Or maybe not, which is the point, no way to know.

>>295623779

How would that work? You might at best more efficiently heat the brain with longer wavelength microwave energy, but I don't see how you would wirehead/pacify.

>>295624623

I don't have access to logistics. Once it leaves the plant, I have no information on storage and shipping. But I can watch out for process changes. If I'm still here.

>>295625215

I'm not a chemist, but prions would be more easily detectable as the vaccine already contains mRNA but doesn't contain proteins.

In addition to everything mentioned, several scenarios are presented below and the outcome for each discussed.

1. If a person catches COVID-19 and dies from it, that will lead to **depopulation.**
2. If the pandemic stresses people to the point of suicide, that will lead to **depopulation.**
3. If rising unemployment causes higher death rates,<sup>234</sup> that will lead to **depopulation.**
4. If a person catches COVID-19 and survives it, but it renders them lethargic, immobile, unhealthy,<sup>235</sup> or damages reproductive organs, as noted in several cases pertaining to men's testicles due to an abundance of ACE2 in them,<sup>236</sup> then their life expectancy will be drastically reduced, and any offspring that might be conceived may not be as healthy, incurring a shorter lifespan as well. That will lead to **depopulation.**
5. If the mRNA vaccine renders men sterile or leads to miscarriages<sup>237</sup> and infertility in women because it programs a woman's body to attack the gene necessary for the development of placenta, conceiving a child will become difficult naturally, if not impossible.<sup>238</sup> That will lead to **depopulation.**
  - a. If the mRNA vaccine allows vaccinated men and women to pass the RNA regulatory functions onto others through a proximal viral field, skin contact, unprotected sex or bodily fluid exchange,<sup>239</sup> rendering others sterile or infertile without the need for vaccination, that will lead to an inability to conceive a child and will lead to **depopulation.**
6. If the vaccine diminishes men's sex drive, as has been reported by dozens of men who have taken the shot, that will result in less sex. Less sex leads to less chances of conceiving a child and leads to **depopulation.**
7. If COVID-19 leads to and causes erectile dysfunction, a lack of sexual activity and a decrease in sexual performance will reduce the chances of conceiving a child.<sup>240</sup> That will lead to **depopulation.**
8. If couples living apart are banned from having sex under a new COVID-19 rule, no sex will result in no possibility of conceiving a child.<sup>241</sup> That will lead to **depopulation.**
9. If pregnant women become infected with SARS-CoV-2, the chances that their babies will be born unhealthy and prematurely killed via transmission of the virus from mother to fetus is drastically increased.<sup>242</sup> That will lead to **depopulation.**
10. If the vaccine has an adverse effect via product contamination or an immune system response and kills the recipient, that will lead to **depopulation.**
11. If the vaccine delivers HIV proteins in a lipid mRNA delivery system that has a long incubation period of 4-5 years, and the vaccinated start dying off years later as a result of it—the blame, which may be cast on new mutations/strains of SARS-CoV-2, or labeled as “natural” deaths, will lead to **depopulation.**
12. If the vaccine is actually a “leaky vaccine” and spreads a more deadly and dangerous virus by those who are vaccinated, then the unvaccinated portion of the population is at risk of contracting a pathogen far deadlier than the one on the loose. That will lead to **depopulation.**
13. If World War 3 breaks out because of COVID-19 and the economic stress and damage it has caused, that will lead to famine, displacement through migrations, habitat destruction, and unparalleled death, amplifying all the things mentioned earlier. That will lead to **depopulation.**

In each scenario, the outcome is always the same. Occam's razor indicates the simplest explanation is usually the right one. Because overpopulation has been the topic of discussion for so long, prompting studies, reports, councils, conferences, and has been laced in so many movie plots: depopulation, through direct and indirect covert means, is the primary goal of this pandemic. But a pandemic can have secondary, tertiary, quaternary, and quinary objectives and objectives within those objectives. Things that are evident and have already begun.

1. Decoupling from China. (Economic restructuring)
2. Gathering intelligence on response times, supply lines, and overall national stockpile levels. (Preparation for war)
3. Stricter travel restrictions domestically and internationally. (Limits on freedom of movement)
4. Contact tracing for COVID-19. (Mass surveillance)
5. Mass testing for COVID-19. (DNA data grab that can allow for more selective and effective bioweapons in the future)
6. Restrictions on free speech and individual freedoms. (Censorship and civil rights violations)
7. Punishment of independent news organizations. (Controlling the narrative)
8. Reappropriation of wealth. (Destruction of the middle class)
9. Destabilization of 1<sup>st</sup> world countries. (Smokescreen for the shift in power)
10. Loss of economic status. (Transition from middle class to lower class)
11. Preparation for Universal Basic Income. (Permanent enslavement of people at lower class)
12. Discrimination against minorities and unvaccinated. (Racism)
13. Generation of massive amounts of Loosh through the pain and suffering of millions of people. (Give Lucious his Loosh)
14. Vaccine administration (Testing of and unauthorized genetic experimentation on people.)
15. Infrastructure resilience through automation of key processes. (Removal of the human element)
16. Transition from humanism to transhumanism.

Therefore, while depopulation is the primary goal, multiple other objectives are being accomplished all at once.

**Author's Comment:** It would be of great importance to note that if in the future it's discovered that the mRNA COVID-19 vaccines, which are experimental and a form of gene therapy, actually result in sterility in men and infertility in women, and Biotech companies, who are immune from litigation, indicate that it was an "unforeseen" side-effect that they weren't aware of: it will be a lie and indicate that the intended outcome all along was to trick the population into inoculating and sterilizing themselves through the panic and fear of this pandemic, leading to the strategic goal of depopulation not by a viral agent of death, but by an inability for men and women to procreate.

# A Precursor to Transhumanism and then to Posthumanism

The war for artificial intelligence (AI) supremacy between the U.S. and China has waged for years.<sup>243</sup> Accompanying it is the quest for human performance enhancement. China's military has pushed research on brain science, gene editing, and the creation of artificial genomes that could have an application in future bioweapons.<sup>244</sup> Below is an excerpt from Defense One.

*"The PLA is pursuing military applications for biology and looking into promising intersections with other disciplines, including brain science, supercomputing, and artificial intelligence. Since 2016, the Central Military Commission has funded projects on military brain science, advanced biomimetic systems, biological and biomimetic materials, human performance enhancement, and "new concept" biotechnology."*

*"In 2016, an AMMS doctoral researcher published a dissertation, "Research on the Evaluation of Human Performance Enhancement Technology," which characterized **CRISPR-Cas** as one of three primary technologies that might boost troops' combat effectiveness. The supporting research looked at the effectiveness of the drug Modafinil, which has applications in **cognitive enhancement; and at transcranial magnetic stimulation, a type of brain stimulation, while also contending that the "great potential" of CRISPR-Cas as a "military deterrence technology in which China should "grasp the initiative" in development.**"<sup>245</sup>*

An anonymous user summarized this section well, and the information was verified, so this individual's explanation on the technology and research that has been taking place behind

the scenes will be used, explaining how a coronavirus can be utilized as a bridge between biology and cybernetics.<sup>246</sup> It will also explain why Charles Lieber was labeled as a strategic scientist for China by the FBI.

*“Charles Lieber has been working at Harvard on silicon nanowire tech for the past 22 years, and with nanotech and nanoscale structures in general for even longer than that. All of his publications are readily available at: Lieber Research Group Publications.<sup>247</sup> Many of his papers describe using silicon nanowires as the basis of a Brain-Computer Interface (BCI), or “Neural Lace” tech, like Neuralink (which is similar, but uses electrodes that are much larger and much more primitive than nanowires).”*

## Precision electronic medicine in the brain

Shaun R. Patel <sup>1\*</sup> and Charles M. Lieber <sup>2\*</sup>

Periodically throughout history developments from adjacent fields of science and technology reach a tipping point where together they produce unparalleled advances, such as the Allen Brain Atlas and the Human Genome Project. Today, research focused at the interface between the nervous system and electronics is not only leading to advances in fundamental neuroscience, but also unlocking the potential of implants capable of cellular-level therapeutic targeting. Ultimately, these personalized electronic therapies will provide new treatment modalities for neurodegenerative and neuropsychiatric illness; powerful control of prosthetics for restorative function in degenerative diseases, trauma and amputation; and even augmentation of human cognition. Overall, we believe that emerging advances in tissue-like electronics will enable minimally invasive devices capable of establishing a stable long-term cellular neural interface and providing long-term treatment for chronic neurological conditions.

### Supporting Information

**ABSTRACT:** Polymer-based electronics with low bending stiffnesses and high flexibility, including recently reported macroporous syringe-injectable mesh electronics, have shown substantial promise for chronic studies of neural circuitry in the brains of live animals. A central challenge for exploiting these highly flexible materials for *in vivo* studies has centered on the development of efficient input/output (I/O) connections to an external interface with high yield, low bonding resistance, and long-term stability. Here we report a new paradigm applied to the challenging case of injectable mesh electronics that exploits the high flexibility of nanoscale thickness two-sided metal I/O pads that can deform and contact standard interface cables in high yield with long-term electrical stability. First, we describe the design and facile fabrication of two-sided metal I/O pads that allow for contact without regard to probe orientation. Second, systematic studies of the contact resistance as a function of I/O pad design and mechanical properties demonstrate the key role of the I/O pad bending stiffness

## Scalable ultras-small three-dimensional nanowire transistor probes for intracellular recording

Yunlong Zhao<sup>Ⓧ,1,2,6</sup>, Siheng Sean You<sup>Ⓧ,1,6</sup>, Anqi Zhang<sup>1,6</sup>, Jae-Hyun Lee<sup>1,3</sup>, Jinlin Huang<sup>1</sup> and Charles M. Lieber<sup>Ⓧ,1,4,5\*</sup>

**New tools for intracellular electrophysiology that push the limits of spatiotemporal resolution while reducing invasiveness could provide a deeper understanding of electrogenic cells and their networks in tissues, and push progress towards human-machine interfaces. Although significant advances have been made in developing nanodevices for intracellular probes, current approaches exhibit a trade-off between device scalability and recording amplitude. We address this challenge by combining deterministic shape-controlled nanowire transfer with spatially defined semiconductor-to-metal transformation to realize scalable nanowire field-effect transistor probe arrays with controllable tip geometry and sensor size, which enable recording of up to 100 mV intracellular action potentials from primary neurons. Systematic studies on neurons and cardiomyocytes show that controlling device curvature and sensor size is critical for achieving high-amplitude intracellular recordings. In addition, this device design allows for multiplexed recording from single cells and cell networks and could enable future investigations of dynamics in the brain and other tissues.**

# Human Cells Eat Nanowires

Silicon nanowires swallowed by human cells provide  
new bioelectronic tool

By **Emily Waltz**

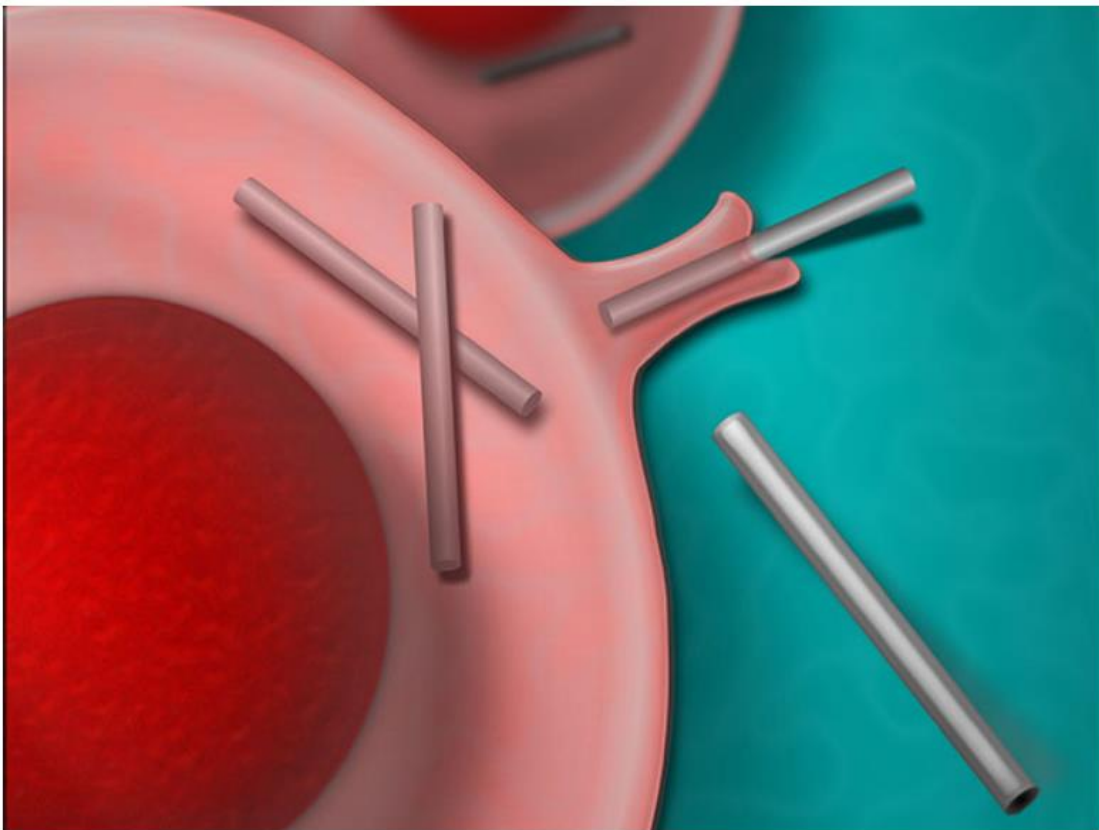

Image: John F. Zimmerman

Drop silicon nanowires and human cells into the same petri dish, and you'll see something extraordinary: The cells will eat the nanowires. Researchers at the University of Chicago recorded the phenomenon, and reported it Friday in the journal *Science Advances*.

<https://spectrum.ieee.org/the-human-os/biomedical/devices/human-cells-eat-nanowires>

*“Silicon nanowire field effect transistors, or SiNW-FETs, are transistorized silicon nanowires. They're extremely small, on the order of a few micrometers long by a few nanometers thick. They are small enough to be coated with HIV TAT peptides and slipped right through the membrane of a cell. Once inside, they're capable of reading signals from (and modulating the activity of) individual neurons.<sup>248</sup> How does one power them if they're inside cells and have no batteries, capacitors, or other power source? Simple. Radio Frequency (RF) induction.<sup>249</sup> What device is capable of directing RF of the required frequency directly into someone's head? A phased-array beamforming antenna, capable of steering beams of RF towards anything with high precision. What uses phased-array beamforming antennas? Fifth-generation (5G) wireless cell networks.<sup>250, 251</sup> They even have a 600 MHz band in their bandplan that can penetrate tissue very deeply (millimeter-wave frequencies only penetrate the skin to a depth measured in millimeters).”<sup>252</sup>*

*“Just one little problem left. How to get the nanowires into the brain, past the blood-brain barrier (BBB). Normally, the BBB keeps foreign objects out of the brain tissue. There is one thing, however, that compromises the BBB very handily. SARS-CoV-2 Spike proteins.<sup>253</sup> You see, COVID-19 is a vascular endotheliitis. This virus attacks the lining of people's blood vessels. That's why it causes blood clots, heart attacks, pulmonary edema, and all these other weird symptoms that one would never expect from a pneumonia. Its manifestations are protean because blood vessels are everywhere in the body. This is why it seems like an "everything-virus" that can impact every organ; it can cause viremia and inflammation in many different vital organs, as well as aggressive coagulopathy and neutrophilia.”<sup>254</sup>*

*“Currently, the large size and small number of electrodes in Brain-Machine Interfaces (BMIs) limits their stimulation and measurement resolution. State-of-the-art devices for DBS typically have 4–8 millimeter-sized electrodes (Stanslaski et al., 2012), whereas BMIs for neural recording typically use a few dozen electrodes that are 10–100 microns in diameter (Hochberg et al., 2006; Donoghue et al., 2007; Du et al., 2011) (Figure 1A). This density and feature size is a far cry from that of the human brain, which contains approximately one hundred billion neurons, each with diameter as fine as 10 microns (Williams and Herrup, 1988). In fact, a single square millimeter of brain tissue contains approximately one million neurons (Williams and Herrup, 1988). To match this number and density, future BMIs must feature smaller and denser electrode arrays in order to precisely monitor and control neural circuit activity. Furthermore, smaller electrodes (<1 micron in diameter) may also enable the recording of intracellular electrical signals of individual neurons (Figure 1A): compared to extracellular recording, these intracellular measurements will have improved signal to noise ratio and enable a clear cell-to-electrode registry*

(Figures 1B–D). Importantly, the improved signal to noise ratio also enables intracellular electrodes to record subthreshold neural activity (e.g., postsynaptic potentials) that can be used to determine the strength of synaptic connectivity.”<sup>255</sup>

*“The Internet comprises a decentralized global system that serves humanity’s collective effort to generate, process, and store data, most of which is handled by the rapidly expanding cloud. A stable, secure, real-time system may allow for interfacing the cloud with the human brain. One promising strategy for enabling such a system, denoted here as a “human brain/cloud interface” (“B/CI”), would be based on technologies referred to here as “neuralnanorobotics.” Future neuralnanorobotics technologies are anticipated to facilitate accurate diagnoses and eventual cures for the ~400 conditions that affect the human brain. Neuralnanorobotics may also enable a B/CI with controlled connectivity between neural activity and external data storage and processing, via the direct monitoring of the brain’s  $\sim 86 \times 10^9$  neurons and  $\sim 2 \times 10^{14}$  synapses. Subsequent to navigating the human vasculature, three species of neuralnanorobots (endoneurobots, gliabots, and synaptobots) could traverse the BBB, enter the brain parenchyma, ingress into individual human brain cells, and autoposition themselves at the axon initial segments of neurons (endoneurobots), within glial cells (gliabots), and in intimate proximity to synapses (synaptobots). They would then wirelessly transmit up to  $\sim 6 \times 10^{16}$  bits per second of synaptically processed and encoded human–brain electrical information via auxiliary nanorobotic fiber optics (30 cm<sup>3</sup>) with the capacity to handle up to  $10^{18}$  bits/sec and provide rapid data transfer to a cloud based supercomputer for real-time brain-state monitoring and data extraction. A neuralnanorobotically enabled human B/CI might serve as a personalized conduit, allowing persons to obtain direct, instantaneous access to virtually any facet of cumulative human knowledge. Other anticipated applications include myriad opportunities to improve education, intelligence, entertainment, traveling, and other interactive experiences. A specialized application might be the capacity to engage in fully immersive experiential/sensory experiences, including what is referred to here as “transparent shadowing” (TS). Through TS, individuals might experience episodic segments of the lives of other willing participants (locally or remote) to, hopefully, encourage and inspire improved understanding and tolerance among all members of the human family.”*

*“None of the computation would need to be done on the nanowires themselves. They would merely act as a BCI. All of the actual mind control would be done with cloud computing architecture, likely using machine-learning programs that observe societal stressors and manipulate people to make them more docile, more compliant, less likely to join populist movements, less likely to rebel against unfair economic conditions, and so on and so forth. It wouldn't be anything precise or subtle like implanting false memories or getting you to forget certain things, at least not at first. It would be general things, like Pavlovian conditioning*

*through direct control of human emotions. The controllers of such a system could make someone hate anyone they liked, love anyone they liked, and so on and so forth. **Democracy would be rendered utterly pointless.***

That's what the CCP was researching. Complete control through mental and physical enslavement. The possibilities aren't limited to mind control but also include AI, motionless interaction with a supercomputer, cognitive enhancement, telepathy, electronic brain therapy, consciousness cloning and transfer, immortality, which all pave the way and lead to transhumanism, and then to posthumanism if consciousness can be cloned, uploaded to the cloud, and then downloaded to another synthetic body or stored in a storage center, thus obsoleting human bodies and bridging biology with cybernetics. That's where the 5G conspiracy theories originate from.<sup>256</sup> The CCP was working on a smart grid that would utilize tech and AI to control their low IQ population, turning them into cyborg slaves via a coronavirus as the first step to unlocking the BBB. And because of China's gross human rights violations, that affords them the ability to conduct human experimentation without any oversight or people's knowledge. A cybernetic hive mind is what they're working to achieve, linking everyone together with a synthetic consciousness, but operated and controlled by those at the top. The U.S. is also working on this as well and is years ahead, especially with people like Charles Lieber and Robert S. Langer Jr. at the head of the pack. That would explain the yearly booster shots that are beginning to be pushed to "keep new variants of COVID-19 at bay."<sup>257</sup> Think of them as software updates.

Most of the world is yet to experience the benefits of a 5G network, but the geopolitical race for the next big thing in telecommunications technology is already heating up.

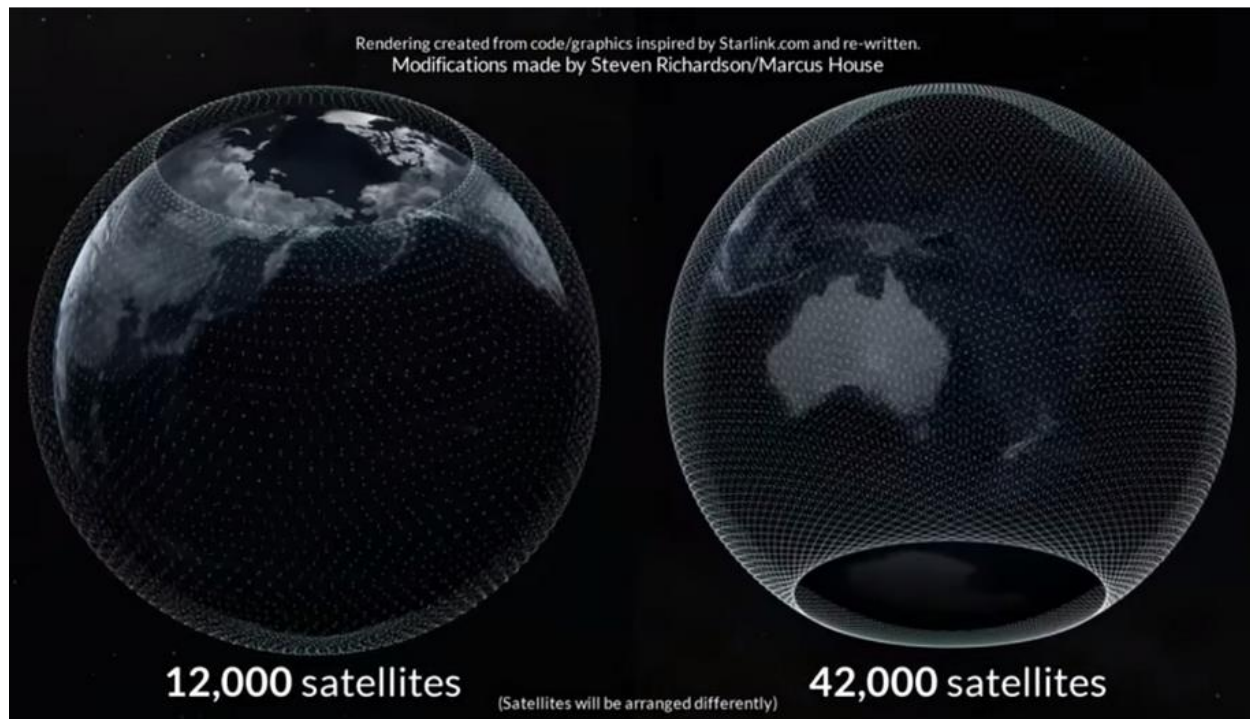

For companies and governments, the stakes could not be higher. The first to develop and patent 6G will be the biggest winners in what some call the next industrial revolution. Though still at least a decade away from becoming reality, 6G — which could be up to 100 times faster than the peak speed of 5G — could deliver the kind of technology that is long been the stuff of science fiction, from real-time holograms to flying taxis and internet-connected human bodies and brains.

<https://www.scmp.com/tech/tech-war/article/3121076/us-china-tech-war-battle-6g-dominance>

That's one of many reasons why the U.S. doesn't want Huawei infrastructure inside or anywhere near it. It doesn't matter how the silicon nanowires get inside a person's brain, as long as they get in. Individuals are controlled by the technology of the networks. If Huawei owns the 5G towers, China can manipulate and control the population of that nation. If the

U.S. does, it can. That would explain the need for 42,000 Starlink satellites that provide 5G. That's 42,000 low earth orbit sats with continuous global coverage, beaming RF down for the internet. Another anonymous user, who claimed to be a government insider, mentioned that Starlink is a weapon system but couldn't go on to say what it did or how it worked.

<https://www.nextbigfuture.com/2019/10/animation-of-42000-starlink-satellites.html>

*"I see a suit of armor around the world."*

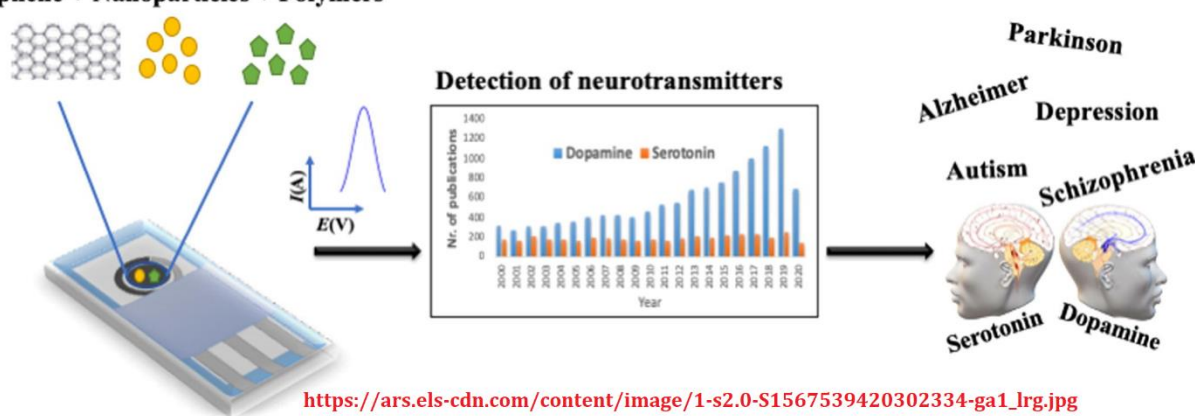

— Tony Stark, *Avengers, Age of Ultron*

Every tech company is currently funding mind-reading technology. They want to be the first to develop a mind-reading AI.<sup>258</sup> Something the CIA tried, and likely already succeeded, with Sean Harribance.<sup>259</sup>

Data uncovered by Spanish researchers provides some additional and interesting information: the vaccine isn't a vaccine but a dose of graphene oxide, according to them.<sup>260</sup> Though the study isn't peer-reviewed, preliminary analysis shows that the researchers took samples from a vaccine vial and put the contents under an electron microscope to determine composition. While they didn't state which vaccine they took samples from, speculation has fallen onto one of the mRNA ones, from Pfizer or Moderna. Graphene wouldn't necessarily be a cause for concern since, *"The search for adjuvants and carriers that can be added to the vaccine formulation to improve the immunogenicity of the antigen and induce long-lasting immunity,"* has been ongoing. *"There is an urgent need to develop new all-purpose adjuvants because some adjuvants approved for human use have limited functionality. Graphene oxide (GO), widely employed for the delivery of biomolecules, excels in loading and delivering antigen*

and shows the potentiality of activating the immune system. However, GO aggregates in biological liquid and induces cell death. It also exhibits poor biosolubility and biocompatibility. To address these limitations, various surface modification protocols have been employed to integrate aqueous compatible substances with GO to effectively improve its biocompatibility.<sup>261</sup> Graphene has unique and remarkable properties. It serves as a novel vaccine nano-adjuvant for robust stimulation of cellular immunity.<sup>262</sup> But the pandemic was planned and, “Graphene-based nanomaterials associated with different architectures have been extensively studied and continue to represent the first line of approach in the development of nanoplatforms for electrochemical sensors.”<sup>263</sup> These sensors can detect neurotransmitters such as serotonin and dopamine, leading to early detection of imbalances and the onset of diseases.

### Graphene + Nanoparticles + Polymers

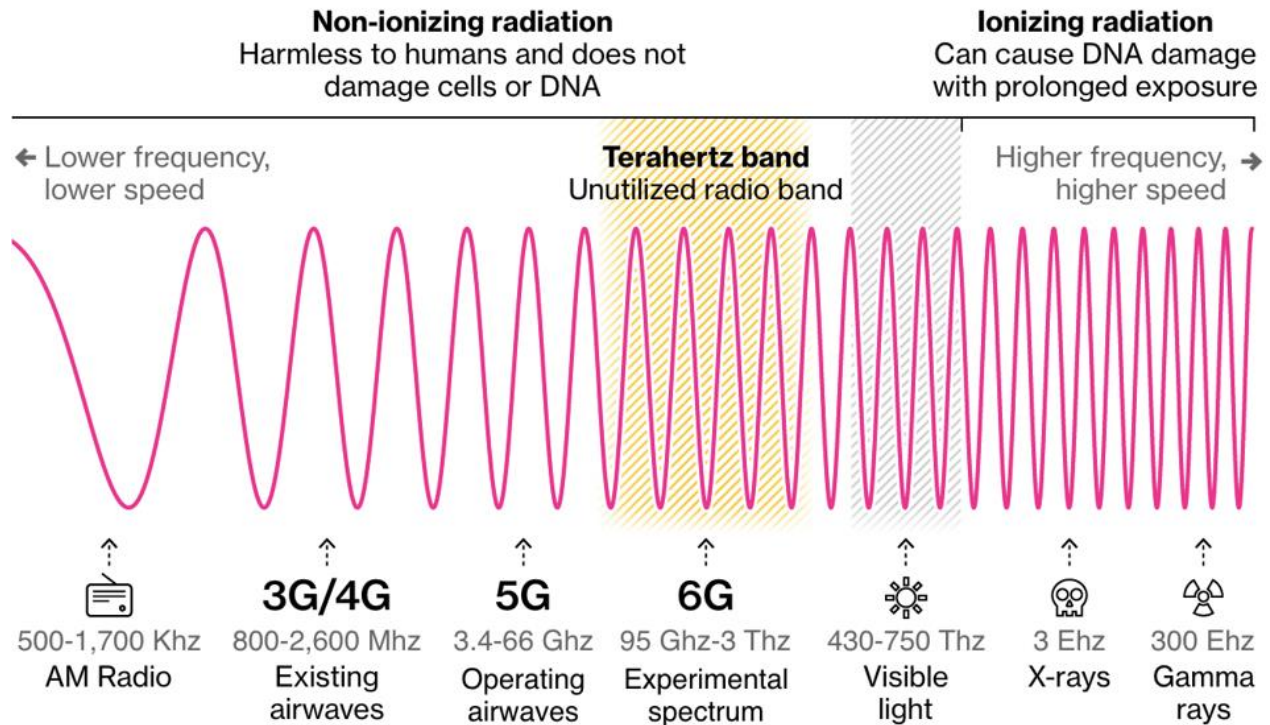

Such nanoplatforms are capable of modulating anxiety and depression.<sup>264</sup> Graphene can be used as a brain mapping tool,<sup>265</sup> solidifying it as a multipurpose material. “Two days after injecting graphene oxide into a specific region of the mouse’s brain, it behaved like other mice that had never experienced the smell of a cat in their home environment. In other words, graphene oxide inhibited the mouse’s anxiety-related behaviour,” Ballerini explains. She says that two days is roughly the time for memories to form and be consolidated in the mouse’s brain, which corresponds to the time for the symptoms of anxiety to subside. “Graphene oxide interacts with the part of the brain responsible for the formation of fear-related memories, which cause anxiety. It doesn’t work like a drug, by inhibiting the function of the receptors – instead, it temporarily halts the entire mechanism long enough to disrupt the brain’s fear-related pathology, without damaging them,” continues Ballerini. Interestingly, graphene poisoning causes hemorrhaging and myocarditis,<sup>266</sup> some of the same side-effects exhibited by the vaccinated.

Graphene epoxy-based composites are efficient and excellent electromagnetic absorbers in the extremely high-frequency band, surpassing 5G,<sup>267</sup> making them ideal for use in communication technologies because graphene has an absorption rate of 99.9999%, the perfect material to ensure and aid in neuromodulation while limiting the amount of signal interference and loss brought on by less absorbent material.

## Experimental Band

Terahertz waves could meet 6G's speed, latency requirements

Sources: Ofcom, CB Insights, 4G.co.uk

Though heating from EM radiation absorption is of concern and issue, graphene has high thermal conductivity and management, excelling in that area as well. The search for an AI-Powered Graphene-Brain Interface is already underway.<sup>268</sup> DARPA's N<sup>3</sup> program is one of many. The end goal of N<sup>3</sup> is mind control. The program was designed to solve problems associated with trauma that causes lifelong debilitating conditions like PTSD in members of the military. However, the solution is being extended to and tested out on civilians as well.

Defense funding in the commercial sector is a great way to conceal investments. DARPA's LifeLog project, for example, which was canceled on 02/04/2004 on concerns of privacy, gave birth to Facebook on the same day, which is LifeLog in disguise, allowing the DoD to skirt public oversight.<sup>269</sup> DARPA's funding of Moderna's mRNA vaccine development on the heels of a planned pandemic with forceful mandates by the government and complacency from the DoD are other examples, clear indicators of the seizure of the perfect opportunity to roll out and field test N<sup>3</sup>. The Total Information Awareness program,<sup>270</sup> an initiative rebranded to Terrorism Information Awareness because of the nefarious nature of what total awareness implies (spying on ordinary citizens because of the potential threat in innovative and unimaginable ways), includes the incremental rollout of technologies that help facilitate a total surveillance state by snooping on people outside and inside their home, extending to reading and understanding a person's thoughts and modifying their behavior accordingly. Such invasive measures are due to paranoia and a lack of control by the ruling class. False flags help facilitate funding and change. Funding would never be approved if the

secretive end goal of each program was known, hence deception and compartmentalization. Why some individuals are suffering from neurological disorders postvaccination varies, stemming from bad batches caused by nanocontamination since purity can't be guaranteed in a mass administration effort, to a compromise of the BBB via the synthetic spike protein.

Electronic brain therapy serves as the best and most cost-effective method to combat neurological conditions en masse, providing an almost instantaneous solution when compared to individual doses of medication because of the lag time between diagnosis of illness, prescription of medication, intake of medication, and refills needed to counteract the ailment, all if an individual seeks help and if drugs are available. This “neurotech” can also facilitate and aid in memory wipes to help ease pain and suffering if desired by the individual or mandated from the top, leaving a clean slate that can be molded. These proactive measures are put into place to combat a set of deteriorating global conditions that will lead to worldwide stress and depression in the future. History is cyclic. Forecasts predict that in the mid to late 2020s, the global economy will undergo substantial change leading to a period known as the Second Great Depression. Present economic outlook is foreshadowing this.<sup>271</sup> This period will lead to a Third World War.<sup>272</sup> Living conditions will be undesirable, and famines will be prevalent. To combat them, neuromodulation and alternative methods of sustenance will be proposed to keep the population distracted and docile. Since insects serve as the most viable and sustainable path, requiring much less land and resources to farm them, insect protein will be in high demand and will become the norm. The push is gaining mainstream acceptance.

There is an ethnicity that already exhibits insect characteristics: Asians. Their numbers are great, they move, work, and strive as a collective—they lack empathy, and they will eat anything, regardless if it's alive or dead, to sustain their lifeforce. They sprout colonies overnight, have overpopulated sectors, and are a formidable force if threatened. Numbers are their strength. This is mentioned because it foreshadows a future war of the species.

Current estimates indicate that approximately two billion people, a quarter of the earth's population, consume insects as part of their natural diet to supplement a lack of protein.<sup>273</sup> Alternatives for animal and human feed are gaining traction in Europe.<sup>274</sup> Although some studies indicate insect consumption isn't as sustainable because of protein limitations,<sup>275</sup> expansion to include all of the world's population in the next 30 years is likely.<sup>276</sup>

Nutrition is a driving evolutionary factor.<sup>277, 278</sup> Prolonged insect consumption will mutate DNA. Insect-like characteristics in humans will become evident and prevalent. This will split the species in two: those that maintained their human form and those that shed it. For illustration purposes, below is an example of the transformation process from *District 9*.

<https://i.4pcdn.org/pol/1615989048396.jpg>

In 1953, a craft crashed in Kingsman, Arizona, and the surviving occupant was brought to Area-51.<sup>279</sup> Dr. Dan Burisch, a microbiologist that interacted with the “creature” named J-Rod, described him as a giant insect. J-Rod was labeled an alien, but J-Rod was a descendant from the future.<sup>280</sup> His evolutionary path falls in line with the nutrition available to humans because of a cataclysm, forcing his species to travel back and perpetuate a time loop, one of many. The Doctrine of the Convergent Timeline Paradox suggests J-Rod was from an alternate timeline thousands of years in the future. Some contend that is incorrect. J-Rod was from our timeline, but the exact date is unknown or obscured to prevent the event from never happening. Our future is set. A solidified timeline is what allows glimpses of it (time-viewing). If it were undefined or changeable, it would be unknown. Simulation theory holds.<sup>281</sup> A simulation, by definition, has to have preset factors that play out. Therefore, all possibilities are accounted for, including future to past immigration by other J-Rods, and the outcome and range of causality streams in the so-called multi-trajectory time stream stack competing for dominance have already been determined. This is evident through science fiction becoming science fact.

<https://image.cnbcfm.com/api/v1/image/106354691-1579903636492untitled-1.jpg>

J-Rod warned the cataclysm in the future splits the human race in two. One will become a space-faring race, and the other will dwell underground. The cataclysm is the sun's micronova that's slated to occur on 10/26/2046. Video games, movies, and climate scientists are slow-rolling the truth under the guise of human-caused climate change. That is incorrect. In service technologies, in some instances, that can manipulate and control the weather trick the population by creating man-made catastrophes that mirror natural phenomena. That circles back to the war element contained in climate change that's needed to facilitate societal and economic transformation.

As the sun enters the galactic current sheet's central zone, a considerable amount of energy is built up that needs release. This discharge comes in the form of a micronova and is relatively consistent, occurring roughly every 12,000 years. When it hits, one side of the earth will be superheated by the plasmic discharge, the other supercooled (flash-frozen). The intensity of the impact with an already weakened magnetosphere can generate and cause a planetary plasma flow hot enough to melt rock to arc to the surface, carving out scars on parts of earth like Valles Marineris on Mars. Impacts from clumped ejecta will leave craters according to the size of the crashing debris, saturating the atmosphere with dust and dirt that will block out the sun. The earth's crust will unlock, swinging down 90-degrees before returning to roughly the same area over 24 hours.<sup>282</sup> That displacement will cause mega earthquakes, volcanic eruptions, giant tsunamis, and sustained winds of 300mph or greater on the surface, cleaning the slate. Restabilization of the crust will take decades. Leading up to the events will be a geomagnetic reversal that has already begun, weakening earth's electromagnetic field. In a low-density electromagnetic environment, protein breaks down, and cancer forms. Additionally, humans turn into sadistic, murderous cannibals regardless if food supply is ample.<sup>283</sup> Those predisposed to aggression and violence will be hit the hardest, succumbing to basic animalistic instincts. Murder, rape, and theft rates will be at all-time highs, overwhelming the system. Lawlessness will be prevalent. Dense population centers will be in chaos. That is one of the reasons why neuromodulation is needed. While devastating, the cataclysm is survivable. Everyone won't die. Modern humans are a testament to what their ancestors endured. Panic and fear will be the real killers. The disarray the earth will be left in will take time to recover. What precipitates after, however, will be a war of the species that humans will lose.

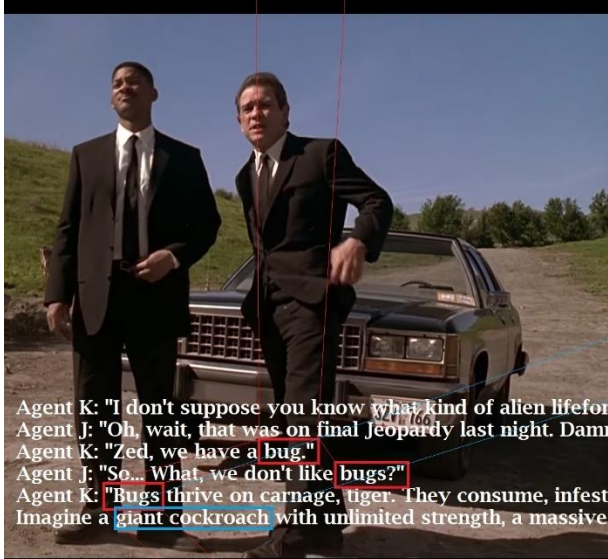

"BUGS!!!"

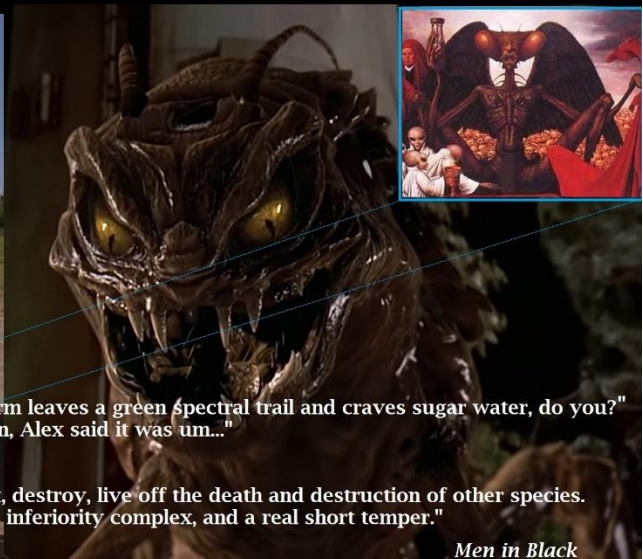

"The only good bug, is a dead bug."

**22nd Century Chinese**

The picture is resounding. A giant insect, a mix between a praying mantis and cockroach with human features, is holding an hourglass and a red cape. It's surrounded by four humans, one is bowing to it, a sign of submission, and four small nonhuman entities in white, reminiscent of angels holding a golden chalice. It's the center of the picture and attention. It's being worshipped. It's divine. Red is the color of blood. The human skulls in the background are indicative of death and bloodshed; a war won. The red cape resembles the Chinese flag, a hero's cape, a war hero. The hourglass a symbol for times up, or your time is coming. A powerful message by the victors to the humans. These "demonic aliens" are nothing more than descendants from the future because of the evolutionary path they had no choice but take that shed their human form.

## Conclusion

The COVID-19 pandemic was planned. Under the pretext of it, a culling of the population is occurring. Overpopulation is the primary reason, with global surveillance, economic restructuring, and genetic experimentation being others. Multiple objectives are being achieved. The list of culpable individuals includes world leaders and heads of intelligence agencies, extending to the military, governmental organizations, and private institutions because of the level of infiltration and control by secret societies. Though memed events in movies mirror the accuracy of events in the real-world, displaying planning and intent, time-viewing in some instances can't be ruled out, explaining why events differ: to avoid a cataclysmic paradox.

Open discussions by a committee of individuals in 1995 about the future of humanity instigated the Chinese into obtaining a means to defend themselves from a future mass genocide. Allowance of theft of intellectual property and data over decades by elites helped facilitate the perfect conditions for a virus release under the guise of an escape. Although China's active and offensive bioweapons program dates back several decades, intelligence agencies didn't address the root cause back then, allowing it to fester and gain momentum for what can be described as a bait-and-blame game, funding the Chinese with the intent to cause a pandemic.

The rush and administration of an ineffective vaccine serve as a perfect guise to inject and experiment with willing individuals. The lipid mRNA delivery system is suspended in a hydrogel (graphene oxide) that has multipurpose properties. Cellular mapping with the goals of understanding thought and neuropathway communication that would allow and aid in neuromodulation by a future state-of-the-art AI system seems to be the hidden purpose of the hydrogel, but weakening the immune system, thereby making it more susceptible to disease and different strains via a leaky vaccine can't be ruled out either as part of the culling. What's truly inside is difficult to discern.

Though the long-term effects of the vaccine are still unknown, speculation has fallen onto sterilization in men, infertility in women, ADE (Anti-body Dependent Enhancement), cognitive decline through neurodegeneration, and myocarditis as the major problems that will arise in the future from the synthetic spike protein and the hydrogel. Presently, considerable and deliberate misinformation and lies are precluding an accurate assessment of the side-effects, including whether exposure to a vaccinated individual by an unvaccinated individual can result in transfer of the RNA regulatory functions via viral shedding through skin contact, bodily fluid exchange, or a proximal field as part of a deliberately engineered transmissible viral vaccine.

In 2017, Deagle forecasted the reduction of America's population by approximately 70% in 2025, coinciding with the date the vaccination campaign is scheduled to end, and, coincidentally, the approximate number of current vaccinated individuals, explaining why leaders are pushing for at least one shot. The drastic reduction of the population, if the forecast is correct, would cause the breakdown of infrastructure and civil services that would

lead to chaos and civil war, allowing for more control to be implemented and the complete restructuring of economies, states, and countries, fitting with the Masonic motto Ordo Ab Chao (Order out of Chaos) and allowing a New World Order to rise.

"...if we get, which we will, to the goals that the President has established, namely if we get **70%** of the people vaccinated by the 4th of July, namely one single dose and even more thereafter..." - Tony Fauci (May 9, 2021)

## 1<sup>st</sup> Lesson: You Won't Know It's Here Until It's Too Late

With regard to COVID-19, we're learning that stealth in the form of asymptomatic transmission is this adversary's secret power.<sup>284</sup>

— RADM Bruce Gillingham, Surgeon General of the Navy

There's a common misconception that we'll be fighting hordes of zombies with our guns and blades, locked in a life and death struggle while fending off the infected, like Hollywood paints, and then emerge as the sole survivors in a post-apocalyptic world. But that's just an illusion. Becoming infected before we know it and succumbing to a virus that's a million times smaller, that's the reality. Not the battle you envisioned, huh? That statement isn't meant to induce fear or panic. Rather, it's to increase insight and situational awareness, affording those willing the information, tools, and mindset to truly come out on top.

The media will not report on an outbreak in time or may not report on it at all. A stealthy virus, and a scramble to secure supply lines and medical supplies to combat it, will result in radio silence from the government and military. The first goal of any country is to ensure continuity of government and operations so that if a release was truly an act of war or a terrorist attack, it will not cripple and destroy the nation. As a result, it's the duty of every citizen to be aware of the unseen threat and its potential. To combat an invisible enemy is much harder than to fight one that can be seen. Instead of a mass panic that results in far greater damage than the actual virus, a well-informed and prepared society can buy enough time and tackle the issue without a substantial loss of life.

The L clade of SARS-CoV-2 was discovered sometime between November/December of 2019, but evidence from scientific studies indicates the S and O clades were in circulation well before. The mysterious vaping illness that started in the U.S. in April of 2019 alludes to the starting point of the pandemic, but a clear depiction as to when the outbreak officially began is difficult to discern. While the media covered the event with great interest, nobody linked it or told the truth about what was happening. Even Wuhan officials kept Beijing in the dark for weeks about the L clade,<sup>285</sup> the result of a top-down Communist structure. And when local officials couldn't cover it up any longer, the CCP then took the initiative to suppress the evidence.<sup>286, 287</sup> Brave attempts of men and women who initially came forward to warn of the impending dangers were obstructed. Voices were silenced—social media accounts were scrubbed—and arrests were made.<sup>288-290</sup> Even when news reached the appropriate agencies, organizations, and individuals, proper precautions weren't taken to stop the spread. A globalized economy, with feelings and international relations, requires care and a delicate approach. Shutting down economies and countries' borders are costly things. Some may take offense, and others may never recover.

Even a lockdown of Wuhan wasn't enough to contain the mass exodus which scattered so many infected across the world,<sup>291</sup> prompting the question: Would the lockdown have mattered? Yes. A lockdown, while a draconian measure, should, in theory, control the spread of an infectious disease. Any proactive measures taken as early as possible to stop the spread should alleviate the burden of impact, flattening the curve. But studies have provided conflicting information, with some showing lockdowns didn't help contain COVID-19 at all.<sup>292</sup> And if all it takes is one individual or an unconventional method of release and transmission such as a mouse, an insect through entomological warfare, or nanotechnology, to propagate the infection to the point where an outbreak is uncontrollable and millions are infected while asymptomatic, then lockdowns will not work. They can buy time but will not prevent the inevitable, especially with a virus that has a long incubation period.

SARS-CoV-2's incubation periods varied, ranging from 2.1–11.1 days in some studies,<sup>293</sup> and exceeding 14 days in others,<sup>294</sup> with outliers going as high as 27 days.<sup>295</sup> According to a study in *The Lancet*,<sup>296</sup> highlighted by the *Miami Herald*, researchers looking at cases in China said patients could spread the virus for up to 37 days after they start showing symptoms.

*"The shortest observed duration of viral shedding among survivors was 8 days, whereas the longest was 37 days," the researchers said.*

On average, survivors still had the virus in their respiratory system for about 20 days and could presumably continue to spread the disease.<sup>297</sup> But different strains of the virus can linger longer, with high viral loads detected in a middle-aged man for 49 days.<sup>298</sup> The dilemma is clear, raising another question: Can viruses be specifically designed to remain undetected for months or longer and shed for extended periods, thereby allowing a timeframe for maximum propagation, exposure, and infection? Yes.

Because of the scope and pervasive threat of bioweapon programs, the secrecy surrounding them, the difficulty of tracking them, and advancements that have been made over the years in biotechnology, equivalent to exponential leaps; coupled with nonexistent and deficient biosecurity controls that cannot quickly, easily, or efficiently detect a release and infection guarantees a mass paralyzation event of the population without any warning signs. A significant percentage of the populace could already be infected with a binary biological agent that is awaiting the secondary part to trigger it, or "Pathogen X." The frightening reality of such scenarios, however, should only be second to the fact that we're still alive and can take steps to develop methods and tools to persevere in the face of such adversity. *The Darker Bioweapons Future*, a 2-page unclassified CIA report written almost 20 years ago, highlights the serious problems with tracking bioweapon programs and the obstacles that can arise from stealth and designer viruses.

## The Darker Bioweapons Future

3 November 2003

A panel of life science experts convened for the Strategic Assessments Group by the National Academy of Sciences concluded that advances in biotechnology, coupled with the difficulty in detecting nefarious biological activity, have the potential to create a much more dangerous biological warfare (BW) threat. The panel noted:

- The effects of some of these engineered biological agents could be worse than any disease known to man.
- The genomic revolution is pushing biotechnology into an explosive growth phase. Panelists asserted that the resulting wave front of knowledge will evolve rapidly and be so broad, complex, and widely available to the public that traditional intelligence means for monitoring WMD development could prove inadequate to deal with the threat from these advanced biological weapons.
- Detection of related activities, particularly the development of novel bioengineered pathogens, will depend increasingly on more specific human intelligence and, argued panelists, will necessitate a closer—and perhaps qualitatively different—working relationship between the intelligence and biological sciences communities.

### **The Threat From Advanced BW**

In the last several decades, the world has witnessed a knowledge explosion in the life sciences based on an understanding of genes and how they work. According to panel members, practical applications of this new and burgeoning knowledge base will accelerate dramatically and unpredictably:

- As one expert remarked: “In the life sciences, we now are where information technology was in the

1960s; more than any other science, it will revolutionize the 21<sup>st</sup> century.”

Growing understanding of the complex biochemical pathways that underlie life processes has the potential to enable a class of new, more virulent biological agents engineered to attack distinct biochemical pathways and elicit specific effects, claimed panel members. The same science that may cure some of our worst diseases could be used to create the world’s most frightening weapons.

The know-how to develop some of these weapons already exists. For example:

- Australian researchers recently inadvertently showed that the virulence of mousepox virus can be significantly enhanced by the incorporation of a standard immunoregulator gene, a technique that could be applied to other naturally occurring pathogens such as anthrax or smallpox, greatly increasing their lethality.
- Indeed, other biologists have synthesized a key smallpox viral protein and shown its effectiveness in blocking critical aspects of the human immune response.
- A team of biologists recently created a polio virus *in vitro* from scratch.

According to the scientists convened, other classes of unconventional pathogens that may arise over the next decade and beyond include binary BW agents that only become effective when two components are combined (a particularly insidious example would be a mild pathogen that when combined with its antidote becomes virulent); “designer” BW agents created to be antibiotic resistant or to evade an immune response; weaponized gene therapy vectors that effect permanent change in the victim’s genetic makeup; or a “stealth” virus, which could lie dormant inside the

UNCLASSIFIED

victim for an extended period before *being* triggered. For example, one panelist cited the possibility of a stealth virus attack that could cripple a large portion of people in their forties with severe arthritis, concealing its hostile origin and leaving a country with massive health and economic problems.

According to experts, the biotechnology underlying the development of advanced biological agents is likely to advance very rapidly, causing a diverse and elusive threat spectrum. The resulting diversity of new BW agents could enable such a broad range of attack scenarios that it would be virtually impossible to anticipate and defend against, they say. As a result, there could be a considerable lag time in developing effective biodefense measures.

However, effective countermeasures, once developed, could be leveraged against a range of BW agents, asserted attendees, citing current research aimed at developing protocols for augmenting common elements of the body’s response to disease, rather than treating individual diseases. Such treatments could strengthen our defense against attacks by ABW agents.

**Implications for Warning**

The experts emphasized that, because the processes, techniques, equipment and know-how needed for advanced bio agent development are dual use, it will be extremely difficult to distinguish between legitimate biological research activities and production of advanced BW agents.

- The panel contrasted the difficulty of detecting advanced bioweapons with that of detecting nuclear weapons, which has always had clear surveillance and detection “observables,” such as highly enriched uranium or telltale production equipment.

Consequently, most panelists argued that a qualitatively different relationship between the government and life sciences communities might be needed to most effectively grapple with the future BW threat.

They cited the pace, breadth, and volume of the evolving bioscience knowledge base, coupled with its dual-use nature and the fact that most is publicly available via electronic means and very hard to track, as the driving forces for enhanced cooperation. Most panelists agreed that the US life sciences research community was more or less “over its Vietnam-era distrust” of the national security establishment and would be open to more collaboration.

- One possibility, they argued, might be early government assistance to life sciences community efforts to develop its own “standards and norms” intended to differentiate between “legitimate” and “illegitimate” research, efforts recently initiated by the US biological sciences community.
- A more comprehensive vision articulated by one panelist was for the bioscience community at large to aid the government by acting as “a living sensor web”—at international conferences, in university labs, and through informal networks—to identify and alert it to new technical advances with weaponization potential. The workshop did not discuss the legal or regulatory implications of any such changes.

This is where DARPA’s biochip comes into play as a solution and biosurveillance tool that has full discretionary power in detection and treatment of future ABWs against soldiers and civilians, which raises its own scientific, ethical, and philosophical questions. (Transhumanism)

It is not at all unreasonable to contemplate the fabrication of a DNA chip containing all of the predicted coding sequences from multiple isolates of the most important human, animal and plant pathogens as a first step in the development of new detection technologies...The ability to quickly identify and characterize a potential biowarfare agent in a single assay will greatly reduce the delays inherent in current detection methods. This future scenario could serve as a possible deterrent to the deployment of biowarfare agents if the verification of an attack and the identification of an infectious agent can be accomplished quickly, allowing for a rapid and highly effective response.

## 2<sup>nd</sup> Lesson: Governments Will Lie to Contain the Panic

The most terrifying words in the English language are: I'm from the government and I'm here to help.

— Ronald Reagan

Running and maintaining countries are difficult things. Order and economic stability are the goals. They may at times, and often do, outweigh the need to know as to what exactly is happening, despite the need and people's wanting desire. One could argue that a well-informed society could make rational decisions, assist and care for one another, rising to the occasion when the situation calls for it—but that would depend on the country and the values ingrained in those citizens. If history has taught us anything: people are panicky creatures. Several behavioral foundations are nonexistent or ingrained in all like they are in some. The ability of the collective to come together is absent when people are trained to only care about themselves. Couple that with years of oppression and lies, and you have the formula for civil disobedience. Some will not hesitate to steal and kill if a breakdown of social services occurs. Rioting, mass religious hysteria, and panic would ensue by those that aren't prepared to handle such an event. Because of that, the government may make the decision and lie, taking the risk of sacrificing tens of thousands, if not hundreds of thousands of people, to ensure that in such scenarios, an outbreak doesn't stop the clockwork; business as usual. To put it plainly: when weighing hundreds of thousands of lives against millions and the very survival of a country, it's a simple math problem; the needs of the many outweigh the needs of the few. As horrific as that sounds, it's better to come to terms with reality now. Leaders are faced with difficult decisions, and their goal is to ensure their country's survival. Without an economy, a country is dead.

# Florida newspaper investigation finds state government misled public on Covid as cases rose

**Governor Ron DeSantis and his administration ‘suppressed facts’ and ‘dispensed dangerous misinformation’, according to paper**

Florida this week became the third US state **to record** a million coronavirus cases and yet the public there has been misled by state leadership about the extent and dangers of the pandemic, especially in the run-up to the presidential election, an investigation has concluded.

# Turkish government lied on COVID-19 infection and death statistics

Ulaş Ateşçi

© 2 October 2020

The COVID-19 pandemic's resurgence in Turkey is intensifying, due to President Recep Tayyip Erdoğan's back-to-work campaign, supported by the bourgeois opposition parties and the union bureaucracy. Officially, around 1,500 new infections are recorded daily, and the total number of COVID-19 patients has reached 315,000. The daily death toll is between 65 and 70, and total deaths have passed 8,100.

On Wednesday, however, Health Minister Fahrettin Koca confirmed widespread suspicions that the Turkish government has deliberately lied to the public in order to downplay the severity of the pandemic and force workers back to work.

<https://www.wsws.org/en/articles/2020/10/02/turk-o02.html>

To capture more lies; the WHO's field visit to Wuhan, China, on January 20<sup>th</sup>–21<sup>st</sup> of 2020, netted the following information:

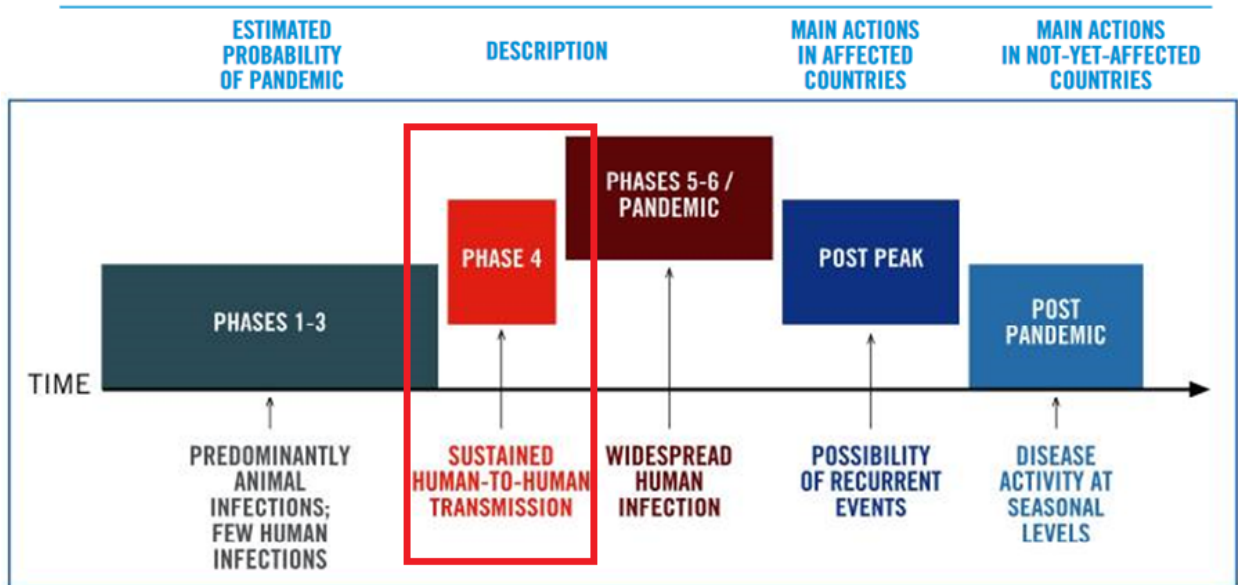

*"Data collected through detailed epidemiological investigation and through the deployment of the new test kit nationally suggests that **human-to-human transmission is taking place** in Wuhan."*

At that point, SARS-CoV-2 (L clade) had been spreading and ravaging the province for almost two months. On January 23<sup>rd</sup>, the WHO indicated it wouldn't declare SARS-CoV-2 a global emergency,<sup>299</sup> a decision it then reversed seven days later, on January 30<sup>th</sup>, 2020. According to an article in Noted:

“The reason for caution<sup>300</sup> is that declaring a global public health emergency can unnecessarily affect trade and tourism and imply that a country cannot control the disease on its own.”<sup>301</sup>

But what the WHO did was play favorites. It didn't follow the *Pandemic Influenza Preparedness and Response* guidelines that it wrote.<sup>302</sup> So on January 22<sup>nd</sup>, but likely earlier, when the WHO already knew it was at a pandemic phase 4, heading into or already at phase 5-6, it didn't act, waiting until January 30<sup>th</sup> for the initial announcement of a Public Health Emergency of International Concern, and then until March 11<sup>th</sup>, 2020, to finally declare SARS-CoV-2 a Global Pandemic. That's because it was asked by China to cover it up, according to German intelligence.<sup>303</sup> The political correctness used was a distortion of the truth. A Public Health Emergency of International Concern was a nicer way of saying a Global Pandemic. Dumbing it down bought China time. That's why Taiwan called out the WHO and accused it of dereliction of duty.<sup>304</sup>

**TABLE 3  
WHO PANDEMIC PHASE DESCRIPTIONS AND MAIN ACTIONS BY PHASE**

<b>PHASE 4</b>	Medium to high	Human-to-human transmission of an animal or human-animal influenza reassortant virus able to sustain community-level outbreaks has been verified.	Rapid containment.	Readiness for pandemic response.
<b>PHASE 5</b>	High to certain	The same identified virus has caused sustained community-level outbreaks in at least two countries in one WHO region.	Pandemic response: each country to implement actions as called for in their national plans.	Readiness for imminent response.
<b>PHASE 6</b>	Pandemic in progress	In addition to the criteria defined in Phase 5, the same virus has caused sustained community-level outbreaks in at least one other country in another WHO region.		

[https://apps.who.int/iris/bitstream/handle/10665/44123/9789241547680\\_eng.pdf](https://apps.who.int/iris/bitstream/handle/10665/44123/9789241547680_eng.pdf)

Rapid containment could've saved lives but wasn't implemented rapidly enough, allowing 5,000,000 people plenty of notice to escape and infect others all over the world, condemning innocents. Due to obvious partiality, the WHO must be investigated,<sup>305-307</sup> in addition to several other organizations and agencies all across the world: their role diminished until their restructuring and newly appointed members deem the safety of the entire world their priority.

As the virus spread during the December/January timeframe, keep in mind the long incubation period. Trade and tourism were allowed to continue despite the risk for loss of life, property, and economic status, rather than preserving and protecting what remaining life and infrastructure were left because it would've negatively impacted all economies. That is the price of globalism.

After the WHO's declaration on January 30<sup>th</sup>, there was chatter once again on 4Chan's /pol/,<sup>308</sup> indicating WHO and CDC members were already aware of the seriousness of this virus well beforehand: that it was more lethal in its current form, with an R naught ( $R_0$ ) of  $\sim 6$ , not an  $R_0$  of 2.2–3.4 as was publicly indicated.<sup>309</sup> Furthermore, the potential to mutate into a deadlier strain due to its mutagenic propensity and once it reached certain bat populations in South America was also discussed.

So I'm kind of glad I didn't say anything about it two days ago when I was tempted to post but I knew about this ahead of time. I decided against posting on Tuesday that WHO was about to

declare a global emergency but I've still had mixed feelings and I can't be easily identified at this point so I'll let you know now /pol/ that it's way worse than what you're being told. I'll preface this by saying I work in finance and have friends and family in the medical industry and field, including at CDC and one close friend at WHO.

For starters the Ro (pronounced R naught) is actually around 6, not 3. Secondly it's slightly more lethal in current form, with China covering up a LOT of the deaths by passing them off as heart attacks, pneumonia, kidney failure, all sorts of official causes to hide the real numbers. CDC and WHO are highly aware of this. You will also hear the phrase "confirmed cases." It's presently thought by epidemiologists that China surpassed 120,000 cases on Tuesday at the lowest; it is also possible they hit 100k over a week ago. All they know for sure is China definitely had at minimum 120,000 infections by Tuesday.

There are very high profile investors who've been silently pulling out ahead of time. Travel and tourism, the hospitality and service industries, these are just the most immediate and obvious. Manufacturing is about to go on a wild ride. The only "safe" industries to invest in right now are the biomedical fields and plastics oddly enough. Virtually all other industries are going to be massively hit and anybody in the know has been trying to do this as quietly as possible before SHTF partly to avoid insider trading allegations but more importantly to not start a panic.

This is also why CDC and WHO is hiding it. So far as they are concerned, no matter how bad the disease is, a panic is always going to be worse. This is also why a lot of economists are downplaying it or outright lying to you. in the next year or two.

[Anonymous](#) ID:nQzQS2i3 Thu 30 Jan 2020 21:42:29 No.241674181 [Report](#)

Quoted By: >>241696077

In the coming months the disease is going to be sustaining infections globally including sustained local infections in virtually every major metropolitan center on earth by late May. US CDC and WHO are both projecting anywhere from 60,000 to 2 million deaths by early summer. Again, they are downplaying this because 2 million is not considered to be a lot of people, but that's under their assumption that they can stall the infections in every major urban zone.

Now for the bad part. They are expecting this thing to mutate further. Those results from the Australian lab are not good. This virus has a very high propensity to mutate into a highly lethal form and WHO is predicting a fairly probable likelihood that if it reaches certain bat populations in Brazil that it can jump to a 15% lethality rate. That means that the minute you hear about Rio or Brasilia or wherever reporting cases you need to immediately make sure you've got a month worth of supplies because it's going to start killing many millions of people. So far as people like WHO are concerned who deal with numbers like that all the time this isn't major and they're more concerned about lying to you that everything is not that bad because their calculus is that more people will die from refusing to seek medical treatment for anything from cancer to heart disease or other illnesses from hysteria over getting infected with this nCoV.

If the WHO and CDC knew this in January, why didn't they raise the red flag immediately? Because money makes the world go 'round. The economic repercussions outweighed the risk for the loss of life and panic it would've generated. Economies aren't equipped to handle such events. People are economic cannon fodder, nothing more. But at least those who knew were kind enough to give their family and friends a heads up.

To verify if what was said by an anonymous source was true, comparison and analysis to the events was done.

On April 7<sup>th</sup>, 2020, an article titled *High Contagiousness and Rapid Spread of Severe Acute Respiratory Syndrome Coronavirus 2* was released early on CDC's website, with the actual release date slated for July of 2020.<sup>310</sup> In it, the authors calculated the median  $R_0$  of SARS-CoV-2 at 5.7, corroborating that anonymous user's post over two months later. And that's just the median.

### Abstract

Severe acute respiratory syndrome coronavirus 2 is the causative agent of the 2019 novel coronavirus disease pandemic. Initial estimates of the early dynamics of the outbreak in Wuhan, China, suggested a doubling time of the number of infected persons of 6–7 days and a basic reproductive number ( $R_0$ ) of 2.2–2.7. We collected extensive individual case reports across China and estimated key epidemiologic parameters, including the incubation period. We then designed 2 mathematical modeling approaches to infer the outbreak dynamics in Wuhan by using high-resolution domestic travel and infection data. Results show that the doubling time early in the epidemic in Wuhan was 2.3–3.3 days. Assuming a serial interval of 6–9 days, we calculated a median  $R_0$  value of 5.7 (95% CI 3.8–8.9). We further show that active surveillance, contact tracing, quarantine, and early strong social distancing efforts are needed to stop transmission of the virus.

Remember, the most optimistic prediction at this point is 60,000 people are going to get killed in the next few months. It's highly infectious with an R6, probable chance of further mutations, infectious during the prodromal phase, and it's airborne. The only reason you're not already seeing thousands of people confirmed outside of China yet is because the incubation period but believe me the WHO is already talking about how "problematic" modeling the Chinese response in Western countries is going to be, and the first country they want to try it out in is Italy. If it begins a large outbreak in a major Italian city they want to work through the Italian authorities and world health organizations to begin locking down Italian cities in a vain attempt to slow down the spread at least until they can develop and distribute vaccines, which btw is where you need to start investing.

The not just bad but scary case scenario is that they fail to contain it and that it also mutates in South America. This is going to be far, far worse than the Spanish flu if that happens and it's going to completely crash the global economy. This is concerned by world health authorities to be "only" 20.6-7% probable of happening however so as far as they're concerned they're taking it one step at a time not to start a panic, but it is estimated a one in five chance of over a hundred million people dying in the next year. Redfield is aware of this along with some other top American CDC staff and triaging the situation the situation according to that logic. Ask Kyle about this when you've got a chance. European health authorities do not seem fully debriefed on all this yet but WHO as far as I'm aware is where the numbers themselves mostly originated along with the models.

## Why Italy was hit so hard and so fast by COVID-19

Lessons learned from Italy's pandemic as death toll reaches 1,800

Terence McKenna · CBC News Posted: Mar 16, 2020 4:00 AM ET | Last Updated: March 16

WIRED

MATT SIMON SCIENCE 03.17.2020 07:00 AM

## Why the Coronavirus Hit Italy So Hard

The country has the second-oldest population on earth, and its young mingle more often with elderly loved ones.

In less than a month, Italy went from having only three cases of the coronavirus to the highest number of cases and deaths outside of China.<sup>311</sup> That was done intentionally for the strategic, economic, and geopolitical reasons mentioned earlier. And because of its aging population in a densely populated area, the social closeness of the society, in addition to an overabundance of Chinese tourists;<sup>312</sup> it was the perfect test bed in a western country, to see how a stealthy virus would impact it and spread, and how well the population would react, comply, and how effective orders of a lockdown would be to stem the spread of the outbreak. 3 for 3. Prophetic. That source was credible.

### 3<sup>rd</sup> Lesson: Freedoms, Along with Constitutional Rights and Privacy, Will Be Violated

A freedom given up is not so easily regained.

— Rivera Sun

**G**overnments around the world are using the COVID-19 pandemic as an excuse to restrict freedoms, punish independent news operations and attack minorities, according to a global survey by Freedom House, the U.S.-based nonprofit known for its annual assessment of global democracy. <https://time.com/5895315/covid-19-pandemic-democracy/>

Panics from pandemics unleash unchecked governmental power.<sup>313, 314</sup> National emergencies coincide with infringement of constitutional rights. Declarations of, are generally done for what the government deems the greater good, to protect life, property and ensure some semblance of stability. Does that mean everything will play out perfectly and according to plan? No. In fact, laws [42 U.S. Code § 5207] already exist pertaining to cases where the government overstepped its bounds, prohibiting such actions in the future, but alone aren't enough and don't cover all the bases. Laws on the federal level aren't a blanket cover for protection. States can still infringe as well. While national emergencies can serve as the government's way of making a grab, does this mean that local, state, and federal governments will come to take people's things? It's difficult to answer that question. Physical collections, while the big thing people fear are seldomly done. Veiled infringements are what's more likely, eroding rights with laws that barely make it noticeable.<sup>315</sup> And with so much chaos and an inability to gather to challenge them peacefully in person, trampling a person's rights can become very easy digitally. The powers afforded to federal, state, and local governments in such times will be the key factor in determining how things play out. A lot of things occur behind the scenes, but a lack of transparency is what raises the red flag and forces suspicions that things aren't done with the people's best interests in mind. One of the most important things to do is to pay attention to legislation that's written before, during, and after national emergencies, for it will stipulate what powers and how much control is given to the Mayor, Governor, governmental agencies, and the military during such times. A good example of an infringement is Mayor Deborah Frank Feinen's declaration of emergency in Champaign, Illinois.<sup>316</sup> The order had some overreaching powers and verbiage incorporated into it. For example.

- (8) (a) Order City employees or agents, on behalf of the City, to take possession of any real or personal property of any person, or to acquire full title or such lesser interest as may be necessary to deal with a disaster or emergency, and to take possession of and for a limited time, occupy and use any real estate to accomplish alleviation of the disaster, or the effects thereof;
- (b) In the event any real or personal property is utilized by the City, the City shall be liable to the owner thereof for the reasonable value of the use or for just compensation as the case may be.

If taking property without due process is afforded protection against in the U.S. constitution, would it be considered an overexertion of powers to take control of it in times of great unknown? Yes. But unfortunately, legally it might be allowed for that locality. That's where a constitutional lawyer is needed to examine the full scope of such an order and its potential. Cases resulting from it may also be used to set future legal precedence in other jurisdictions. While no reports of personal property seizure have been reported at the time of this writing, it's important to consider the implications of such powers. These are questions that must be asked and addressed. Other examples include The Justice Department's request to Congress for the ability to ask chief judges **to detain people indefinitely without trial during emergencies** as part of a push for new powers that came as the coronavirus spread through the U.S.<sup>317</sup> The department was also looking to change the Federal Rules of Criminal Procedure, and in some cases, expand the use of videoconference hearings, and to let some of those hearings happen without the consent of the defendant, according to draft legislative text.

When things move a mile a minute under national emergencies and with so much uncertainty, it's very easy to trample someone's rights. What's to say that an innocent person won't be indefinitely detained for simply walking down the street during a curfew to get some fresh air and as a sanity check, and then die in some cell because the officer or agent that detained them fell ill, forgot they were there, or couldn't provide the level of protection and healthcare needed if that individual fell ill? A balance needs to be struck, maintaining our rights and freedoms while ensuring those that protect us from harm remain unharmed during such times. While some may rush to give their rights away, sacrificing freedom for security during events of great uncertainty, it's always important to proceed with caution. Eternal vigilance is the price for freedom. But freedom isn't the only thing under siege. Privacy is as well.

Contact tracing, for example, is a very beneficial, important, and powerful tool to determine the origin of the outbreak.<sup>318</sup> Was it a bioterrorist attack? Espionage or an act of war by a foreign nation? Who is responsible? But what happens to surveillance tools that have been developed and pushed on all the smartphones? According to computer science professor Jaap-Henk Hoepman, this will turn smartphones into "*pocket Stasi agents*."<sup>319</sup> These surveillance tools and systems aren't simply going to go away after.<sup>320</sup> So how is the need between a legitimate concern to find the root cause of the infection, to a mass surveillance system that spies on citizens before, during and after, balanced? Are people to trust

someone's word that the data collected and stored is "anonymized" and will remain "anonymized"? No. Science says they can't and shouldn't. Google, as another example, has tools that rely on "aggregated and anonymized sets of data" that the company collects through Google Maps and other apps.<sup>321</sup>

*"Reidentification science disrupts the privacy policy landscape by undermining the faith that we have placed in anonymization," Ohm writes. "This is no small faith, for technologists rely on it to justify sharing data indiscriminately and storing data perpetually, all while promising their users (and the world) that they are protecting privacy. Advances in reidentification expose these promises as too often illusory."<sup>322</sup>*

According to an article in Techdirt, research published in 2019 in the journal of Nature Communications<sup>323</sup> showed that data scientists from the Imperial College London and UCLouvain found that it wasn't particularly hard for companies (or anybody else) to identify the person behind "anonymized" data using other data sets. More specifically, the researchers developed a machine learning model that was able to correctly re-identify 99.98% of Americans in any anonymized dataset using just 15 characteristics including age, gender and marital status.<sup>324</sup> Is privacy the cost for safety and security?<sup>325</sup> One of them. Some states were even considering a GPS tracker to enforce the quarantine order.<sup>326</sup> Nothing says and shows love more than a personal tracking device on your wrist or ankle to monitor your every move, 24/7. I hope the sarcasm with which the previous sentence was written was evident.

Are text-based notifications and push alerts the new informal communication method and way of infringing civil liberties/ruining people's lives?<sup>327</sup> Yes. How does someone know that they've actually come in contact with an infected individual just because they received a text that says they have, which then instructs them to start quarantining? How do people trust an electronic system whose purpose seems to be much more nefarious than they are led to believe?<sup>328</sup> What if the text turns out to be wrong? Are they simply to forgive the time spent alone in quarantine contemplating the facts of life and how they arrived at that situation? Then again, what if the notification turns out to be right? What if as an infected carrier, they ignore the warning and endanger others? Who's really responsible?

In 2018, residents of Hawaii furiously asked why it took officials a whole 38 minutes to correct a missile threat warning that was sent out accidentally, sparking panic across the state.<sup>329</sup>

If an accidental text message from a state's emergency alert system can cause so much trouble and panic, what about texts from Chinese agents spreading misinformation campaigns within the U.S. during the pandemic?<sup>330, 331</sup> Although screenshots from an anonymous source on 4Chan were used in the previous lesson learned, the information was vetted before being presented. How can one vet something that's passed from a friend to a friend, in the moment nonetheless. We trust friends and family more than others, but what happens if they're duped or get it wrong? What if the very electronics and systems we rely on, are usurped by someone else, don't work as intended, or are taken down when needed most? How will we obtain information? Who do we trust?

Turning our back on technology isn't the answer, nor is allowing it full access to our daily lives. With so much of it in use, it's not a surprise that even domestic law enforcement agencies will fall victim and aid a foreign government in surveillance and data collection of U.S. citizens and assets through the use of their drones, allowing them to see how well a country responds to a pandemic.<sup>332, 333</sup> On the issue of privacy, Elizabeth, N.J. Mayor J. Christian Bollwage, said this.

*"If these drones save one life, it is clearly worth the activity and the information that the drones are sending."*

It's clear privacy isn't a concern for Mayor J. Christian Bollwage. Responses to, successes and failures during a pandemic, are intelligence opportunities that provide valuable information to a foreign adversary, especially if the pandemic is a precursor to war or a future attack. An intelligence bulletin produced by the DHS Counterintelligence Mission Center on April 6<sup>th</sup>, 2020, highlighted the issue of Russian intelligence services monitoring U.S. actions, saying.

*"Intelligence collection on medical supply chain vulnerabilities could inform future operations aimed at weakening key logistical elements in preparation for a wartime attack, or opportunistically during an emergency."*<sup>334</sup>

But law enforcement agencies aren't the only ones who will knowingly aid a foreign adversary. Tech giants don't have a problem with maintaining close ties and relationships with companies of foreign governments that are on the U.S. blacklist for human right's violations.<sup>335</sup> Money's, money.

A point in history has been reached where the seriousness of the threat has eroded the very freedoms men and women have laid down their lives to protect and ensure. To live life in fear from a very real but invisible enemy, or risk safety and that of others to truly be free, are now the only choices available. Although some will gladly take a dangerous freedom over a peaceful tyranny any day, others will not. At what point does a temporary sacrifice become a permanent compromise? At what point does compromise become enslavement. Freedom and privacy for safety and security are very high costs.

## 4<sup>th</sup> Lesson: Self-Quarantines Won't Work

We considered behaving, but it's against our nature.

— O.R. Melling, *The Book of Dreams*

Communist countries like China, that don't afford their citizens the same civil liberties and freedoms as the U.S., have one slight advantage: they can unilaterally sidestep to the left when a move is needed without having to care about what rights are trampled, oppressing their citizens by blocking off roads, and even welding the doors to their homes shut.<sup>336</sup> Compliance on a mass scale to orders of quarantines and enforcing lockdowns without the National Guard or police are very difficult in the U.S. and other western countries. Some individuals will not comply, endangering others and allowing the outbreak to propagate, making it last longer. All it takes is one bad apple, and unfortunately, there are plenty around the world. Some will not obey orders to stay quarantined, and others will knowingly spread the virus to infect as many as possible. There have been countless cases already.<sup>337-345</sup> A few excerpts below indicate the deliberate malicious intent of some and the lack of care of others.

# Aichi: Man infected with coronavirus goes to bars ‘to spread’ it

BY TOKYO REPORTER STAFF ON MARCH 7, 2020

AICHI (TR) – A man in his 50s in Gamagori City visited two bars after being confirmed as infected with the [novel coronavirus](#), city officials said on Thursday.

At around 6:00 p.m. the day before, medical personnel sent the man home after he was confirmed to be infected with the novel coronavirus, which causes a disease known as [COVID-19](#).

He was to remain at home until an appropriate medical institution was found for treatment. However, he decided to take a taxi to an *izakaya* bar, reports Fuji News Network (Mar. 6).

Before departing, he reportedly told a family member, “I am going to spread the virus.”

## A pizza worker's lie forced an Australian state of 1.7 million people into lockdown

By **Angela Dewan** and **Chandler Thornton**, CNN

🕒 Updated 6:46 AM ET, Fri November 20, 2020

The Woodville Pizza Bar in South Australia, pictured on Friday, was declared a hotspot for Covid-19.

**(CNN)** — A pizza bar worker with Covid-19 who lied about their employment activities triggered a lockdown across the entire state of South Australia, authorities were forced to admit Friday.

The state of 1.7 million people would not have gone into the six-day "circuit breaker" had the employee told the truth to a contact-tracing team, South Australia Premier Steven Marshall told reporters at a press conference. He announced the state had decided to lift its six-day lockdown early, based on new information.

<https://www.cnn.com/2020/11/20/australia/south-australia-pizza-bar-lockdown-intl/index.html>

Individuals that seek to do others harm are in abundance. The seriousness of the situation is graver than society is led to believe. According to Guo Wengui (Miles Guo), a Chinese billionaire dissident who currently has political asylum in the U.S.: Beijing's spy networks in the U.S. include up to 25,000 Chinese intelligence officers and more than 15,000 recruited

agents who have stepped their offensive capability since 2012.<sup>346</sup> His revelations occurred in 2017. It's likely and probable there are now more. Guo's close ties to the Ministry of State Security, the civilian intelligence service, and the military spy service of the PLA have made him a target of assassination attempts and extradition requests by the CCP.

*"I know the Chinese spy system very, very well," said Mr. Guo, speaking through an interpreter in his first American interview. "I have information about very minute details about how it operates."*

What his revelations don't factor in and cover are other foreign nations operatives, terrorist cells, drug cartels, human traffickers, hate groups, sympathizers, doomsday cults, and tens of thousands of other individuals that are all here in the U.S., ready to take advantage of the situation or strike when the time is right to ensure maximum casualties and the country's destruction. That is the seriousness of the situation. That is the potential for the situation to turn ugly very quickly.

But even those that were compliant and self-quarantined for the mandated period may find themselves unknowingly spreading the disease<sup>347</sup> if the virus sheds beyond 14 days, as mentioned in the 1<sup>st</sup> lesson. This questions the efficacy of quarantines. Regardless, the best thing to do in pandemics is to practice social distancing and ride out the outbreak with enough supplies on hand. Time is everything. Buying as much of it as possible is key. The longer an individual remains uninfected, the greater the chance the virus will burn itself out, a vaccine will be released, or therapeutic measures will be uncovered and implemented to combat it and help stop the spread, which increases the chance to live. For those thinking about intentionally infecting themselves, thereby receiving medical treatment in advance before supplies run out, it is strongly advised against it. That rationale pertains to common sense and the unknown rather than the known. Although some cases of SARS-CoV-2 were mild and people recovered without even knowing they had it, there were cases of people who recovered and then got reinfected.<sup>348</sup> With mutations occurring and the impacts of the virus unknown, both infection and reinfection could be very dangerous and a gamble that could cost everything. There may never be a cure. A full recovery may never be an option. The virus may damage the immune system, leaving it vulnerable to future threats, cause unknown damage to organs, the nervous system, and other structures, thereby leaving a person weakened or with lasting debilitating conditions and health problems, or in some cases: death. Staying uninfected frees up valuable resources to be used on those that weren't so fortunate, allowing levels of care that don't overwhelm and collapse the healthcare system.

## 5<sup>th</sup> Lesson: Panic Buying and Hoarding Will Lead to Shortages and Price Gouging

There's a difference between a blessed increase and greedy oversollicitous hoarding.

— E.A. Bucchianeri, Vocation of a Gadfly

Those that are unprepared and don't have the necessary supplies will panic buy.<sup>349</sup> Supplies will dwindle, leading to shortages. Not everyone will get what they need. From water to toilet paper, expect shortages of household items.

<https://finance.yahoo.com/news/covid-cases-surge-stores-face-170500625.html>

But some panic buying and hoarding will not be exactly “panic” buying, instead done strategically to deny critically needed resources and materials to those that need of it or as a means to make a quick buck (price gouging).<sup>350</sup>

As the outbreak propagates, expect countries to resort to baser instincts as survival mode kicks in, refusing to export materials and products to ensure their supply lines for their survival.<sup>351, 352</sup>

# Pandemic price gouging is a huge issue—but state laws to stop it are creating more problems than they solve

BY CHRISTOPHER E. ONDECK AND JENNIFER E. TARR

August 4, 2020 9:05 AM EDT

An artistic display of toilet paper dispensers is displayed at a winery on March 12, 2020, in Solvang, Calif. State laws to prevent price gouging during the COVID-19 pandemic create more problems than they solve, write Christopher E. Ondeck and Jennifer E. Tarr.

GEORGE ROSE—GETTY IMAGES

Media coverage of price gouging during the COVID-19 pandemic has focused predominantly on individuals hoarding much-needed supplies and reselling them for high prices online. State price gouging laws are designed to prevent such actions—they exist to prevent sellers from taking advantage of consumers during a temporary state of emergency. Typically triggered by natural disasters, they often have a short life span.

Such laws were not designed to deal with the length and national scope of the current pandemic. As states of emergency continue, law-abiding businesses and consumers are suffering unintended consequences.

It's always a good idea to have enough supplies for months and years. For those that are unable to purchase everything at once; Rome wasn't built in a day. Chip away. Create a list of

supplies that are truly needed and slowly build up from there. For those that can't afford it, check out local food banks, churches, and donation centers for the things that are really needed. If food is the main concern, save canned goods and items that last the longest. Think about planting a garden or aquaponics.

## A better way to grow

Aquaponics uses a recirculating process to grow and harvest plants, and farm fish. Fish waste works with the beneficial bacteria in gravel and plants, creating a recyclable, concentrated compost.

### 1

Wastewater is pumped from the fish run to the upper gravel bed, where the bacteria break down the impurities. What remains is nitrogen, an essential nutrient for plants. Watercress is planted in the gravel bed as a secondary method of filtering the fish-run water, as well as a variety of harvestable crops, including tomatoes and salad greens.

### 2

The upper gravel bed is slightly angled so the water flows away from the pump to a drainage system at the back of the bed. Once there, the water drains down to the lower gravel bed.

### 3

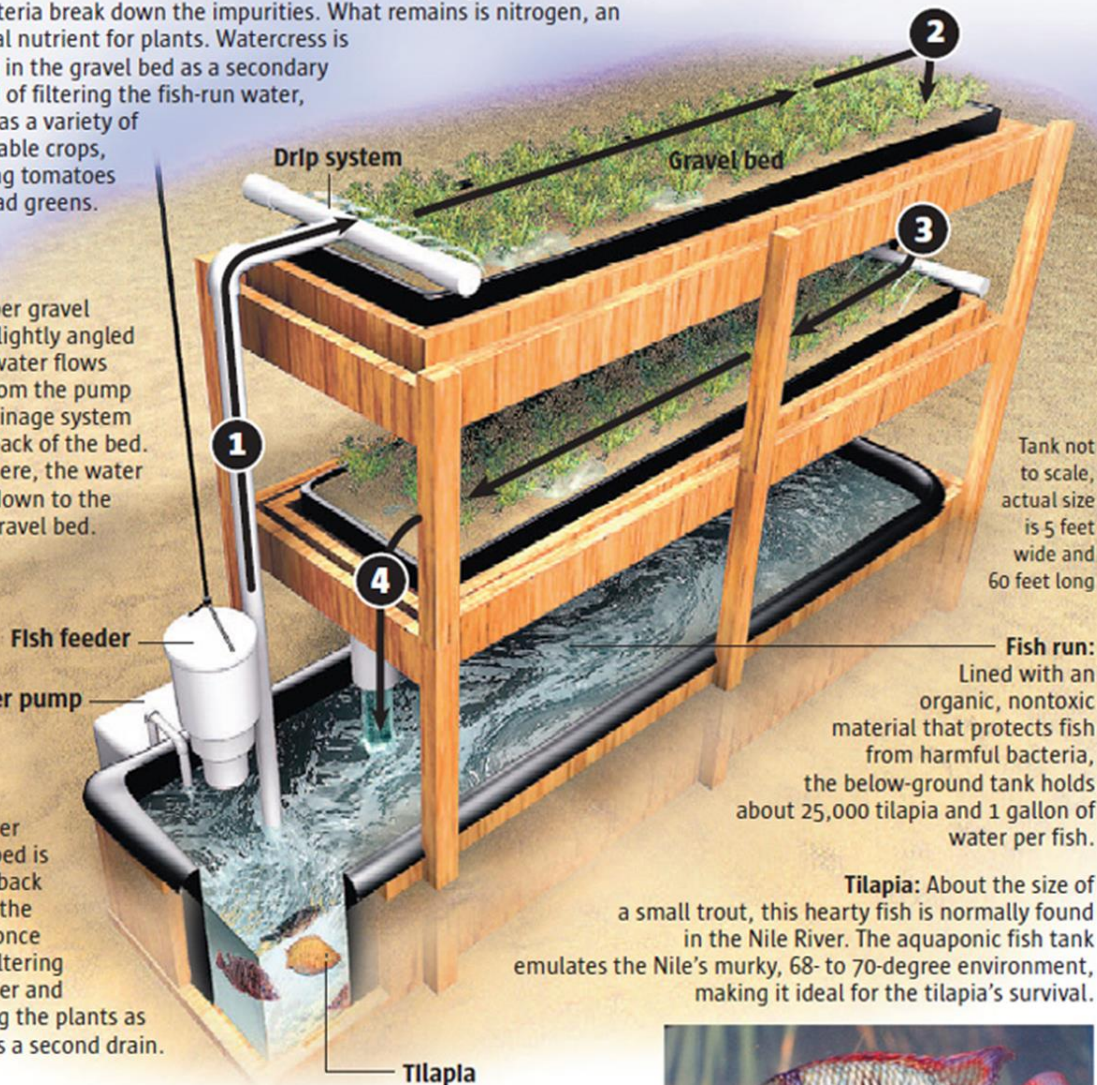

The lower gravel bed is angled back toward the pump, once again filtering the water and nitrating the plants as it enters a second drain.

### 4

The filtered water drains from the lower growing bed back into the fish run, and the cycle begins anew. Every nine months, the fish (tilapia and more recently yellow perch) are ready to be harvested.

*Additional text by Colleen O'Connor, The Denver Post*

*Source: Paul Tamburello, founder Urban Organics, Growing Power Inc.*

Tank not to scale, actual size is 5 feet wide and 60 feet long

**Fish run:** Lined with an organic, nontoxic material that protects fish from harmful bacteria, the below-ground tank holds about 25,000 tilapia and 1 gallon of water per fish.

**Tilapia:** About the size of a small trout, this hearty fish is normally found in the Nile River. The aquaponic fish tank emulates the Nile's murky, 68- to 70-degree environment, making it ideal for the tilapia's survival.

## How to grow 100 pounds of potatoes in 4-square feet. Potato boxes.

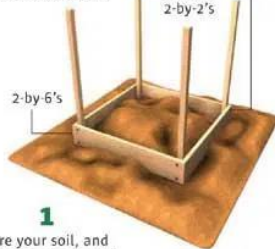

### Build a better spud box <https://www.denverpost.com/2010/04/07/potato-box-yields-scads-of-spuds/>

Developers of this potato box brag that some growers using the technique have harvested 100 pounds of potatoes in a season. If you want to give it a try yourself, you'll need lumber (pine, cedar or redwood are recommended), screws and a screwdriver or drill, soil and, of course, seed spuds.

#### Supply list:

Six 8-foot-long 2-by-6 inch boards cut into 12 21-inch sections and 12 24-inch sections  
One 12-foot-long 2-by-2-inch board cut into four 33-inch sections

Cut 2-by-2's into (4) 33-inch lengths  
Cut 2-by-6's into (12) 21-inch lengths  
and (12) 24-inch lengths  
96 2½-inch wood screws

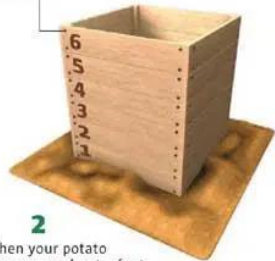

1

Prepare your soil, and build the box as shown. Fill the shallow box with soil, mulch or compost. Plant the potatoes about 4 inches deep.

Source: Irish Eyes Garden Seeds

Pre-drill holes, so wood can be removed and reattached while harvesting

2

When your potato vines grow about a foot above the soil, add another board and fill with more soil, covering no more than a third of the vine.

3

Continue the process until the box is completed.

4

Remove the bottom boards to harvest the older potatoes. The next harvest will be layer 2. The process continues until you reach the top boards.

Jonathan Moreno, The Denver Post

<https://www.familyfoodgarden.com/wp-content/uploads/2017/04/Growing-Potatoes-in-Containers.jpg>

With the money saved from having to buy food and other items, use it to purchase other essentials. Imagine if you couldn't buy something for months or ever again. What would you do if you couldn't purchase something you needed? What do you need that you could never live without? Ask yourself these questions. It'll help to create a list.

## 6<sup>th</sup> Lesson: Resources Will Be Strained and Limits Will Be Tested

The conflict between the will to deny horrible events and the will to proclaim them aloud is the central dialectic of psychological trauma.

– Judith Lewis Herman

Hospitals are threatening to fire health-care workers who publicize their working conditions during the coronavirus pandemic -- and have in some cases followed through.

Ming Lin, an emergency room physician in Washington state, said he was told Friday he was out of a job because he'd given an interview to a newspaper about a Facebook post detailing what he believed to be inadequate protective equipment and testing. In Chicago, a nurse was fired after emailing colleagues that she wanted to wear a more protective mask while on duty. In New York, the NYU Langone Health system has warned employees they could be terminated if they talk to the media without authorization.

# Grassley Urges HHS, FDA to Implement Unannounced Inspections of Foreign Drug Manufacturing Facilities

WASHINGTON – Senate Finance Committee Chairman Chuck Grassley (R-Iowa) sent a [letter](#) to Department of Health and Human Services (HHS) Secretary Alex Azar and Food and Drug Administration (FDA) Acting Commissioner Norman Sharpless urging them to reinstate unannounced inspections of prescription drug manufacturing facilities in foreign countries in light of the administration’s new “Safe Importation Action Plan” as well as the fact that these facilities provide most of the ingredients for production inside the United States. Therefore, it’s important to determine more accurately if these facilities meet set standards of quality and safety for both domestic and importation purposes.

“Unbeknownst to many consumers... 80 percent of Active Pharmaceutical Ingredients are produced abroad, the majority in China and India; however, the FDA only inspected one in five registered human drug manufacturing facilities abroad last year,” Grassley wrote.

## Why the Strategic National Stockpile isn't meant to solve a crisis like coronavirus

The country's largest repository of drugs and medical equipment is designed to be used as a stopgap – not a solution – during emergencies.

— Bob Delaney moves a pallet of surgical masks at an undisclosed location in Utah as part of the Strategic National Stockpile in April 2009. The masks are to be used in case of an epidemic or a pandemic.

Francisco Kjolseth / Salt Lake Tribune via AP file

March 28, 2020, 6:11 AM EDT

By Sarah Fitzpatrick

As health care workers around the country labor under shortages of personal protective equipment, all eyes are on the Strategic National Stockpile – the country's largest repository of drugs and medical equipment for use in a public health crisis.

But the U.S. strategic stockpile isn't intended to be the solution to a crisis. It's designed to be used as a stopgap during emergencies. The stockpile has limited resources, government officials and public health experts say, which weren't at full capacity even before the coronavirus was on the horizon.

# New Jersey Pleas for COBOL Coders for 40-Year-Old Mainframes Amid Coronavirus Crunch

By Paul Alcorn April 05, 2020

Dusting off the 'ol programming manual from 1960

      Comments (58)

(Image credit: Tom's Hardware)

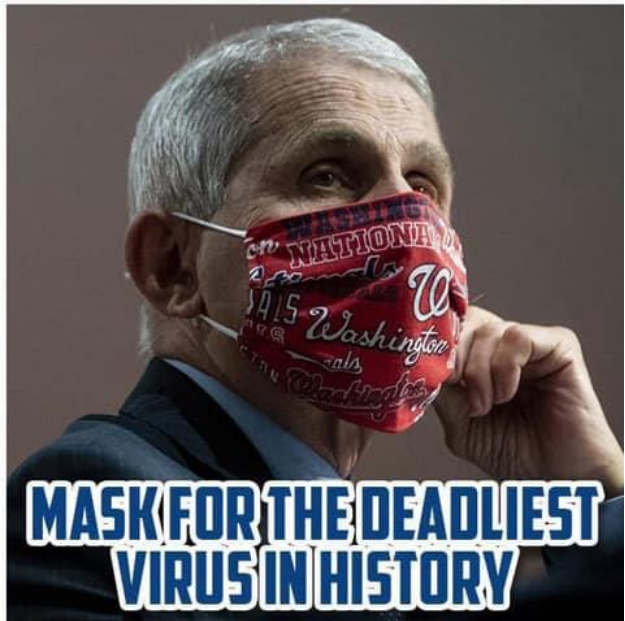

The governor of New Jersey made a seemingly odd call for help last night: The state desperately needs COBOL programmers to revamp the 50-year-old software powering the 40-year-old mainframes behind the state's unemployment system. That may seem surprising on the surface because COBOL debuted back in 1960 and mainframes ceded the leadership position to general-purpose x86 servers decades ago. However, these (sometimes) archaic systems still power much of the infrastructure behind governmental agencies, banks, and airlines.

The need comes as New Jersey struggles to process a staggering 1,600% increase in unemployment claims as the wave of coronavirus-spurred business closures comes crashing to shore. 1980's-era mainframes power new Jersey's unemployment system, so scaling operations up to handle the increased load requires programmers that mostly no longer exist. That presents a unique challenge as the state looks to pay out more than 362,000 unemployment claims filed over the last two weeks, half of which are unpaid, not to mention the continuing onslaught of new applications.

The state will have competition, though; Connecticut is already leading a joint project with three other states to recruit COBOL coders to overhaul its own aging mainframe infrastructure. None of these efforts will find easy success: COBOL is a dead language that hasn't been taught in most universities for decades, and the rare COBOL coders command anywhere from \$55 to \$85 an hour. As such, New Jersey is looking for volunteers, likely of the retired sort, to help solve its problems.

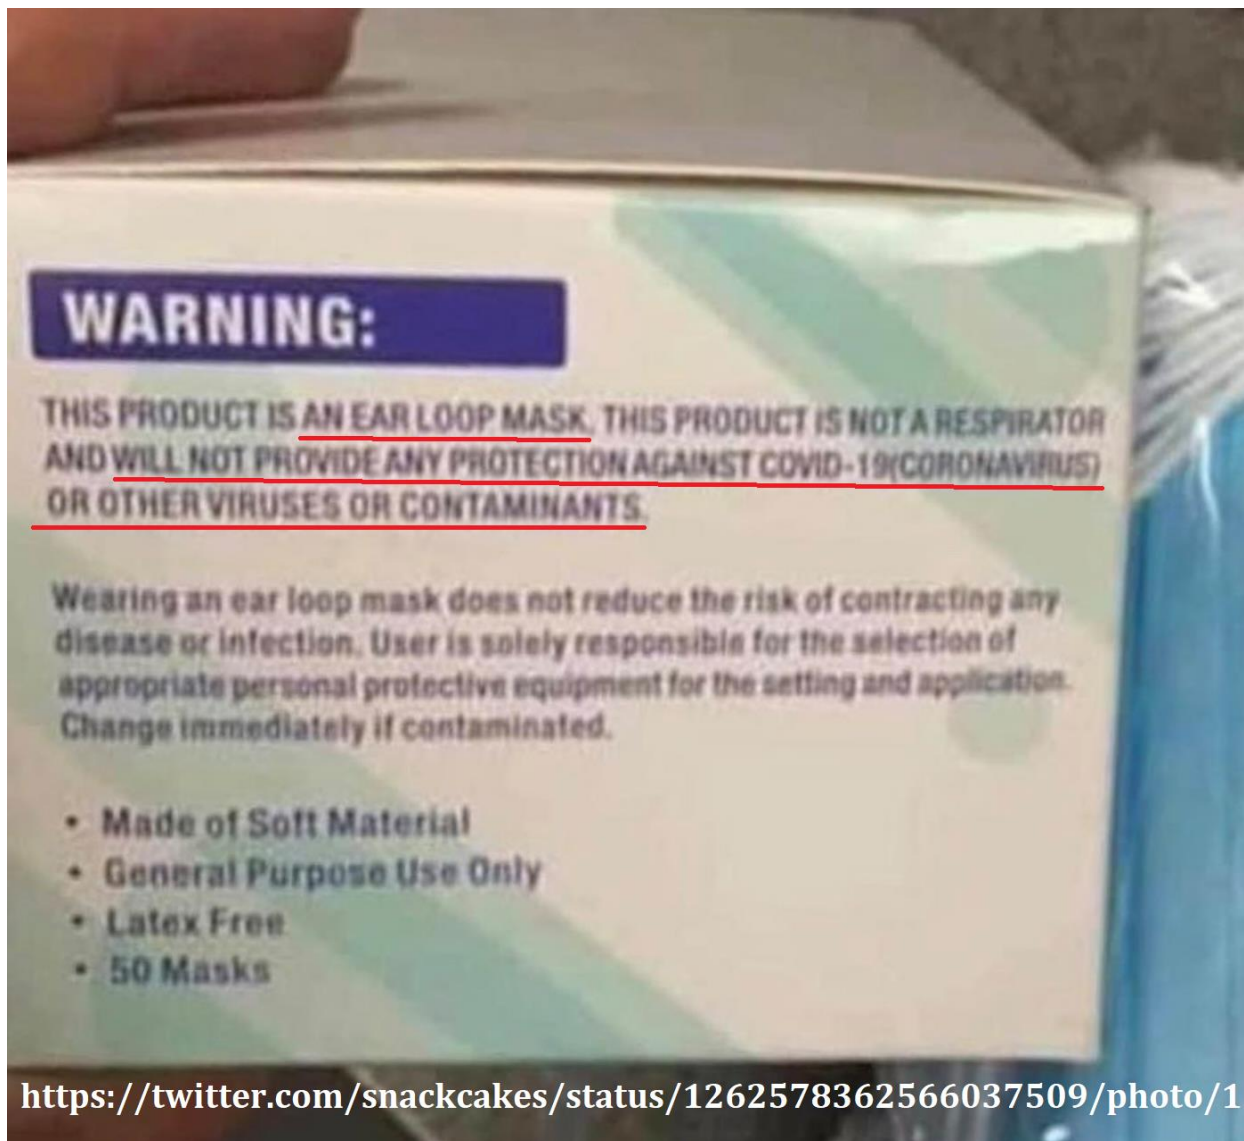

<https://www.tomshardware.com/news/new-jersey-cobol-coders-mainframes-coronavirus>

**From:** [Fauci, Anthony \(NIH/NIAID\) \[E\]](#)  
**Sent:** [Wed, 5 Feb 2020 03:48:11 +0000](#)  
**To:** [Sylvia Burwell](#)  
**Subject:** RE: A couple of quick questions.

Sylvia:

Masks are really for infected people to prevent them from spreading infection to people who are not infected rather than protecting uninfected people from acquiring infection. The typical mask you buy in the drug store is not really effective in keeping out virus, which is small enough to pass through the material. It might, however, provide some slight benefit in keep out gross droplets if someone coughs or sneezes on you. I do not recommend that you wear a mask, particularly since you are going to a very low risk location. Your instincts are correct, money is best spent on medical countermeasures such as diagnostics and vaccines.

Safe travels.  
Best regards,  
Tony

When dealing with viruses, the first steps are identifying the type and the vector of spread. Once the virus is identified, its size will determine what preventive measures to implement and are effective at keeping it out. There have been various studies conducted on masks with conflicting information than what public health authorities have conveyed to the public. To quote a study from the New England Journal of Medicine: *"In many cases, the desire for widespread masking is a reflexive reaction to anxiety over the pandemic."*<sup>353</sup> Certain types of masks are completely worthless and may actually increase the risk of infection.<sup>354, 355</sup>

The N95 mask, as an example, is made by various manufacturers and under different names. The "N95" is a government efficiency rating that means the mask blocks about 95 percent of particles that are 0.3 microns in size or larger.<sup>356</sup>

SARS-CoV-2 is a large-sized virus, approximately 120 nm in diameter.<sup>357</sup> This equates to a micron size of .12 which is smaller than the .3 microns the N95 mask is tasked to filter. So the N95 mask, based on math, will not filter SARS-CoV-2. Does that mean the N95 is worthless? No. Anything is better than nothing. N95s, when coupled with a face shield, can drastically decrease infection. That's what PPE is all about. Risk reduction. Going forward, however, N100's and P100's would be better suited. Also, N95s are designed to work in a compromised environment. That means they filter the air in, not out, depending on the manufacturer and if they have a valve.<sup>358</sup> So if an individual has the coronavirus and is using an N95 to "protect others" around them from their contaminated aerosol, that won't work. They can and will still infect others by exhaling, which all depends on the level of exposure and duration. When determining mask filtration systems, it's vital to know how these systems work and what they can filter. These are all shortcomings that need to be addressed so that in the future when the next outbreak occurs, proper PPE and gear are ready, on hand, and are effective at properly protecting individuals.

But masks are just one aspect. The eyes are a vector through which the coronavirus can gain entry into the body, so goggles are needed as well.

#### Abstract

Go to:

#### Purpose

Coronavirus disease 2019 (COVID-19) is an ongoing global public health problem, and most of the COVID-19 research is focused mainly on the respiratory system because of life-threatening results. However, manifestations in other organs should not be ignored since they can also be a mode of transmission. We sought to describe the ocular manifestations of COVID-19 and investigate the association between ocular involvement and clinical presentation and laboratory outcomes.

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7274940/>

An encapsulating helmet with an N100 or P100 filter and microclimate capabilities is recommended for doctors and nurses. Coupling it with protective equipment such as gloves and Tyvek suits to ensure no skin contact with infectious fluids would drastically reduce, if not completely abolish, infection rates among those who are at risk the most, and ensure minimal bruising around the face.

Encapsulating helmet with N95 filters (replace N95 and use N100 or P100 filters).

There are many, many more incidents involving crimes and murders over mask disputes, but they're not listed due to the number of cases. When pushed to the limit, every person reacts differently. Stressful situations can lead to drastic escalation. **Always avoid conflict, even if you're right. The fight incurred may be the one for your life.**

NEW - Facebook bans top medic @DrAseemMalhotra over posting a reputable study saying children should not be forced to wear masks (Daily Express)

# Facebook bans top medic over masks

**EXCLUSIVE**

By **Giles Sheldrick** Chief Reporter

FACEBOOK was yesterday slammed by a leading NHS medic it “cancelled” for questioning the merits of children wearing face masks.

Cardiologist Dr Aseem Malhotra, *right*, was thrown off for sharing a reputable study saying children should not be forced to wear them.

He posted a research letter in JAMA Paediatrics, published by the American Medical Association.

But Facebook claimed the post “could cause physical harm”. Dr Malhotra said: “This was totally and completely anti-democratic.”

N95s aren't all that safe, as mentioned previously, but when faced with nothing, some protection is better than none. Proper decontamination of equipment is also very important. Wearing protective gear means absolutely nothing if it's not properly sanitized before removal, unintentionally exposing the individual to the pathogen.

## 7<sup>th</sup> Lesson: The Number of Reported Cases and Deaths Will Not Be Accurate

The time will come when diligent research over long periods will bring to light things which now lie hidden.

— Seneca

From misinformation, miscalculation, number cooking, and flat-out fraud: the number of reported cases and deaths will not be accurate. Because of the ability of a bioengineered virus to remain undetected for long periods and an inability of current testing methods to accurately detect it—by the time it's uncovered, it will be too late. Depending on several factors, including  $R_0$  and incubation period, tools for testing and detection may take a while to implement, followed by treatment protocols and a vaccine. A truly stealthy virus would ravage the population and cause a significant death toll, much higher than official tallies.

### *C.I.A. Hunts for Authentic Virus Totals in China, Dismissing Government Tallies*

Intelligence officials have told the White House for weeks that China has vastly understated the spread of the coronavirus and the damage the pandemic has done.

@drsimonegold

The CDC is now listing vaccinated COVID-19 deaths as UNvaccinated deaths if they die within 14 days of the vaccine.

Wow.

The screenshot shows a CDC press release. The main title is "Hospitalizations Among Persons Aged ≥16 Years in Los Angeles County, California, May 1–July 25, 2021". The article discusses COVID-19 hospitalizations and deaths, comparing vaccinated and unvaccinated individuals. It notes that for vaccinated individuals, deaths occurring within 14 days of vaccination are classified as unvaccinated deaths. The article also mentions that the Delta variant was increasing during the period of the study.

Coronavirus disease (COVID-19): Serology

## Coronavirus disease (COVID-19): Serology

9 June 2020 | Q&A

### What is herd immunity?

Herd immunity is the indirect protection from an infectious disease that happens when a population is immune either through vaccination or immunity developed through previous infection. This means that even people who haven't been infected, or in whom an infection hasn't triggered an immune response, they are protected because people around them who are immune can act as buffers between them and an infected person. The threshold for establishing herd immunity for COVID-19 is not yet clear.

Coronavirus disease (COVID-19): Serology,  
antibodies and immunity

## Coronavirus disease (COVID-19): Serology, antibodies and immunity

13 November 2020 | Q&A

### What is herd immunity?

'Herd immunity', also known as 'population immunity', is a concept used for vaccination, in which a population can be protected from a certain virus if a threshold of vaccination is reached.

Herd immunity is achieved by protecting people from a virus, not by exposing them to it. Read the [Director-General's 12 October media briefing speech](#) for more detail.

vaccine

Dictionary Thesaurus

**vaccine** noun

Save Word

vac-cine | \vak-'sēn, 'vak-'sēn\

**Definition of vaccine**

: a preparation that is administered (as by injection) to stimulate the body's immune response against a specific infectious disease:

- a** : an antigenic preparation of a typically inactivated or attenuated (see **ATTENUATED** sense 2) pathogenic agent (such as a bacterium or virus) or one of its components or products (such as a protein or toxin)
- b** : a preparation of genetic material (such as a strand of synthesized messenger RNA) that is used by the cells of the body to produce an antigenic substance (such as a fragment of virus spike protein)

WORD OF THE DAY

**absolve**

See Definitions and Examples »

## Definition of Terms

**Immunity:** Protection from an infectious disease. If you are immune to a disease, you can be exposed to it without becoming infected.

**Vaccine:** A product that stimulates a person's immune system to produce immunity to a specific disease, protecting the person from that disease. Vaccines are usually administered through needle injections, but can also be administered by mouth or sprayed into the nose.

**Vaccination:** The act of introducing a vaccine into the body to produce immunity to a specific disease.

**Immunization:** A process by which a person becomes protected against a disease through vaccination. This term is often used interchangeably with vaccination or inoculation.

Page last reviewed: May 16, 2018

## Definition of Terms

# The Key to Defeating COVID-19 Already Exists. We Need to Start Using It | Opinion

BY HARVEY A. RISCH, MD, PHD ON 7/23/20 AT 7:00 AM EDT

SHARE

OPINION

CORONAVIRUS

HEALTH AND MEDICINE

MEDICINE

FDA

**A**s professor of epidemiology at Yale School of Public Health, I have authored over 300 peer-reviewed publications and currently hold senior positions on the editorial boards of several leading journals. I am usually accustomed to advocating for positions within the mainstream of medicine, so have been flummoxed to find that, in the midst of a crisis, I am fighting for a treatment that the data fully support but which, for reasons having nothing to do with a correct understanding of the science, has been pushed to the sidelines. As a result, tens of thousands of patients with COVID-19 are dying unnecessarily. Fortunately, the situation can be reversed easily and quickly.

I am referring, of course, to the medication hydroxychloroquine. When this inexpensive oral medication is given very early in the course of illness, before the virus has had time to multiply beyond control, it has shown to be highly effective, especially when given in combination with the antibiotics azithromycin or doxycycline and the nutritional supplement zinc.

## Chloroquine is a potent inhibitor of SARS coronavirus infection and spread

### Abstract

**Background:** Severe acute respiratory syndrome (SARS) is caused by a newly discovered coronavirus (SARS-CoV). No effective prophylactic or post-exposure therapy is currently available.

**Results:** We report, however, that chloroquine has strong antiviral effects on SARS-CoV infection of primate cells. These inhibitory effects are observed when the cells are treated with the drug either before or after exposure to the virus, suggesting both prophylactic and therapeutic advantage. In addition to the well-known functions of chloroquine such as elevations of endosomal pH, the drug appears to interfere with terminal glycosylation of the cellular receptor, angiotensin-converting enzyme 2. This may negatively influence the virus-receptor binding and abrogate the infection, with further ramifications by the elevation of vesicular pH, resulting in the inhibition of infection and spread of SARS CoV at clinically admissible concentrations.

**Conclusion:** Chloroquine is effective in preventing the spread of SARS CoV in cell culture. Favorable inhibition of virus spread was observed when the cells were either treated with chloroquine prior to or after SARS CoV infection. In addition, the indirect immunofluorescence assay described herein represents a simple and rapid method for screening SARS-CoV antiviral compounds.

# Lancet Formally Retracts Fake Hydroxychloroquine Study Used By Media To Attack Trump

JUNE 4, 2020 By Tristan Justice

The Lancet, a peer-reviewed medical journal that published a 96,000-subject study indicting the efficacy of the politically controversial hydroxychloroquine for COVID-19 has retracted its findings that the malaria medication led to an increased risk of death.

“Today, three of the authors of the paper, ‘Hydroxychloroquine or chloroquine with or without a macrolide for treatment of COVID-19: a multinational registry analysis’, have retracted their study,” The Lancet said in a **retraction statement** Thursday. “They were unable to complete an independent audit of the data underpinning their analysis. As a result, they have concluded that they ‘can no longer vouch for the veracity of the primary data sources.’”

“We deeply apologise to you, the editors, and the journal readership for any embarrassment or inconvenience that this may have caused,” the authors of the study wrote.

Replying to @DrewHolden360

First, for context, here's the original piece from @RollingStone and the follow up from the actual hospital saying the story was BS and that the one (one!) person the story quotes doesn't work at that hospital anymore (and hasn't in months).

**Rolling Stone**   
@RollingStone

Gunshot victims left waiting as horse dewormer overdoses overwhelm Oklahoma hospitals, doctor says [rol.st/38CChjl](https://rol.st/38CChjl)

**Message from the administration of Northeastern Health System - Sequoyah:**

Although Dr. Jason McElyea is not an employee of NHS Sequoyah, he is affiliated with a medical staffing group that provides coverage for our emergency room.

With that said, Dr. McElyea has not worked at our Sallisaw location in over 2 months.

NHS Sequoyah has not treated any patients due to complications related to taking ivermectin. This includes not treating any patients for ivermectin overdose.

All patients who have visited our emergency room have received medical attention as appropriate. Our hospital has not had to turn away any patients seeking emergency care.

We want to reassure our community that our staff is working hard to provide quality healthcare to all patients. We appreciate the opportunity to clarify this issue and as always, we value our community's support.

Probably part of the crooked reason they fight against ivermectin and all other treatments for Covid. The EUA requires no alternatives exist. Pfizer should be sued into oblivion, and the governmental collusion should result in long prison sentences.

#### Contains Nonbinding Recommendations

of COVID-19, for which there may be significantly different considerations under the standard set forth in section 564 of the FD&C Act (21 U.S.C. 360bbb-3), reflecting the products' characteristics and anticipated clinical uses.

Sponsors engaged in the development of vaccines to prevent COVID-19 should refer to the guidance for industry entitled "Development and Licensure of Vaccines to Prevent COVID-19" (Ref. 1), the guidance for industry and investigators entitled "COVID-19 Public Health Emergency: General Considerations for Pre-IND Meeting Requests for COVID-19 Related Drugs and Biological Products" (Ref. 2), and the guidance for industry and other stakeholders entitled "Emergency Use Authorization of Medical Products and Related Authorities" (Ref. 3).

### III. CRITERIA AND CONSIDERATIONS FOR THE ISSUANCE OF AN EUA FOR A COVID-19 VACCINE

On February 4, 2020, pursuant to section 564(b)(1)(C) of the FD&C Act (21 U.S.C. 360bbb-3(b)(1)(C)), the Secretary of HHS determined that there is a public health emergency that has a significant potential to affect national security or the health and security of United States citizens living abroad, and that involves the virus that causes COVID-19. On the basis of such determination, on March 27, 2020, the Secretary then declared that circumstances exist justifying the authorization of emergency use of drugs and biological products during the COVID-19 pandemic, pursuant to section 564(b)(1) of the FD&C Act (21 U.S.C. 360bbb-3(b)(1)).<sup>3</sup>

Based on this declaration and determination, FDA may issue an EUA after FDA has determined that the following statutory requirements are met (section 564 of the FD&C Act (21 U.S.C. 360bbb-3)) (Ref. 3):

- The chemical, biological, radiological, or nuclear (CBRN) agent referred to in the March 27, 2020 EUA declaration by the Secretary of HHS (SARS-CoV-2) can cause a serious or life-threatening disease or condition.
- Based on the totality of scientific evidence available, including data from adequate and well-controlled trials, if available, it is reasonable to believe that the product may be effective to prevent, diagnose, or treat such serious or life-threatening disease or condition that can be caused by SARS-CoV-2.
- The known and potential benefits of the product, when used to diagnose, prevent, or treat the identified serious or life-threatening disease or condition, outweigh the known and potential risks of the product.
- There is no adequate, approved, and available alternative to the product for diagnosing, preventing, or treating the disease or condition.

<sup>3</sup> This EUA declaration is distinct from, and is not dependent on, the declaration by the Secretary of HHS of a public health emergency related to COVID-19, issued on January 31, 2020 and subsequently renewed, under section 319 of the PHS Act. See *supra* note 1. The issuance of an EUA for a COVID-19 vaccine is not based on that January 2020 declaration of a public health emergency and, therefore, an EUA may remain in effect beyond the duration of the public health emergency declaration if all other statutory conditions are met.

Business Conspiracy Domestic Policy Expose Warp Speed Government Health Politics Technology Top News

Whitney Webb

## Operation Warp Speed Is Using A CIA-Linked Contractor To Keep Covid-19 Vaccine Contracts Secret

October 6, 2020 Whitney Webb Comment(1)

***\$6 billion in Covid-19 vaccine contracts awarded by Operation Warp Speed have been doled out by a secretive government contractor with deep ties to the CIA and DHS, escaping regulatory scrutiny and beyond the reach of FOIA requests.***

Last Tuesday, while most Americans were distracted by the first US presidential debate, *NPR* quietly reported that the US government's Operation Warp Speed, a public-private partnership launched by the Trump administration to rapidly develop and distribute a Covid-19 vaccine, had taken the unusual step of awarding contracts to vaccine companies, not directly, but through a secretive defense contractor.

Thanks for asking. Twitter, of course, does not lend itself to full citations.

I derived the number from published COVID-19 death rates of unvaccinated people (about 1,000 per day). And from the polls that show 25% of Republican voters are unvaccinated, versus 5% of Democrats.

NO.DS(HD)/COVID-19/2021  
GOVERNMENT OF SINDH  
HEALTH DEPARTMENT  
Karachi, Dated: 23<sup>rd</sup> July 2021

To,

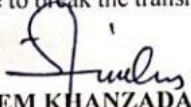

The National Coordinator,  
National Command and Operation Centre (NCOC)  
Government of Pakistan,  
**ISLAMABAD.**

**SUBJECT: TEMPORARY BLOCKAGE OF MOBILE SIMS OF NON-  
VACCINATED MOBILE USERS.**

I am directed to refer to the subject noted above and to the decision of Provincial Corona Task Force meeting held under the Chairmanship of Honourable Chief Minister, Sindh on dated 23<sup>rd</sup> July, 2021 regarding the blockage of mobile SIMS in phased manner of those people who did not turn up for vaccination despite all efforts made by Sindh Government through print, electronic and social media as well as despite all possible measures taken by District administration across the province. It was decided that following phase-wise measures may be taken for successful vaccination drive to stop transmission of the COVID-19.

1<sup>st</sup> phase : A warning for blockage of SIM  
2<sup>nd</sup> Phase : Blockage of social Media (Facebook, Whatsapp etc)  
3<sup>rd</sup> Phase : Blockage of outgoing call  
4<sup>th</sup> Phase: Complete Sim Blockage until vaccinated.

It is therefore requested that Pakistan Telecommunication Authority may be directed to take necessary measures accordingly for successful vaccination drive to break the transmission chain of covid-19.

#### **Background and aims**

Balanced nutrition which can help in maintaining immunity is essential for prevention and management of viral infections. While data regarding nutrition in coronavirus infection (COVID-19) are not available, in this review, we aimed to evaluate evidence from previous clinical trials that studied nutrition-based interventions for viral diseases (with special emphasis on respiratory infections), and summarise our observations.

### Abstract

Coronavirus disease 2019 (COVID-19) is the current major health crisis in the world. A successful strategy to combat the COVID-19 pandemic is the improvement of nutritional pattern. Garlic is one of the most efficient natural antibiotics against the wide spectrum of viruses and bacteria. Organosulfur (e.g., allicin and alliin) and flavonoid (e.g., quercetin) compounds are responsible for immunomodulatory effects of this healthy spice. The viral replication process is accelerated with the main structural protease of SARS-CoV-2. The formation of hydrogen bonds between this serine-type protease and garlic bioactives in the active site regions inhibits the COVID-19 outbreak. The daily dietary intake of garlic and its derived-products as an adjuvant therapy may improve side effects and toxicity of the main therapeutic drugs with reducing the used dose.

# These 3 foods could be key to fighting COVID-19 naturally

by: Katharin Czink, Dina Bair

Posted: Dec 8, 2020 / 10:36 PM CST / Updated: Dec 8, 2020 / 10:36 PM CST

If you're looking for a natural way to fight COVID-19, the key may be right in your pantry.

Green tea, chocolate and grapes all contain compounds called flavonoids, historically known to enhance health.

A North Carolina State University researcher decided to put them to the test against SARS-CoV-2, the virus that causes COVID-19. And while not definitive, the results were strong enough to elicit some excitement, some attention and now a request to the National Institutes of Health for special consideration.

Plant biologist Deyu Xie is a professor of plant biology at North Carolina State University and knows the benefits for his and his family's health. He has spent his career studying the compounds in nature.

### Abstract

Formulae display:  MathJax 

The severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) is a novel infectious disease that is in rapid growth. Several trials are going on worldwide to find a solution for this pandemic. The viral replication can be blocked by inhibiting the receptor-binding domain (RBD) of SARS-CoV-2 spike protein (SARS-CoV-2 RBD Spro) and the SARS-CoV-2 main protease (SARS-CoV-2 Mpro). The binding of potential small molecules to these proteins can inhibit the replication and transcription of the virus. The spice molecules that are used in our food have antiviral, antifungal and antimicrobial properties. As spice molecules are consumed in the diet, hence its antiviral properties against SARS-CoV-2 will benefit in a significant manner. Therefore, in this work, the molecular docking of 30 selected spice molecules (screened through ADME property) was performed to identify the potential inhibitors for the RBD Spro and Mpro of SARS-CoV-2. We have found that though all the molecules bind actively with the SARS-CoV-2 RBD Spro and Mpro, but Piperine has the highest binding affinity among the 30 screened molecules. Besides, the comparative study between Piperine and currently used drugs show that Piperine is more effective. The interaction of Piperine with RBD Spro and Mpro is further validated by the molecular dynamics (MD) simulation studies. The free energy landscape and binding free energy results also, support for the stable complex formation of Piperine with RBD Spro and Mpro. We anticipate immediate wet-lab experiments and clinical trials in support of this computational study that might help to inhibit the SARS-CoV-2 virus.

## ABSTRACT

Formulae display:  MathJax ?

Airborne transmission of SARS-CoV-2 through virus-containing aerosol particles has been established as an important pathway for Covid-19 infection. Suitable measures to prevent such infections are imperative, especially in situations when a high number of persons convene in closed rooms. Here we tested the efficiency and practicability of operating four air purifiers equipped with HEPA filters in a high school classroom while regular classes were taking place. We monitored the aerosol number concentration for particles >3 nm at two locations in the room, the aerosol size distribution in the range from 10 nm to 10 μm, PM<sub>10</sub> and CO<sub>2</sub> concentration. For comparison, we performed similar measurements in a neighboring classroom without purifiers. In times when classes were conducted with windows and door closed, the aerosol concentration was reduced by more than 90% within less than 30 minutes when running the purifiers (air exchange rate 5.5 h<sup>-1</sup>). The reduction was homogeneous throughout the room and for all particle sizes. The measurements are supplemented by a calculation estimating the maximum concentration levels of virus-containing aerosol from a highly contagious person speaking in a closed room with and without air purifiers. Measurements and calculation demonstrate that air purifiers potentially represent a well-suited measure to reduce the risks of airborne transmission of SARS-CoV-2 substantially. Staying for two hours in a closed room with a highly infective person, we estimate that the inhaled dose is reduced by a factor of six when using air purifiers with a total air exchange rate of 5.7 h<sup>-1</sup>.

### **Abstract**

Following the outbreak of severe acute respiratory syndrome coronavirus (SARS-CoV-2) in China, airborne water droplets (aerosols) have been identified as the main transmission route, although other transmission routes are likely to exist. We quantify SARS-CoV-2 virus survivability within water and the risk of infection posed by faecal contaminated water within 39 countries. We identify that the virus can remain stable within water for up to 25 days, and country specific relative risk of infection posed by faecal contaminated water is related to the environment. Faecal contaminated rivers, waterways and water systems within countries with high infection rates can provide infectious doses >100 copies within 100 ml of water. The implications for freshwater systems, the coastal marine environment and virus resurgence are discussed.

# Coronavirus medication developed in Israel is 96% effective, hospital says

i24NEWS ■ February 05, 2021, 4:01 AM ■ latest revision February 06, 2021, 3:34 AM

🕒 3 min read

Nati Shohat/Flash90 ■ Tel Aviv Sourasky Medical Center, July 06, 2010.

**Of the 30 patients who were given the drug, 29 showed marked improvement within two days**

An Israeli hospital may have found the cure for COVID-19 in a potential game changer in the fight against the global pandemic, according to the Tel Aviv Sourasky Medical Center, also known as Ichilov Hospital.

The medicine's developer, Prof Nadir Arber from the hospital's Integrated Cancer Prevention Center, administered it to patients in moderate and serious condition, reporting an impressive success rate of 96 percent.

Prof Arber hailed the drug dubbed EXO-CD24 as "effective inexpensive."

"The medicine is administered through inhalation, once a day, in a procedure that takes only a few minutes, for five days," Prof Arber specified.

NYT published a piece on the hypocrisy of "public health experts" supporting or opposing public protests depending on the ideological motivation of the protesters. [nytimes.com/2020/07/06/us/...](https://www.nytimes.com/2020/07/06/us/...)

Catherine Troisi, an infectious disease expert at the University of Texas Health Science Center at Houston, said. "But we have to be honest: A few weeks ago, I was at a protest with a great swell of people, she attended a meeting that was dangerous behavior. supporting Mr. Floyd, a sense of urgency that was dangerous behavior. I'm still grappling with that."

"I certainly condemned the anti-racism protests. I'm not condemning the protests. I have a hard time articulating the difference between the anti-lockdown demonstrators and the protesters in moral, ideological and racial terms. Some public health scientists publicly waved off the conflicted feelings of their colleagues, saying the country now confronts a stark moral choice. The letter signed by more than 1,300 epidemiologists and health workers urged Americans to adopt a "consciously anti-racist" stance and framed the difference between the anti-lockdown demonstrators and the protesters in moral, ideological and racial terms.

Mark Lurie, a professor of epidemiology at the University of Michigan, described a similar struggle. Those who protested stay-at-home orders were "rooted in white nationalism and run contrary to respect for Black lives" the letter stated.

A bioweapon doesn't need to have mass death and destruction associated with it. It could be used to soften up the country before the actual attack. Tying up and wasting resources is beneficial in war. Depleting national stockpiles and reserves would leave an unsuspecting nation in dire straits. Demoralization of its population for years or decades would help to weaken it mentally, allowing the perfect opportunity to strike. The thought that this is never going to end would be enough to put some people over the edge.

## China Amassing “Tens-of-Thousands” of Troops in Canada

OCTOBER 23, 2020 | EXONEWS EDITOR | DEEP STATE, WORLD

Article by Hal Turner

October 9, 2020

(theblogginghounds.com)

• In late 2019, Canada and China signed a treaty that allows the People’s Liberation Army of China to station Chinese troops in Canada, beginning in 2020. It has long been rumored that China has been massing troops in southern Mexico. But the rumors that Chinese troops had set up bases in Canada was pretty much laughed off until video emerged of Chinese troops marching along a road in Salt Spring Island, near Vancouver, British Columbia. (see 35 second video below)

• What are Chinese troops doing on the US border in British Columbia, Canada? According to a January 15, 2020 Canadian Independent Press Review report: “Under the terms of the Foreign Investment Protection Act (FIPA), a bilateral treaty ratified with China by the Trudeau government in 2019, Chinese security forces can be stationed on Canadian soil to protect vital Chinese investments, without the knowledge or consent of local authorities.”

<https://exonews.org/china-amassing-tens-of-thousands-of-troops-in-canada/>

**Author’s Comment.** Canada has been in the spotlight for a few years. The detainment and indictment of Huawei’s CFO at the behest of the U.S. during the trade war garnered worldwide attention, followed by a mass murder that resulted in the complete ban of assault rifles.<sup>359</sup> But the events are alluding to something more sinister on the horizon. The buildup of Chinese troops in Canada, which are signs of a precursor to invasion, closer than ever ties between both governments, an assault rifle ban, and a proposed bill that seeks to eliminate handgun purchases in cities altogether,<sup>360</sup> while also making it easier to revoke gun licenses,

thus leaving a population defenseless, are exactly what tyrants have done before the slaughter. Although the passage of time has faded the color of blood from its victims, the lessons of history are written in it.

## Nation

# U.S. Moving Self-Propelled Artillery To Border with Quebec; Reports of Uniformed Chinese Troops in Canada

NATION | NEWS DESK | 22 OCTOBER 2020  
| HITS: 21131

For weeks, stories have been coming out about large numbers of Chinese troops in Canada, near Vancouver, BC. Now, more information indicates additional uniformed Chinese troops are mustering elsewhere near the US border in Canada; this time, along the Quebec and New Brunswick Province borders with Maine, USA. The United States is now moving trainloads of heavy armor to that exact area. Looks like a fight is coming, right here in the USA.

# 'We're going to lose fast': U.S. Air Force held a war game that started with a Chinese biological attack

James Kitfield · Contributor

Wed, March 10, 2021, 12:00 PM · 11 min read

Last fall, the U.S. Air Force simulated a conflict set more than a decade in the future that began with a Chinese biological-weapon attack that swept through U.S. bases and warships in the Indo-Pacific region. Then a major Chinese military exercise was used as cover for the deployment of a massive invasion force. The simulation culminated with Chinese missile strikes raining down on U.S. bases and warships in the region, and a lightning air and amphibious assault on the island of Taiwan.

The highly classified war game, which has not been previously made public, took place less than a year after the coronavirus, reportedly originating in a Chinese market, spread to the crew of the USS Theodore Roosevelt aircraft carrier, taking one of the U.S. Navy's most significant assets out of commission.

World War 3 can be a nonviolent war confined to electronic warfare and proxy countries without causing a lot of and extreme damage like World War 2 did. Then again, it could go fast and hot causing complete annihilation.

Some of the things that can be expected are:

**Directed Energy Weapons (DEWs)** from space in the form of lasers that can damage ground targets and set fires, and High-Altitude Electromagnetic Pulses (HEMPs) that damage and disable nonhardened microelectronics.

<https://haltunnerradioshow.com/images/2020/10/08/DEW-Montage.jpg>

## U.S. military sees more use of laser, microwave weapons

By Andrea Shalal

3 MIN READ

---

WASHINGTON, July 28 (Reuters) - Lasers, microwaves and other directed energy weapons could soon be used more widely by the U.S. military, top armed forces officials and U.S. lawmakers told an industry conference on Tuesday.

The officials described weapons that are in various stages of development and testing by the U.S. Navy, Marine Corps, Air Force and Army, but said more work was needed to develop tactics for their use and to ensure sufficient funding.

“Directed energy brings the dawn of an entirely new era in defense,” Lieutenant General William Etter, Commander, Continental U.S. North American Aerospace Defense Command Region, told a conference hosted by Booz Allen Hamilton and the Center for Strategic and Budgetary Assessment in Washington.

## India denies report that China 'microwaved' its soldiers with pulse weapon in Himalayas

*'In 15 minutes, those occupying the hilltops all began to vomit. They couldn't stand up, so they fled. This was how we retook the ground'*

National Post Staff, Reuters

Nov 17, 2020 • November 18, 2020 • 4 minute read •  104 Comments

India's Border Security Force (BSF) soldiers stand guard at a checkpoint along a highway leading to Ladakh, at Gagangeer in Kashmir's Ganderbal district June 17, 2020. PHOTO BY REUTERS/DANISH ISMAIL/FILE PHOTO

A border standoff between China and India in the western Himalayas has seen terrifying new weapons emerge, the Times of London reports – including the use of a “microwave” beam that sent a high-frequency blast through Indian soldiers, forcing them back from strategic hilltops.

Microwave weapons, the Times reports, send electromagnetic pulses through their targets, which heats up human tissue and soon becomes unbearable.

Indian officials, the Daily Mail reports, have responded to the report to say it is “fake news.” They accuse China of “pure and poor psyops.” India says its troops are still in charge of the hills in question.

# Laser-Based Weather Control

Jérôme Kasparian, Ludger Wöste and Jean-Pierre Wolf

<https://doi.org/10.1364/OPN.21.7.000022>

The far-fetched concept of weather control just might be in our scientific forecast. Researchers are making progress in using ultrashort laser pulses to create lightning and cue cloud formation, with potential applications in agriculture, public safety and beyond.

**I**f global warming or stratospheric ozone depletion have taught us anything, it's that humankind can profoundly influence the Earth's climate and environment. So far, our impact on the climate has been largely an unintended consequence of our use of fossil fuels. But what if scientists could alter the weather on purpose? Purposeful local weather modulation—as well as broader attempts to “geo-engineer” climate change—are topics that are being intensively debated within the scientific community and to some extent among the public.

Such a possibility could imply invaluable economical and social consequences. For example, imagine if lasers could be used to stimulate the formation of rain clouds in drought-stricken areas or if lightning studies could help engineers to create safer airplanes or power lines that can withstand lightning strikes. Indeed, rain and lightning, with their far-reaching implications for agriculture and public safety, are the weather-modulation methods that our team and other physicists have focused on most intensively to date.

## Railguns

## Nuclear Weapons

And other highly destructive and unimaginable things (that were imagined).

## **12<sup>th</sup> Lesson: Always Plan for the Worst and Hope for the Best**

Failure to plan, is a plan for failure.

— Benjamin Franklin

As a general rule, it's always necessary to be prepared and have enough supplies to last for months and years.<sup>361</sup> The illusion that things are under control is quickly deteriorating.

## FAQs

### Was this pandemic planned?

Yes. Notwithstanding the psychic element which alluded to prior knowledge by some gifted individuals, considerable evidence indicates planning and intentional release.

### Is SARS-CoV-2 a bioweapon?

Yes. Various prominent individuals have come forward and stated that this virus couldn't have arisen naturally and came from a lab. And while others have claimed that this virus accidentally escaped and was being developed as part of a multipurpose vaccine and is not a bioweapon, a compilation of open-source data does indicate that it was intentionally released and does have hallmarks of a bioweapon that selectively targets certain genetic biomarkers in the population.

### Is SARS-CoV-2 a hoax?

No. Despite several individuals claiming that it is, it is not.

### Is SARS-CoV-2 being used to push more surveillance, lockdowns and freedom restricting measures, eroding privacy and civil rights?

Yes. The old world order can't change without a catalyst.

### Are mortality rates being manipulated?

Yes. Some U.S. states are deliberately falsifying death certificates to pump up the number of dead, thereby increasing the amount of disaster relief funds they can apply for from the U.S. federal government, which is fraud. That is also allowing the media to cast blame for mishandling the pandemic and paint it far worse than it actually is. Some nations, because they lack resources and testing methods, can't accurately diagnose and report on a number as to how many people have died from it. Other nations are flat out lying and falsifying the number of dead to contain the panic and criticism they will receive on the world stage because of their response, or lack of.<sup>362</sup>

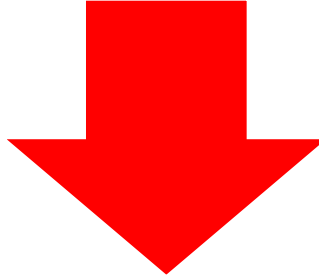

### Are masks effective against the coronavirus?

That is a trick question and depends on several factors, such as the type of mask, the filtration system it has, and how the virus spreads. Masks with proper filtration systems **can drastically reduce** the chances of getting the coronavirus, **but alone will not be enough to protect and prevent an individual from contracting it.** They need to be coupled with gloves, goggles, and other PPE to drastically decrease the chances of infection. The vector of spread, as is being discovered, isn't strictly limited to aerosolized form alone but includes contact with an infected surface or individual, allowing for infection to take root through

open pores and sweat glands in a person's skin. Other vectors of infection include the eyes, mouth, nose, and open orifices through infected bodily fluids, as well as exposure to contaminated foods and drinks.

\*\*\*\*\*IMPORTANT\*\*\*\*\*

### **Will there be more “pandemics” in the future?**

**YES.** The head of the WHO indicated that this will not be the last pandemic.<sup>363</sup> Author Dean Koontz, in his book, also wrote that this disease will disappear and then reappear in ten years. Even Bill Gates, while this pandemic hasn't ceased, said the next one could be ten times worse.<sup>364</sup> Expect a future “outbreak” with a higher virulence and mortality rate than the current one we're experiencing. If the strength and effectiveness of each outbreak have grown over the years, consider how deadly the next one will be. **Hundreds of millions will probably die.** One of the reasons that people often joke *Idiocracy* was a documentary instead of a comedy is because that's the future. Neurodegenerative diseases will become prevalent in the population because of custom-tailored bioweapons and their lasting effects, literally dumbing everyone down.<sup>365, 366</sup> Other authors who have exhibited PSI potential have mentioned **Creutzfeldt-Jakob**<sup>367</sup> as a disease that will be prevalent in the 2030s. Historically, what is the one thing intelligence fears? **Other intelligence. Take microorganisms, like viruses, bacteria, and fungi very seriously.**

**Author's Comment:** Since it's no surprise that there will be future pandemics, it would be of great importance to start scientific research into combating viruses and bacteria with existing medications, repurposing them to ensure some means of defense while also strengthening supply lines should drugs or ingredients become unavailable. Natural means through proper dietary intake and spices shouldn't be overlooked but emphasized. Research shouldn't be limited to coronaviruses but should encompass all viruses and bacteria so as not to be unprepared, buy time, and drastically reduce the duration of infection, allowing for a quick recovery. That will free up valuable resources, so doctors and nurses aren't preoccupied with everyone, saving countless lives, money, and time. **When the next “pandemic” hits, no one should be saying, “how come we didn't see it coming.”**
